ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2016

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File No. 1-11442

CHART INDUSTRIES, INC.

(Exact Name of Registrant as Specified in its Charter)

Delaware

*(State or Other Jurisdiction of
Incorporation or Organization)*

34-1712937

*(IRS Employer
Identification No.)*

One Infinity Corporate Centre Drive,

Suite 300, Garfield Heights, Ohio

(Address of Principal Executive Offices)

44125-5370

(Zip Code)

Registrant's telephone number, including area code:

(440) 753-1490

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class

Name of Each Exchange on Which Registered

Common Stock, par value \$0.01

The NASDAQ Stock Market LLC

Securities registered pursuant to Section 12(g) of the Act:

None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

(Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the voting common equity held by non-affiliates computed by reference to the price of \$24.13 per share at which the common equity was last sold, as of the last business day of the registrant's most recently completed second fiscal quarter, was \$730,092,603.

As of February 20, 2017, there were 30,687,770 outstanding shares of the Company's common stock, par value \$0.01 per share.

Documents Incorporated by Reference

Portions of the following document are incorporated by reference into Part III of this Annual Report on Form 10-K: the definitive Proxy Statement to be used in connection with the Registrant's Annual Meeting of Stockholders to be held on May 25, 2017 (the "2017 Proxy Statement").

Except as otherwise stated, the information contained in this Annual Report on Form 10-K is as of December 31, 2016.

Item 1. *Business*

THE COMPANY

Overview

Chart Industries, Inc., a Delaware corporation incorporated in 1992 (the “Company,” “Chart,” or “we” as used herein refers to Chart Industries, Inc. and our consolidated subsidiaries, unless the context indicates otherwise), is a leading diversified global manufacturer of highly engineered equipment, packaged solutions, and value-add services used throughout the gas to liquid cycle in all industries that require liquid gases or alternative equipment for gas generation, generally for the industrial gas, energy, and biomedical industries. Our equipment and engineered systems are primarily used for low-temperature and cryogenic applications utilizing our expertise in cryogenic systems and equipment which operate at low temperatures sometimes approaching absolute zero (0 Kelvin; -273° Centigrade; -459° Fahrenheit). Our products include vacuum insulated containment vessels, heat exchangers, cold boxes, liquefaction process units, other cryogenic components, gas processing equipment, and equipment for respiratory therapy.

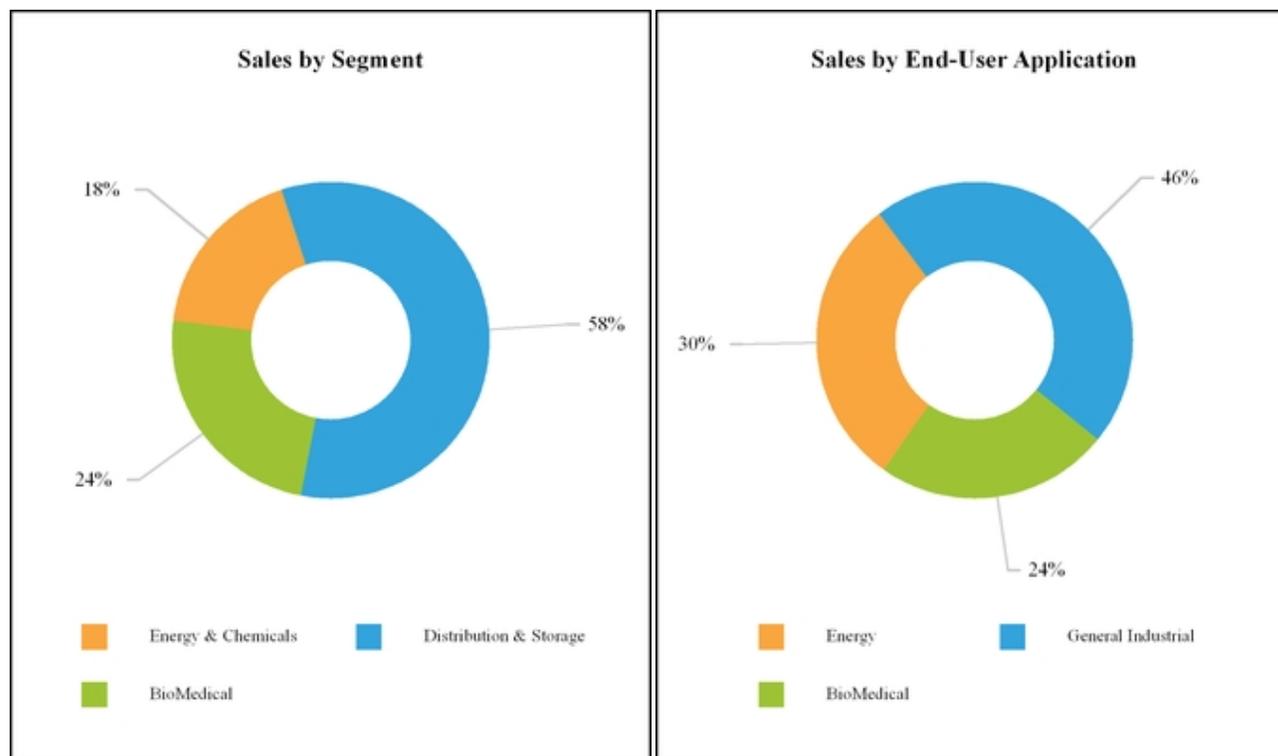

Our primary customers are large, multinational producers and distributors of hydrocarbon and industrial gases and their end-users. We sell our products and services to more than 2,000 customers worldwide. We have developed long-standing relationships with leading companies in the gas production, gas distribution, gas processing, liquefied natural gas or LNG, chemical and industrial gas industries, including Air Products, Praxair, Airgas “an Air Liquide company,” Air Liquide, The Linde Group or Linde, Bechtel Corporation, ExxonMobil, British Petroleum or BP, ConocoPhillips, PetroChina, CB&I, Toyo, JGC, Samsung, UOP, and Shell, some of whom have been purchasing our products for over 20 years.

We have attained this position by capitalizing on our technical expertise and know-how, broad product offering, reputation for quality, low-cost global manufacturing footprint, and by focusing on attractive, growing markets. We have an established sales and customer support presence across the globe and low cost manufacturing operations in the United States, Central Europe, and China. For the years ended December 31, 2016, 2015, and 2014, we generated sales of \$859.2 million, \$1,040.2 million, and \$1,193.0 million, respectively.

Segments, Applications and Products

We operate in four major end-market applications: Energy, Industrial, Life Sciences, and Respiratory Healthcare, through our three business segments: (i) Energy & Chemicals or E&C, (ii) Distribution & Storage or D&S, and (iii) BioMedical. While each segment manufactures and markets different cryogenic and gas processing equipment and systems to distinct end-users, they all share a reliance on our heat transfer, vacuum insulation, low temperature storage, and gas processing know-how and expertise. The E&C and D&S segments manufacture products used primarily in energy-related and industrial applications, such as the separation, liquefaction, distribution, and storage of hydrocarbon and industrial gases. Through our BioMedical segment, we manufacture and supply medical devices, including cryogenic and non-cryogenic equipment, used in respiratory healthcare. We also manufacture and supply products for life sciences including biological research and animal breeding. Further information about these segments is located in Note 20 of the notes to the Company’s consolidated financial statements included in Item 8 of this Annual Report on Form 10-K.

The following charts show the proportion of our revenues generated by each business segment, as well as our estimate of the proportion of revenue generated by end-user application for the year ended December 31, 2016:

Energy & Chemicals Segment

E&C (18% of sales for the year ended December 31, 2016) facilitates major natural gas, petrochemical processing, and industrial gas companies in the production of their products. E&C supplies mission critical engineered equipment and systems used in the separation, liquefaction, and purification of hydrocarbon and industrial gases that span gas-to-liquid applications including natural gas processing, petrochemical, LNG, and industrial gas applications. Our principal products include brazed aluminum heat exchangers, Core-in-Kettle® heat exchangers, air cooled heat exchangers, cold boxes, and process systems. Brazed aluminum heat exchangers accounted for 7.4%, 11.9%, and 14.9% of consolidated sales for the years ended December 31, 2016, 2015, and 2014, respectively. Process systems accounted for 5.8%, 14.0%, and 12.3% of consolidated sales for the years ended December 31, 2016, 2015, and 2014, respectively.

Natural Gas Processing (including Petrochemical) Applications

We provide natural gas processing solutions that facilitate the progressive cooling and liquefaction of hydrocarbon mixtures for the subsequent recovery or purification of component gases, which accounted for 12.3%, 17.4%, and 17.5% of consolidated sales for the years ended December 31, 2016, 2015, and 2014, respectively. Our brazed aluminum heat exchangers allow producers to obtain purified hydrocarbon by-products, such as methane, ethane, propane, and ethylene, which are commercially marketable for various industrial or residential uses. Our cold boxes are highly engineered systems that incorporate brazed aluminum heat exchangers, pressure vessels, and interconnecting piping used to significantly reduce the temperature of gas mixtures to liquefy component gases so that they can be separated and purified for further use in multiple energy, industrial, scientific, and commercial applications. Our air cooled heat exchangers are used to cool or condense fluids to allow for further processing and for cooling gas compression equipment. Customers for our natural gas processing applications include large companies in the hydrocarbon processing industry, as well as engineering, procurement and construction (“EPC”) contractors.

Demand for these applications is primarily driven by the growth in the natural gas liquids (or NGLs) separation and other natural gas segments of the hydrocarbon processing industries, including LNG. In the future, management believes that continuing efforts by petroleum producing countries to better utilize stranded natural gas and previously flared gases present a promising source of demand. We have a number of competitors for our heat exchangers and cold boxes, including certain leading companies in the industrial gas and hydrocarbon processing industries and many smaller fabrication-only facilities around the world. Competition with respect to our more specialized brazed aluminum heat exchangers includes a small number of global (European and Asian) manufacturers.

LNG Applications

We provide process technology, liquefaction train, and independent mission critical equipment for the liquefaction of LNG, including small to mid-scale facilities, floating LNG applications, and large base-load export facilities, which accounted for 4.4%, 13.1%, and 12.1% of consolidated sales for the years ended December 31, 2016, 2015, and 2014, respectively. We are a leading supplier to EPC firms where we provide equipment or design the process and provide equipment, providing an integrated and optimized approach to the project. These “Concept-to-Reality” process systems incorporate many of Chart’s core products, including brazed aluminum heat exchangers, Core-in-Kettle® heat exchangers, cold boxes, pressure vessels, pipe work, and air cooled heat exchangers. These systems are used for global LNG projects, including projects in North America and China, for local LNG production and LNG export terminals. Our proprietary IPSMR® (Integrated Pre-cooled Single Mixed Refrigerant) liquefaction process technology offers lower capital expenditure rates than competing processes per ton of LNG produced and very competitive operating costs.

Demand for LNG applications is primarily driven by increased use and global trade in natural gas (transported as LNG) since natural gas offers significant cost and environmental advantages over other fossil fuels. Demand for LNG applications is also driven by diesel displacement and continuing efforts by petroleum producing countries to better utilize stranded natural gas and previously flared gases. We have a number of competitors for these applications, including leading industrial gas companies, other brazed aluminum heat exchanger manufacturers, and other equipment fabricators to whom we also act as a supplier of equipment, including heat exchangers and cold boxes.

Industrial Gas Applications

For industrial gas applications, our brazed aluminum heat exchangers and cold boxes are used to produce high purity atmospheric gases, such as oxygen, nitrogen, and argon, which have diverse industrial applications. Cold boxes are used to separate air into its major atmospheric components, including oxygen, nitrogen, and argon, where the gases are used in a diverse range of applications such as metal production and heat treating, enhanced oil and gas production, coal gasification, chemical and oil refining, electronics, medical, the quick-freezing of food, wastewater treatment, and industrial welding. Our brazed aluminum heat exchangers and cold boxes are also used in the purification of helium and hydrogen.

Demand for industrial gas applications is driven by growth in manufacturing and industrial gas use. Other key global drivers involve developing Gas to Liquids, or GTL, clean coal processes including Coal to Liquids, or CTL, and Integrated Gasification Combined Cycle, or IGCC, power projects. In addition, demand for our products in developed countries is expected to continue as customers upgrade their facilities for greater efficiency and regulatory compliance. We have a number of competitors for these applications, including leading industrial gas companies and EPC firms, to whom we also act as a supplier of equipment, including heat exchangers and cold boxes.

After Market Services

To support the products and solutions we sell, our Lifecycle group offers services through the entire lifecycle of our products, which is unique and unparalleled in the markets we serve. Our focus is to build relationships with plant stakeholders, from process and mechanical engineers to operations and maintenance personnel, focusing on the optimized performance and lifespan of Chart proprietary equipment. Lifecycle services include extended warranties, plant start-up, parts, 24/7 support, monitoring and process optimization, as well as repair, maintenance, and upgrades. We perform plant services on equipment, including brazed aluminum heat exchangers, air cooled heat exchangers, cold boxes, etc.

Distribution & Storage Segment

D&S (58% of sales for the year ended December 31, 2016) designs, manufactures, and services cryogenic solutions for the storage and delivery of cryogenic liquids used in industrial gas and LNG applications. Using sophisticated vacuum insulation technology, our cryogenic storage systems are able to store and transport liquefied industrial gases and hydrocarbon gases at temperatures from 0° Fahrenheit to temperatures nearing absolute zero. End-use customers for our cryogenic storage equipment include industrial gas producers and distributors, chemical producers, manufacturers of electrical components, health care organizations, food processors, and businesses in the oil and natural gas industries. Cryogenic bulk storage systems accounted for 17.3%, 15.0%, and 12.7% of consolidated sales for the years ended December 31, 2016, 2015, and 2014, respectively. Cryogenic packaged gas systems accounted for 17.7%, 15.3%, and 13.4% of consolidated sales for the years ended December 31, 2016, 2015, and 2014, respectively. We service industrial gas and LNG applications as follows:

Industrial Gas Applications

We design, manufacture, install, service, and maintain bulk and packaged gas cryogenic solutions for the storage, distribution, vaporization, and application of industrial gases, which accounted for 45.1%, 35.7%, and 30.9% of consolidated sales for the years ended December 31, 2016, 2015, and 2014, respectively. Industrial gas applications include any end-use of the major elements

of air (nitrogen, oxygen, and argon), including manufacturing, welding, electronics, medical, nitrogen dosing, food processing, and beverage carbonation. Carbon dioxide, nitrous oxide, hydrogen, and helium applications also utilize our equipment. Our products span the entire spectrum of industrial gas demand from small customers requiring cryogenic packaged gases to large users requiring custom engineered cryogenic storage systems in both mobile and stationary applications. We also offer cryogenic components, including vacuum insulated pipe (“VIP”), engineered bulk gas installations, specialty liquid nitrogen, or LN2, end-use equipment, and cryogenic flow meters. Principal customers for industrial applications are global industrial gas producers and distributors.

Demand for industrial gas applications is driven primarily by the significant installed base of users of cryogenic liquids, as well as new applications and distribution technologies for cryogenic liquids. Our competitors tend to be regionally focused while we are able to supply a broad range of systems on a worldwide basis. We also compete with several suppliers owned by the global industrial gas producers. From a technology perspective, we tend to compete with compressed gas alternatives or on-site generated gas supply.

LNG Applications

We supply cryogenic solutions for the storage, distribution, regasification, and use of LNG, which accounted for 12.8%, 11.1%, and 17.6% of consolidated sales for the years ended December 31, 2016, 2015, and 2014, respectively. LNG may be utilized as an alternative to other fossil fuels such as diesel, propane, or fuel oil in transportation or off pipeline applications. Examples include heavy duty truck and transit bus transportation, locomotive propulsion, marine, and power generation in remote areas that often occurs in oil and gas drilling. We refer to our LNG distribution products as a “Virtual Pipeline,” as the traditional natural gas pipeline is replaced with cryogenic distribution to deliver the gas to the end-user. We supply cryogenic trailers, ISO containers, railcars, bulk storage tanks, fuel stations, loading facilities, and regasification equipment specially configured for delivering LNG into Virtual Pipeline applications. LNG may also be used as a fuel for a variety of on and off-road vehicles and applications. Our LNG vehicle fueling applications primarily consist of LNG and liquefied/compressed natural gas refueling systems for heavy-duty truck and bus fleets. We sell LNG applications around the world from various D&S facilities to numerous end-users, energy companies, and gas distributors. Additionally, we supply large vacuum insulated storage tanks as equipment for purchasers of standard liquefaction plants sold by our E&C business.

Demand for LNG applications is driven by the spread in price between oil and gas, diesel displacement initiatives, environmental and energy security initiatives, and the associated cost of equipment. Our competitors tend to be regionally focused or product-specific, while we are able to supply a broad range of solutions required by LNG applications. We compete with compressed natural gas (or CNG) or field gas in several of these applications and LNG is most highly valued where its energy density and purity are beneficial to the end-user.

After Market Services

D&S operates multiple service locations in the United States, China, and Europe. These service locations provide installation, service, repair, maintenance, and refurbishment of cryogenic products. We service Chart products, as well as our competitors throughout the world. We provide services for storage vessels, VIP, reconfigurations, relocation, trailers, ISO containers, vaporizers, and other gas to liquid equipment.

BioMedical Segment

BioMedical (24% of sales for the year ended December 31, 2016) consists of various product lines built around our core competencies in cryogenics, vacuum insulation, low temperature storage, and pressure swing adsorption gas generation, with a focus on the respiratory and biological users of the liquids and gases instead of the large producers and distributors of cryogenic liquids. Applications in the BioMedical segment include the following:

Respiratory Therapy

Respiratory therapy products accounted for 13.8%, 12.7%, and 11.8% of consolidated sales for the years ended December 31, 2016, 2015, and 2014, respectively. Our respiratory oxygen product line is comprised of a range of medical respiratory products, including liquid oxygen systems and stationary, transportable, and portable oxygen concentrators, all of which are used primarily for in-home supplemental oxygen treatment of patients with chronic obstructive pulmonary diseases, such as bronchitis, emphysema, and asthma.

We believe that competition for our respiratory products is based primarily upon product quality, performance, reliability, ease-of-use and price, which we focus our marketing strategies on these considerations. Furthermore, competition also includes the impact of other modalities in the broader respiratory industry.

Life Sciences

Our life science products include vacuum insulated containment vessels for the storage of biological materials. The primary applications for this product line include medical laboratories, biotech/pharmaceutical research facilities, blood and tissue banks, veterinary laboratories, large-scale repositories, and artificial insemination, particularly in the beef and dairy industry.

The significant competitors for life science products include a number of companies worldwide. These products are sold through multiple channels of distribution specifically applicable to each industry sector. The distribution channels range from highly specialized cryogenic storage systems providers to general supply and catalogue distribution operations and breeding service providers. Competition in this field is focused on design, reliability, and price. Alternatives to vacuum insulated containment vessels include electrically powered mechanical refrigeration.

Commercial Oxygen and Nitrogen Generation

Our commercial oxygen and nitrogen generation products include self-contained generators, standard generators, and packaged systems for industrial and medical oxygen and nitrogen generating systems. These generators produce oxygen or nitrogen from compressed air and provide an efficient and cost-effective alternative to the procurement of oxygen or nitrogen from third party cylinder or liquid suppliers. Applications include mining operations, industrial plants, ozone generation, hospital medical oxygen, and wastewater treatment, among other commercial or military applications. Management expects demand for this product line to increase over the long-term with competition focused on design, reliability, and price.

Domestic and Foreign Operations

Financial and other information regarding domestic and foreign operations is located in Note 20 of the notes to the Company's consolidated financial statements included in Item 8 of this Annual Report on Form 10-K. Additional information regarding risks attendant to foreign operations is set forth in Item 7A of this Annual Report on Form 10-K under the caption "Quantitative and Qualitative Disclosures About Market Risk" and Item 7 under the caption "Management's Discussion and Analysis of Financial Condition and Results of Operations."

Engineering and Product Development

Our engineering and product development activities are focused primarily on developing new and improved solutions and equipment for the users of cryogenic liquids and hydrocarbon and industrial gases across all industries served. Our engineering, technical and marketing employees actively assist customers in specifying their needs and in determining appropriate products to meet those needs. Portions of our engineering expenditures typically are charged to customers, either as separate items or as components of product cost.

Competition

We believe we can compete effectively around the world and that we are a leading competitor in the industries we serve. Competition is based primarily on performance and the ability to provide the design, engineering, and manufacturing capabilities required in a timely and cost-efficient manner. Contracts are usually awarded on a competitive bid basis. Quality, technical expertise, and timeliness of delivery are the principal competitive factors within the industries we serve. Price and terms of sale are also important competitive factors. Because our equipment is specialized and independent third-party prepared market share data is not available, it is difficult to know for certain our exact position in our markets, although we believe we rank among the leaders in each of the markets we serve. We base our statements about industry and market positions on our reviews of annual reports and published investor presentations of our competitors and augment this data with information received by marketing consultants conducting competition interviews and our sales force and field contacts. For information concerning competition within a specific segment of the Company's business, see the descriptions provided under segment captions in this Annual Report on Form 10-K.

Marketing

We market our products and services in each of our segments throughout the world primarily through direct sales personnel and independent sales representatives and distributors. The technical and custom design nature of our products requires a professional, highly trained sales force. We use independent sales representatives and distributors to market our products and services in certain foreign countries and in certain North American regions. These independent sales representatives supplement our direct sales force in dealing with language and cultural matters. Our domestic and foreign independent sales representatives earn commissions on sales, which vary by product type.

Backlog

The dollar amount of our backlog as of December 31, 2016, 2015, and 2014 was \$342.6 million, \$374.6 million, and \$640.1 million, respectively. Approximately 16.8% of the December 31, 2016 backlog is expected to be filled beyond 2017. Backlog is comprised of the portion of firm signed purchase orders or other written contractual commitments received from customers that we have not recognized as revenue under the percentage of completion method or based upon shipment. Backlog can be significantly affected by the timing of orders for large products, particularly in the E&C segment, and the amount of backlog at December 31, 2016 described above is not necessarily indicative of future backlog levels or the rate at which backlog will be recognized as sales. Orders included in our backlog may include customary cancellation provisions under which the customer could cancel all or part of the order, potentially subject to the payment of certain costs and/or penalties. For further information about our backlog, including backlog by business segment, see Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations."

Customers

We sell our products primarily to gas producers, distributors, and end-users across energy, industry, life sciences, and respiratory healthcare applications in countries throughout the world. Sales to our top ten customers accounted for 38%, 36%, and 34% of consolidated sales in 2016, 2015, and 2014, respectively. One customer, Airgas "an Air Liquide company" and Air Liquide, exceeded 10% of consolidated sales in 2016. Sales revenue from this customer represented approximately \$98.9 million or 11.5% of total consolidated sales revenue and is primarily attributable to the D&S segment, along with the BioMedical and E&C segments. No customer exceeded 10% of consolidated sales in 2015 or 2014.

Our sales to particular customers fluctuate from period to period, but the global producers and distributors of hydrocarbon and industrial gases and their suppliers tend to be a consistently large source of revenue for us. Our supply contracts are generally contracts for "requirements" only. While our customers may be obligated to purchase a certain percentage of their supplies from us, there are generally no minimum requirements. Also, many of our contracts may be canceled at any time, subject to possible cancellation charges. To minimize credit risk from trade receivables, we review the financial condition of potential customers in relation to established credit requirements before sales credit is extended and we monitor the financial condition of customers to help ensure timely collections and to minimize losses. In addition, for certain domestic and foreign customers, particularly in the D&S and E&C segments, we require advance payments, letters of credit, bankers' acceptances, and other such guarantees of payment. Certain customers also require us to issue letters of credit or performance bonds, particularly in instances where advance payments are involved, as a condition to placing the order. We believe our relationships with our customers are generally good.

Intellectual Property

Although we have a number of patents, trademarks, and licenses related to our business, no one of them or related group of them is considered by us to be of such importance that its expiration or termination would have a material adverse effect on our business. In general, we depend upon technological capabilities, manufacturing quality control, and application of know-how, rather than patents or other proprietary rights, in the conduct of our business.

Raw Materials and Suppliers

We manufacture most of the products we sell. The raw materials used in manufacturing include aluminum products (including sheets, bars, plate, and piping), stainless steel products (including sheets, plates, heads, and piping), palladium oxide, carbon steel products (including sheets, plates, and heads), valves and gauges, and fabricated metal components. Most raw materials are available from multiple sources of supply. We believe our relationships with our raw material suppliers and other vendors are generally good. Commodity components of our raw material (stainless steel and carbon steel) could experience some level of volatility during 2017 and may have a relational impact on raw material pricing. Subject to certain risks related to our suppliers as discussed under Item 1A. "Risk Factors," we foresee no acute shortages of any raw materials that would have a material adverse effect on our operations.

Employees

As of January 31, 2017, we had 4,050 employees, including 2,065 domestic employees and 1,985 international employees.

We are party to one collective bargaining agreement with the International Association of Machinists and Aerospace Workers ("IAM") covering 158 employees at our La Crosse, Wisconsin heat exchanger facility. Effective February 3, 2013, we entered into a five-year agreement with the IAM which expires on February 3, 2018. We have already executed a successor agreement with our unionized employees through 2023, which will replace the collective bargaining agreement that expires in February 2018.

Environmental Matters

Our operations have historically included and currently include the handling and use of hazardous and other regulated substances, such as various cleaning fluids used to remove grease from metal, that are subject to federal, state, local, and foreign environmental laws and regulations. These regulations impose limitations on the discharge of pollutants into the soil, air, and water and establish standards for their handling, management, use, storage, and disposal. We monitor and review our procedures and policies for compliance with environmental laws and regulations. Our management is familiar with these regulations and supports an ongoing program to maintain our adherence to required standards.

We are involved with environmental compliance, investigation, monitoring, and remediation activities at certain of our owned or formerly owned manufacturing facilities and at one owned facility that is leased to a third party. We believe that we are currently in substantial compliance with all known environmental regulations. We accrue for certain environmental remediation-related activities for which commitments or remediation plans have been developed or for which costs can be reasonably estimated. These estimates are determined based upon currently available facts regarding each facility. Actual costs incurred may vary from these estimates due to the inherent uncertainties involved. Future expenditures relating to these environmental remediation efforts are expected to be made over the next 12 years as ongoing costs of remediation programs. We do not believe that these regulatory requirements have had a material effect upon our capital expenditures, earnings, or competitive position. We are not anticipating any material capital expenditures in 2017 that are directly related to regulatory compliance matters. Although we believe we have adequately provided for the cost of all known environmental conditions, additional contamination, the outcome of disputed matters, or changes in regulatory posture could result in more costly remediation measures than budgeted, or those we believe are adequate or required by existing law. We believe that any additional liability in excess of amounts accrued which may result from the resolution of such matters will not have a material adverse effect on our financial position, liquidity, cash flows, or results of operations.

Available Information

Additional information about the Company is available at www.chartindustries.com. On the Investor Relations page of the website, the public may obtain free copies of the Company's Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and any amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 as soon as reasonably practicable following the time that they are filed with, or furnished to, the Securities and Exchange Commission ("SEC"). Additionally, the Company has posted its Code of Ethical Business Conduct and Officer Code of Ethics on its website, which are also available free of charge to any shareholder interested in obtaining a copy. This Form 10-K and reports filed with the SEC are also accessible through the SEC's website at www.sec.gov. References to our website or the SEC's website do not constitute incorporation by reference of the information contained on such websites, and such information is not part of this Form 10-K.

Item 1A. Risk Factors

Investing in our common stock involves risk. You should carefully consider the risks described below, as well as the other information contained in this Annual Report on Form 10-K in evaluating your investment in us. If any of the following risks actually occur, our business, financial condition, operating results, or cash flows could be harmed materially. Additional risks, uncertainties, and other factors that are not currently known to us or that we believe are not currently material may also adversely affect our business, financial condition, operating results or cash flows. In any of these cases, you may lose all or part of your investment in us.

Risks Related to Our Business

The markets we serve are subject to cyclical demand and vulnerable to economic downturn, which could harm our business and make it difficult to project long-term performance.

Demand for our products depends in large part upon the level of capital and maintenance expenditures by many of our customers and end-users, in particular those customers in the global hydrocarbon and industrial gas markets. These customers' expenditures historically have been cyclical in nature and vulnerable to economic downturns. Decreased capital and maintenance spending by these customers could have a material adverse effect on the demand for our products and our business, financial condition, and results of operations. In addition, this historically cyclical demand limits our ability to make accurate long-term predictions about the performance of our company. Even if demand improves, it is difficult to predict whether any improvement represents a long-term improving trend or the extent or timing of improvement. There can be no assurance that historically improving cycles are representative of actual future demand.

While we experienced growth in demand from 2003 until mid-2008 in the global hydrocarbon and industrial gas markets, we experienced a significant decline in orders from mid-2008 until mid-2009. Although there was improvement in orders for our businesses, particularly in 2011 through 2013, we have experienced a substantial decline since 2014 in hydrocarbon demand with

the decline in energy prices. Although energy prices have recovered somewhat, we cannot predict whether business performance may be better or worse in the future or whether and to what extent energy prices will continue to recover.

The loss of, or significant reduction or delay in, purchases by our largest customers could reduce our sales and profitability.

A small number of customers has accounted for a substantial portion of our historical net sales. For example, sales to our top ten customers accounted for 38%, 36%, and 34% of consolidated sales in 2016, 2015, and 2014, respectively, with sales to one customer approximately 11.5% of consolidated sales revenue in 2016. We expect that a limited number of customers will continue to represent a substantial portion of our sales for the foreseeable future. While our sales to particular customers fluctuate from period to period, the global producers and distributors of hydrocarbon and industrial gases and their suppliers tend to be a consistently large source of our sales.

The loss of any of our major customers, consolidation of our customers, or a decrease or delay in orders or anticipated spending by such customers could materially reduce our sales and profitability. We did experience several delays in customer orders during 2016 given continued energy price volatility and our customers' adjusted project timing as a result. Continued delays in the anticipated timing of LNG infrastructure build out could materially reduce the demand for our products. Our largest customers could also engage in business combinations, which could increase their size, reduce their demand for our products as they recognize synergies or rationalize assets and increase or decrease the portion of our total sales concentration to any single customer. For example, two of our largest customers, Airgas and Air Liquide, combined during 2016. Further industry consolidation, such as the pending Linde and Praxair merger, could further exacerbate our customer concentration risk.

If we are unable to successfully control our costs and efficiently manage our operations, it may place a significant strain on our management and administrative resources and lead to increased costs and reduced profitability.

We have implemented cost savings initiatives to align our business with current and expected economic conditions. Our ability to operate our business successfully and implement our strategies depends, in part, on our ability to allocate our resources optimally in each of our facilities in order to maintain efficient operations. Ineffective management could cause manufacturing inefficiencies, increase our operating costs, place significant strain on our management and administrative resources, and prevent us from being able to take advantage of opportunities as economic conditions improve. If we are unable to align our cost structure in response to prevailing economic conditions on a timely basis, or if implementation or failure to implement any cost structure adjustments has an adverse impact on our business or prospects, then our financial condition, results of operations, and cash flows may be negatively affected.

Similarly, it is critical that we appropriately manage our planned capital expenditures in this challenging economic environment. For example, we have invested or plan to invest approximately \$35 to \$45 million in new capital expenditures in 2017. If we fail to manage the projects related to these capital expenditures in an effective manner, we may lose the opportunity to obtain some new customer orders or the ability to operate our businesses efficiently. Even if we effectively implement these projects, the orders needed to support the capital expenditure may not be obtained, may be delayed, or may be less than expected, which may result in sales or profitability at lower levels than anticipated. For example, while we invested in the expansion of our D&S segment in China in recent years, we have experienced significant delays in some of the related orders anticipated to support that expansion, which has resulted in the underutilization of our capacity in China.

Decreases in energy prices, or a decrease in the cost of oil relative to natural gas, may decrease demand for some of our products and cause downward pressure on the prices we charge, which could harm our business, financial condition, and results of operations.

A significant amount of our sales are to customers in the energy production and supply industry. We estimate that 30% of our sales for the year ended December 31, 2016 were generated by end-users in the energy industry, with many of our products sold for natural gas-related applications. Accordingly, demand for a significant portion of our products depends upon the level of capital expenditures by companies in the oil and gas industry, which depends, in part, on energy prices, as well as the price of oil relative to natural gas for some applications. Some applications for our products could see greater demand when prices for natural gas are relatively low compared to oil prices, but a sustained decline in energy prices generally and a resultant downturn in energy production activities could negatively affect the capital expenditures of our customers. For example, the sharp decline in oil prices since the fourth quarter of 2014 has had a negative impact on demand for some of our products. Although prices have recovered somewhat from recent lows, any further deterioration and significant decline in the capital expenditures of our customers, whether due to a decrease in the market price of energy or otherwise, may decrease demand for our products and cause downward pressure on the prices we charge. Accordingly, if there is a continued or further downturn in the energy production and supply industry, including a decline in the cost of oil relative to natural gas, our business, financial condition, and results of operations could be adversely affected.

We may be unable to compete successfully in the highly competitive markets in which we operate.

Although many of our products serve niche industry areas, a number of our direct and indirect competitors in these areas are major corporations, some of which have substantially greater technical, financial, and marketing resources than Chart, and other competitors enter these areas from time to time. Any increase in competition may cause us to lose market share or compel us to reduce prices to remain competitive, which could result in reduced sales and earnings. We compete with several suppliers owned by global industrial gas producers or large industrial companies and many smaller fabrication-only facilities around the world. Increased competition with these companies could prevent the institution of price increases or could require price reductions or increased spending on research and development and marketing and sales, any of which could materially reduce our sales, profitability, or both. Moreover, during an industry downturn, competition in some of the product lines we serve increases as a result of over-capacity, which may result in downward pricing pressure. Further, customers who typically outsource their need for cryogenic systems to us may use their excess capacity to produce such systems themselves. We also compete in the sale of a limited number of products with certain of our major customers. If we are unable to compete successfully, our results of operations, cash flows, and financial condition could be negatively affected.

Federal, state, and local legislative and regulatory initiatives relating to hydraulic fracturing and the potential for related regulatory action or litigation could result in increased costs and additional operating restrictions or delays for our customers, which could negatively impact our business, financial condition, and results of operations.

We supply equipment to companies that process, transport, and utilize natural gas, many of which benefit from increased natural gas production resulting from hydraulic fracturing in the oil and natural gas industry. As a result, increased regulation of hydraulic fracturing may adversely impact our business, financial condition, and results of operations. If additional levels of regulation are implemented with respect to hydraulic fracturing, it may make it more difficult to complete natural gas wells in shale formations and discourage exploration of new wells. This could increase our customers' costs of compliance and doing business or otherwise adversely affect the hydraulic fracturing services they perform, which may negatively impact natural gas production and demand for our equipment used in the natural gas industry.

In addition, heightened political, regulatory, and public scrutiny of hydraulic fracturing practices could potentially expose our customers to increased legal and regulatory proceedings, which could negatively impact natural gas production and demand for our equipment used in the natural gas industry. Any such developments could have a material adverse effect on our business, financial condition, and results of operations, whether directly or indirectly.

We carry goodwill and indefinite-lived intangible assets on our balance sheet, which are subject to impairment testing and could subject us to significant non-cash charges to earnings in the future if impairment occurs.

As of December 31, 2016, we had goodwill and indefinite-lived intangible assets of \$253.6 million, which represented approximately 20.6% of our total assets. Goodwill and indefinite-lived intangible assets are not amortized, but are tested for impairment annually in the fourth quarter or more often if events or changes in circumstances indicate a potential impairment may exist. Factors that could indicate that our goodwill or indefinite-lived intangible assets are impaired include a decline in stock price and market capitalization, lower than projected operating results and cash flows, and slower growth rates in our industry. Our stock price historically has shown volatility and often fluctuates significantly in response to market and other factors. Declines in our stock price, lower operating results and any decline in industry conditions in the future could increase the risk of impairment. Impairment testing incorporates our estimates of future operating results and cash flows, estimates of allocations of certain assets and cash flows among reporting segments, estimates of future growth rates, and our judgment regarding the applicable discount rates used on estimated operating results and cash flows. For example, as a result of our impairment analyses, we recorded an impairment charge related to goodwill and indefinite-lived intangible assets of \$207.7 million during the fourth quarter of 2015. During 2016, there were no further goodwill and indefinite-lived intangible asset impairment charges. If we determine that further impairment exists, it may result in a significant non-cash charge to earnings and lower stockholders' equity.

Our backlog is subject to modification, termination or reduction of orders, which could negatively impact our sales.

Our backlog is comprised of the portion of firm signed purchase orders or other written contractual commitments received from customers that we have not recognized as sales. The dollar amount of backlog as of December 31, 2016 was \$342.6 million. Our backlog can be significantly affected by the timing of orders for large projects, particularly in our E&C segment, and the amount of our backlog at December 31, 2016 is not necessarily indicative of future backlog levels or the rate at which backlog will be recognized as sales. Although modifications and terminations of our orders may be partially offset by cancellation fees, customers can, and sometimes do, terminate or modify these orders. We cannot predict whether cancellations will accelerate or diminish in the future. Cancellations of purchase orders, indications that the customers will not perform or reductions of product quantities in existing contracts could substantially and materially reduce our backlog and, consequently, our future sales. For example, during 2015, D&S segment backlog was reduced by approximately \$150.0 million when circumstances suggested that our customers were not likely to take delivery in the future. Our failure to replace canceled orders could negatively impact our

sales and results of operations. Included in the E&C backlog is approximately \$40 million related to the previously announced Magnolia LNG order where production release is delayed into 2018.

We may fail to successfully acquire or integrate companies that provide complementary products or technologies.

A component of our business strategy is the acquisition of businesses that complement our existing products and services. Such a strategy involves the potential risks inherent in assessing the value, strengths, weaknesses, contingent or other liabilities, and potential profitability of acquisition candidates and in integrating the operations of acquired companies. In addition, any acquisitions of businesses with foreign operations or sales may increase our exposure to risks inherent in doing business outside the United States.

From time to time, we may have acquisition discussions with potential target companies both domestically and internationally. If a large acquisition opportunity arises and we proceed, a substantial portion of our cash and surplus borrowing capacity could be used for the acquisition or we may seek additional debt or equity financing.

Potential acquisition opportunities become available to us from time to time, and we periodically engage in discussions or negotiations relating to potential acquisitions, including acquisitions that may be material in size or scope to our business. Any acquisition may or may not occur and, if an acquisition does occur, it may not be successful in enhancing our business for one or more of the following reasons:

- Any business acquired may not be integrated successfully and may not prove profitable;
- The price we pay for any business acquired may overstate the value of that business or otherwise be too high;
- Liabilities we take on through the acquisition may prove to be higher than we expected;
- We may fail to achieve acquisition synergies; or
- The focus on the integration of operations of acquired entities may divert management's attention from the day-to-day operation of our businesses.

Inherent in any future acquisition is the risk of transitioning company cultures and facilities. The failure to efficiently and effectively achieve such transitions could increase our costs and decrease our profitability.

Governmental energy policies could change or expected changes could fail to materialize which could adversely affect our business or prospects.

Energy policy can develop rapidly in the markets we serve, including the United States, Europe, and China. Within the last few years, significant developments have taken place, primarily in international markets that we serve with respect to energy policy and related regulations. We anticipate that energy policy will continue to be an important regulatory priority globally, as well as on a national, state, and local level. As energy policy continues to evolve, the existing rules and incentives that impact the energy-related segments of our business may change. It is difficult, if not impossible, to predict whether changes in energy policy might occur in the future and the timing of potential changes and their impact on our business. The elimination or reduction of favorable policies for our energy-related business, or the failure to adopt expected policies that would benefit our business, could negatively impact our sales and profitability.

Our exposure to fixed-price contracts, including exposure to fixed pricing on long-term customer contracts and performance guarantees, could negatively impact our financial results.

A substantial portion of our sales has historically been derived from fixed-price contracts for large system projects which may involve long-term fixed price commitments to customers or guarantees of equipment or process performance and which are sometimes difficult to execute. To the extent that any of our fixed-price contracts are delayed, we fail to satisfy a performance guarantee, our subcontractors fail to perform, contract counterparties successfully assert claims against us, the original cost estimates in these or other contracts prove to be inaccurate or the contracts do not permit us to pass increased costs on to our customers, profitability from a particular contract may decrease or project losses may be incurred, which, in turn, could decrease our sales and overall profitability. The uncertainties associated with our fixed-price contracts make it more difficult to predict our future results and exacerbate the risk that our results will not match expectations, which has happened in the past.

Downturns in economic and financial conditions have had and may have in the future a negative effect on our business, financial condition, and results of operations.

Demand for our products depends in large part upon the level of capital and maintenance expenditures by many of our customers and end-users. A downturn in economic conditions in industries in which we operate may reduce the willingness or ability of our customers and prospective customers to commit funds to purchase our products and services and may reduce their ability to pay for our products and services after purchase. Economic conditions that could impact our business include, but are

not limited to, decreased energy prices, recessionary conditions, slow or negative economic growth rates, the impact of state and sovereign debt defaults or the impact of governmental budgetary pressures. Similarly, our suppliers may not be able to supply us with needed raw materials or components on a timely basis, may increase prices or go out of business, which could result in our inability to meet customer demand, fulfill our contractual obligations or could affect our gross margins. See “We depend on the availability of certain key suppliers; if we experience difficulty with a supplier, we may have difficulty finding alternative sources of supply” below. We cannot predict the timing or duration of negative market conditions. If the economy or industries in which we operate deteriorate or financial markets weaken, our business, financial condition, and results of operations could be adversely impacted.

We depend on the availability of certain key suppliers; if we experience difficulty with a supplier, we may have difficulty finding alternative sources of supply.

The cost, quality, and availability of raw materials, certain specialty metals and specialized components used to manufacture our products are critical to our success. The materials and components we use to manufacture our products are sometimes custom made and may be available only from a few suppliers, and the lead times required to obtain these materials and components can often be significant. We rely on sole suppliers or a limited number of suppliers for some of these materials, including special grades of aluminum used in our brazed aluminum heat exchangers and compressors included in some of our product offerings. While we have not historically encountered problems with availability, this does not mean that we will continue to have timely access to adequate supplies of essential materials and components in the future or that supplies of these materials and components will be available on satisfactory terms when needed. If our vendors for these materials and components are unable to meet our requirements, fail to make shipments in a timely manner, or ship defective materials or components, we could experience a shortage or delay in supply or fail to meet our contractual requirements, which would adversely affect our results of operations and negatively impact our cash flow and profitability.

Health care reform or other changes in government and other third-party payor reimbursement levels and practices could negatively impact our sales and profitability.

Many of our BioMedical segment’s customers are reimbursed for products and services by third-party payors, such as government programs, including Medicare and Medicaid, private insurance plans and managed care programs in the U.S., and by similar programs and entities in the other countries in which we operate or sell our equipment.

In March 2010, the Affordable Care Act was adopted in the U.S. The law includes provisions that, among other things, reduce and/or limit Medicare reimbursement, require all individuals to have health insurance (with limited exceptions) and impose new and/or increased taxes. In addition, the Affordable Care Act requires the Centers for Medicare & Medicaid Services (“CMS”), the agency responsible for administering the Medicare program, to nationalize a competitive bidding process or adjust the prices in non-competitive bidding areas to match competitive bidding prices.

CMS has since implemented a number of payment rules that reduced Medicare payments for oxygen and oxygen equipment. Under the competitive bidding program, CMS selected contract suppliers that agreed to receive as payment the “single payment amount” calculated by CMS in certain geographic regions. In January 2011, round one of competitive bidding significantly reduced the number of homecare oxygen suppliers able to participate in the Medicare program in 91 U.S. Metropolitan Statistical Areas (“MSA”). Round two of competitive bidding was implemented in July 2013 in 91 U.S. MSAs, further decreasing the number of oxygen suppliers. In October 2014, CMS set rules to adjust the fee schedule amounts for the remaining un-bid areas to match bid areas based on regional averages, which were applied partially from January 1, 2016 to June 30, 2016 and fully implemented by July 1, 2016.

There remains a significant amount of uncertainty regarding healthcare reform and the effect of competitive bidding on the durable medical equipment industry. The potential impact of new and changing policies on the demand for our products or the prices at which we sell our products could have a material adverse effect on our business, results of operations, and/or financial condition.

Due to the nature of our business and products, we may be liable for damages based on product liability and warranty claims.

Due to the high pressures and low temperatures at which many of our products are used, the inherent risks associated with concentrated industrial and hydrocarbon gases, and the fact that some of our products are relied upon by our customers or end users in their facilities or operations or are manufactured for relatively broad industrial, medical, transportation, or consumer use, we face an inherent risk of exposure to claims in the event that the failure, use, or misuse of our products results, or is alleged to result, in death, bodily injury, property damage, or economic loss. We believe that we meet or exceed existing professional specification standards recognized or required in the industries in which we operate. We are subject to claims from time to time,

some of which are substantial, including a claim settled in 2015 involving property damage and economic loss where the amount claimed exceeded \$100 million, and we may be subject to claims in the future. Although we currently maintain product liability coverage, which we believe is adequate, it includes customary exclusions and conditions, it may not cover certain specialized applications such as aerospace-related applications, and it generally does not cover warranty claims. Additionally, such insurance may become difficult to obtain or be unobtainable in the future on terms acceptable to us. A successful product liability claim or series of claims against us, including one or more consumer claims purporting to constitute class actions or claims resulting from extraordinary loss events, in excess of or outside our insurance coverage, or a significant warranty claim or series of claims against us, could materially decrease our liquidity, impair our financial condition, and adversely affect our results of operations.

Fluctuations in exchange and interest rates may affect our operating results and impact our financial condition.

Fluctuations in the value of the U.S. dollar may increase or decrease our sales or earnings. Because our consolidated financial results are reported in U.S. dollars, if we generate sales or earnings in other currencies, the translation of those results into U.S. dollars can result in a significant increase or decrease in the amount of those sales or earnings. We also bid for certain foreign projects in U.S. dollars or euros. If the U.S. dollar or euro strengthens relative to the value of the local currency, we may be less competitive on those projects. In addition, our debt service requirements are primarily in U.S. dollars and a portion of our cash flow is generated in euros or other foreign currencies. Significant changes in the value of the foreign currencies relative to the U.S. dollar could impair our cash flow and financial condition.

In addition, fluctuations in currencies relative to the U.S. dollar may make it more difficult to perform period-to-period comparisons of our reported results of operations. For purposes of accounting, the assets and liabilities of our foreign operations, where the local currency is the functional currency, are translated using period-end exchange rates, and the revenues and expenses of our foreign operations are translated using average exchange rates during each period. For example, we have material euro-denominated net monetary assets and liabilities. If economic circumstances result in a significant devaluation of the euro, the value of our euro-denominated net monetary assets and liabilities would be correspondingly reduced when translated into U.S. dollars for inclusion in our financial statements. Similarly, the re-introduction of certain individual country currencies or the complete dissolution of the euro, could adversely affect the value of our euro-denominated net monetary assets and liabilities. In either case, our business, results of operations, financial condition, and liquidity could be materially adversely affected.

In addition to currency translation risks, we incur currency transaction risk whenever we or one of our subsidiaries enters into either a purchase or a sales transaction using a currency other than the functional currency of the transacting entity. Given the volatility of exchange rates, we may not be able to effectively manage our currency and/or translation risks. Volatility in currency exchange rates may decrease our sales and profitability and impair our financial condition. We have purchased and may continue to purchase foreign currency forward contracts to manage the risk of adverse currency fluctuations and if the contracts are inconsistent with currency trends we could experience exposure related to foreign currency fluctuations.

We are also exposed to general interest rate risk. If interest rates increase, our interest expense could increase significantly, affecting earnings and reducing cash flow available for working capital, capital expenditures, acquisitions, and other purposes. In addition, changes by any rating agency to our outlook or credit ratings could increase our cost of borrowing.

If we lose our key employees, our business may be adversely affected.

Our ability to successfully operate and grow our business and implement our strategies is largely dependent on the efforts, abilities, and services of our key employees. Our future success will also depend on, among other factors, our ability to attract and retain qualified personnel, such as engineers and other skilled labor, either through direct hiring or the acquisition of other businesses employing such professionals. Our products, many of which are highly engineered, represent specialized applications of cryogenic, low temperature or gas processing technologies and know-how; and, many of the markets we serve represent niche markets for these specialized applications. Accordingly, we rely heavily on engineers, salespersons, business unit leaders, senior management, and other key employees who have experience in these specialized applications and are knowledgeable about these niche markets, our products, and our company. Additionally, we may modify our management structure from time to time or substantially reduce our overall workforce as we have done during the recent downturn in our business, which may create marketing, operational, and other business risks. The loss of the services of these senior managers or other key employees, the failure to attract or retain other qualified personnel, or the failure to effectively transition certain management functions and roles associated with the announced management succession plans could reduce the competitiveness of our business or otherwise impair our business prospects.

As a global business, we are exposed to economic, political, and other risks in different countries which could materially reduce our sales, profitability or cash flows, or materially increase our liabilities.

Since we manufacture and sell our products worldwide, our business is subject to risks associated with doing business internationally. In 2016, 2015, and 2014, 50%, 51%, and 53%, respectively, of our sales occurred in international markets. Our future results could be harmed by a variety of factors, including:

- changes in foreign currency exchange rates;
- exchange controls and currency restrictions;
- changes in a specific country's or region's political, social or economic conditions, particularly in emerging markets;
- civil unrest, turmoil or outbreak of disease in any of the countries in which we operate or sell our products;
- tariffs, other trade protection measures and import or export licensing requirements;
- potentially negative consequences from changes in U.S. and international tax laws;
- difficulty in staffing and managing geographically widespread operations;
- differing labor regulations;
- requirements relating to withholding taxes on remittances and other payments by subsidiaries;
- different regulatory regimes controlling the protection of our intellectual property;
- restrictions on our ability to own or operate subsidiaries, make investments or acquire new businesses in these jurisdictions;
- restrictions on our ability to repatriate dividends from our foreign subsidiaries;
- difficulty in collecting international accounts receivable;
- difficulty in enforcement of contractual obligations under non-U.S. law;
- transportation delays or interruptions;
- changes in regulatory requirements; and
- the burden of complying with multiple and potentially conflicting laws.

Our international operations and sales also expose us to different local political and business risks and challenges. For example, we are faced with potential difficulties in staffing and managing local operations and we have to design local solutions to manage credit and legal risks of local customers and distributors, which may not be effective. In addition, because some of our international sales are to suppliers that perform work for foreign governments, we are subject to the political risks associated with foreign government projects. For example, certain foreign governments may require suppliers for a project to obtain products solely from local manufacturers or may prohibit the use of products manufactured in certain countries.

Our operations in markets such as China, Central and Eastern Europe, India, the Middle East and Latin America, may cause us difficulty due to greater regulatory barriers than in the United States, the necessity of adapting to new regulatory systems, problems related to entering new markets with different economic, social and political systems and conditions, and significant competition from the primary participants in these markets, some of which may have substantially greater resources than us. In addition, unstable political conditions or civil unrest, including political instability in Eastern Europe, the Middle East or elsewhere, could negatively impact our order levels and sales in a region or our ability to collect receivables from customers or operate or execute projects in a region.

Our international operations and transactions also depend upon favorable trade relations between the United States and those foreign countries in which our customers and suppliers have operations. A protectionist trade environment in either the United States or those foreign countries in which we do business or sell products, such as a change in the current tariff structures, export compliance, government subsidies or other trade policies, may adversely affect our ability to sell our products or do business in foreign markets. Our overall success as a global business depends, in part, upon our ability to succeed in differing economic, social and political conditions. We may not succeed in developing and implementing policies and strategies to counter the foregoing factors effectively in each location where we do business and the foregoing factors may cause a reduction in our sales, profitability or cash flows, or cause an increase in our liabilities.

Our warranty reserves may not adequately cover our warranty obligations and increased or unexpected product warranty claims could adversely impact our financial condition and results of operations.

We provide product warranties with varying terms and durations for the majority of our products and we establish reserves for the estimated liability associated with our product warranties. Our warranty reserves are based on historical trends, as well as our understanding of specifically identified warranty issues. The amounts estimated could differ materially from actual warranty costs that may ultimately be realized. An increase in the rate of warranty claims or the occurrence of unexpected warranty claims could have a material adverse effect on our financial condition or results of operations.

Increased IT security threats and more sophisticated and targeted computer crime could pose a risk to our systems, networks, products, solutions and services.

Increased global IT security threats and more sophisticated and targeted computer crime pose a risk to the security of our systems and networks and the confidentiality, availability and integrity of our data. While we attempt to mitigate these risks by employing a number of measures, including employee training, comprehensive monitoring of our networks and systems, and maintenance of backup and protective systems, our systems, networks, products, solutions and services remain potentially vulnerable to advanced persistent threats. Depending on their nature and scope, such threats could potentially lead to the compromising of confidential information, improper use of our systems and networks, manipulation and destruction of data, defective products, production downtimes and operational disruptions, which in turn could adversely affect our reputation, competitiveness and results of operations.

We are subject to potential insolvency or financial distress of third parties.

We are exposed to the risk that third parties to various arrangements who owe us money or goods and services, or who purchase goods and services from us, will not be able to perform their obligations or continue to place orders due to insolvency or financial distress. If third parties fail to perform their obligations under arrangements with us, we may be forced to replace the underlying commitment at current or above market prices or on other terms that are less favorable to us or we may have to write off receivables in the case of customer failures to pay. If this happens, whether as a result of the insolvency or financial distress of a third party or otherwise, we may incur losses, or our results of operations, financial position or liquidity could otherwise be adversely affected.

Failure to protect our intellectual property and know-how could reduce or eliminate any competitive advantage and reduce our sales and profitability, and the cost of protecting our intellectual property may be significant.

We rely on a combination of internal procedures, nondisclosure agreements and intellectual property rights assignment agreements, as well as licenses, patents, trademarks and copyright law to protect our intellectual property and know-how. Our intellectual property rights may not be successfully asserted in the future or may be invalidated, circumvented or challenged. For example, we frequently explore and evaluate potential relationships and projects with other parties, which often require that we provide the potential partner with confidential technical information. While confidentiality agreements are typically put in place, there is a risk the potential partner could violate the confidentiality agreement and use our technical information for its own benefit or the benefit of others or compromise the confidentiality. In addition, the laws of certain foreign countries in which our products may be sold or manufactured do not protect our intellectual property rights to the same extent as the laws of the United States. In addition, certain provisions of the Leahy-Smith America Invents Act went into effect on March 16, 2013. The Leahy-Smith America Invents Act transitioned the United States from a “first-to-invent” to a “first-to-file” patent system. This change means that between two identical, pending patent applications, the first inventor no longer receives priority on the patent to the invention. As a result, the Leahy-Smith America Invents Act may require us to incur significant additional expense and effort to protect our intellectual property. Failure or inability to protect our proprietary information could result in a decrease in our sales or profitability.

We have obtained and applied for some U.S. and foreign trademark and patent registrations and will continue to evaluate the registration of additional trademarks and patents, as appropriate. We cannot guarantee that any of our pending applications will be approved. Moreover, even if the applications are approved, third parties may seek to oppose or otherwise challenge them. A failure to obtain registrations in the United States or elsewhere could limit our ability to protect our trademarks and technologies and could impede our business. Further, the protection of our intellectual property may require expensive investment in protracted litigation and the investment of substantial management time and there is no assurance we ultimately would prevail or that a successful outcome would lead to an economic benefit that is greater than the investment in the litigation. The patents in our patent portfolio are scheduled to expire between 2017 and 2037.

In addition, we may be unable to prevent third parties from using our intellectual property rights and know-how without our authorization or from independently developing intellectual property that is the same as or similar to ours, particularly in those countries where the laws do not protect our intellectual property rights as fully as in the United States. We compete in a number of industries (e.g., heat exchangers and cryogenic storage) that are small or specialized, which makes it easier for a competitor to

monitor our activities and increases the risk that ideas will be stolen. The unauthorized use of our know-how by third parties could reduce or eliminate any competitive advantage we have developed, cause us to lose sales or otherwise harm our business or increase our expenses as we attempt to enforce our rights.

Some of our products are subject to regulation by the U.S. Food and Drug Administration and other governmental authorities.

Some of our products are subject to regulation by the U.S. Food and Drug Administration and other national, supranational, federal and state governmental authorities. It can be costly and time consuming to obtain regulatory approvals to market a medical device, such as those sold by our BioMedical segment. Approvals might not be granted for new devices on a timely basis, if at all. Regulations are subject to change as a result of legislative, administrative or judicial action, which may further increase our costs or reduce sales. Our failure to maintain approvals or obtain approval for new products could adversely affect our business, results of operations, financial condition and cash flows.

In addition, we are subject to regulations covering manufacturing practices, product labeling, advertising and adverse-event reporting that apply after we have obtained approval to sell a product. Many of our facilities' procedures and those of our suppliers are subject to ongoing oversight, including periodic inspection by governmental authorities. Compliance with production, safety, quality control and quality assurance regulations is costly and time-consuming, and while we seek to be in full compliance, noncompliance could arise from time to time. If we fail to comply, our operations, financial condition and cash flows could be adversely affected, including through the imposition of fines, costly remediation or plant shutdowns, suspension or delay in product approval, product seizure or recall, or withdrawal of product approval as a result of noncompliance.

Fluctuations in the prices and availability of raw materials could negatively impact our financial results.

The pricing and availability of raw materials for use in our businesses can be volatile due to numerous factors beyond our control, including general, domestic and international economic conditions, labor costs, production levels, competition, consumer demand, import duties and tariffs and currency exchange rates. This volatility can significantly affect the availability and cost of raw materials for us, and may, therefore, increase the short-term or long-term costs of raw materials.

The commodity metals we use, including aluminum and stainless steel, have experienced fluctuations in price in recent years. On average, over half of our cost of sales for many of our product lines has historically been represented by the cost of commodities metals. We have generally been able to recover the cost increases through price increases to our customers; however, during periods of rising prices of raw materials, we may not always be able to pass increases on to our customers on a timely basis. Conversely, when raw material prices decline, customer demands for lower prices could result in lower sale prices and, to the extent we have existing inventory, lower margins. As a result, fluctuations in raw material prices could result in lower sales and profitability.

We may be subject to claims that our products or processes infringe the intellectual property rights of others, which may cause us to pay unexpected litigation costs or damages, modify our products or processes or prevent us from selling our products.

Although it is our intention to avoid infringing or otherwise violating the intellectual property rights of others, third parties may nevertheless claim (and in the past have claimed) that our processes and products infringe their intellectual property and other rights. For example, our BioMedical business manufactures products for relatively broad consumer use, is actively marketing these products in multiple jurisdictions internationally and risks infringing upon technologies that may be protected in one or more of these international jurisdictions as the scope of our international marketing efforts expands. Our strategies of capitalizing on growing international demand, as well as developing new innovative products across multiple business lines present similar infringement claim risks both internationally and in the United States as we expand the scope of our product offerings and markets. We compete with other companies for contracts in some small or specialized industries, which increases the risk that the other companies will develop overlapping technologies leading to an increased possibility that infringement claims will arise. Whether or not these claims have merit, we may be subject to costly and time-consuming legal proceedings, and this could divert our management's attention from operating our businesses. In order to resolve such proceedings, we may need to obtain licenses from these third parties or substantially re-engineer or rename our products in order to avoid infringement. In addition, we might not be able to obtain the necessary licenses on acceptable terms, or at all, or be able to re-engineer or rename our products successfully.

We may be required to make material expenditures in order to comply with environmental, health and safety laws and climate change regulations, or incur additional liabilities under these laws and regulations.

We are subject to numerous environmental, health and safety laws and regulations that impose various environmental controls on us or otherwise relate to environmental protection and various health and safety matters, including the discharge of pollutants in the air and water, the handling, use, treatment, storage and clean-up of solid and hazardous materials and wastes, the investigation and remediation of soil and groundwater affected by hazardous substances and the requirement to obtain and maintain permits

and licenses. These laws and regulations often impose strict, retroactive and joint and several liability for the costs and damages resulting from cleaning up our or our predecessors' facilities and third party disposal sites. Compliance with these laws generally increases the costs of transportation and storage of raw materials and finished products, as well as the costs of storing and disposing waste, and could decrease our liquidity and profitability and increase our liabilities. Health and safety and other laws in the jurisdictions in which we operate impose various requirements on us including state licensing requirements that may benefit our customers. If we are found to have violated any of these laws, we may become subject to corrective action orders and fines or penalties, and incur substantial costs, including substantial remediation costs and commercial liability to our customers. Further, we also could be subject to future liability resulting from conditions that are currently unknown to us that could be discovered in the future.

We are currently remediating or developing work plans for remediation of environmental conditions involving certain current or former facilities. For example, the discovery of contamination arising from historical industrial operations at our Clarksville, Arkansas property, which is currently being leased to a third party business, has exposed us, and in the future may continue to expose us, to remediation obligations. We have also been subject to environmental liabilities for other sites where we formerly operated or at locations where we or our predecessors did or are alleged to have operated. To date, our environmental remediation expenditures and costs for otherwise complying with environmental laws and regulations have not been material, but the uncertainties associated with the investigation and remediation of contamination and the fact that such laws or regulations change frequently makes predicting the cost or impact of such laws and regulations on our future operations uncertain. Stricter environmental, safety and health laws, regulations or enforcement policies could result in substantial costs and liabilities to us and could subject us to more rigorous scrutiny. Consequently, compliance with these laws could result in significant expenditures, as well as other costs and liabilities that could decrease our liquidity and profitability and increase our liabilities.

There is a growing political and scientific belief that emissions of greenhouse gases alter the composition of the global atmosphere in ways that are affecting the global climate. Various stakeholders, including legislators and regulators, stockholders and non-governmental organizations, as well as companies in many business sectors, are considering ways to reduce greenhouse gas emissions. New regulations could result in product standard requirements for the Company's global businesses but because any impact is dependent on the design of the mandate or standard, the Company is unable to predict its significance at this time. Furthermore, the potential physical impacts of theorized climate change on the Company's customers, and therefore on the Company's operations, are speculative and highly uncertain, and would be particular to the circumstances developing in various geographical regions. These may include changes in weather patterns (including drought and rainfall levels), water availability, storm patterns and intensities, and temperature levels. These potential physical effects may adversely impact the cost, production, sales and financial performance of the Company's operations.

Additional liabilities related to taxes could adversely impact our financial results, financial condition and cash flow.

We are subject to tax and related obligations in the jurisdictions in which we operate or do business, including state, local, federal and foreign taxes. The taxing rules of the various jurisdictions in which we operate or do business often are complex and subject to varying interpretations. Tax authorities may challenge tax positions that we take or historically have taken, and may assess taxes where we have not made tax filings or may audit the tax filings we have made and assess additional taxes, as they have done from time to time in the past. Some of these assessments may be substantial, and also may involve the imposition of substantial penalties and interest. In addition, governments could impose new taxes on us in the future. The payment of substantial additional taxes, penalties or interest resulting from tax assessments, or the imposition of any new taxes, could materially and adversely impact our results of operations, financial condition and cash flow.

If we are unable to continue our technological innovation and successful introduction of new commercial products, our profitability could be adversely affected.

The industries we serve, including the energy, industrial gas, respiratory healthcare and life sciences industries, experience ongoing technological change and product improvement. Manufacturers periodically introduce new generations of products or require new technological capacity to develop customized products or respond to industry developments or needs. Our future growth will depend on our ability to gauge the direction of the commercial and technological progress in our markets, as well as our ability to acquire new product technologies or fund and successfully develop, manufacture and market products in this constantly changing environment. We must continue to identify, develop, manufacture and market innovative products on a timely basis to replace existing products in order to maintain our profit margins and competitive position. We may not be successful in acquiring and developing new products or technologies and any of our new products may not be accepted by our customers. If we fail to keep pace with evolving technological innovations in the markets we serve, our profitability may decrease.

Our pension plan is currently underfunded and we contribute to a multi-employer plan for collective bargaining U.S. employees, which is also underfunded.

Certain U.S. hourly and salaried employees are covered by our defined benefit pension plan. The plan has been frozen since February 2006. As of December 31, 2016, the projected benefit obligation under our pension plan was approximately \$55.5 million and the value of the assets of the plan was approximately \$41.1 million, resulting in our pension plan being underfunded by approximately \$14.4 million. We are also a participant in a multi-employer plan, which is underfunded. Among other risks associated with multi-employer plans, contributions and unfunded obligations of the multi-employer plan are shared by the plan participants and we may inherit unfunded obligations if other plan participants withdraw from the plan or cease to participate. Additionally, if we elect to stop participating in the multi-employer plan, we may be required to pay amounts related to withdrawal liabilities associated with the underfunded status of the plan. If the performance of the assets in our pension plan or the multi-employer plan does not meet expectations or if other actuarial assumptions are modified, our required pension contributions for future years could be higher than we expect, which may negatively impact our results of operations, cash flows and financial condition.

We operate in many different jurisdictions and we could be adversely affected by violations of the U.S. Foreign Corrupt Practices Act and similar worldwide anti-corruption laws.

The U.S. Foreign Corrupt Practices Act (“FCPA”) and similar worldwide anti-corruption laws generally prohibit companies and their intermediaries from making improper payments for the purpose of obtaining or retaining business. Our internal policies mandate compliance with these anti-corruption laws. We operate in many parts of the world that have experienced corruption to some degree, and in certain circumstances, strict compliance with anti-corruption laws may conflict with local customs and practices. Despite our training and compliance programs, we cannot assure you that our internal control policies and procedures always will protect us from reckless or criminal acts committed by our employees or agents. Our continued expansion outside the U.S., including in developing countries, could increase the risk of such violations in the future. Violations of these laws, or allegations of such violations, could disrupt our business and result in a material adverse effect on our results of operations or financial condition.

Increased government regulation could adversely affect our financial results, financial condition and cash flow.

The Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”) institutes a wide range of reforms, some of which may impact us. Among other things, the Dodd-Frank Act contains significant corporate governance and executive compensation-related provisions that authorize or require the SEC to adopt additional rules and regulations in these areas. The impact of these provisions on our business is uncertain. For example, the Dodd-Frank Act provides for statutory and regulatory requirements for derivative transactions, including foreign exchange and interest rate hedging transactions. We enter into foreign exchange contracts, interest rate swaps and forward contracts from time to time to manage our foreign currency exchange and interest rate risk, and exposure to commodity price risk. The Dodd-Frank Act includes extensive provisions regulating the derivatives market, and many of the regulations implementing the derivatives provisions have become effective and additional requirements are expected to become effective in the future. As such, we have become and could continue to become subject to additional regulatory costs, both directly and indirectly, through increased costs of doing business with market intermediaries that are now subject to extensive regulation pursuant to the Dodd-Frank Act. As the regulatory regime is still developing and additional regulations have not been finalized or fully implemented or may be reduced or altered due to proposed U.S. legislative action, the ultimate costs of Dodd-Frank and similar legislation on our business remain uncertain. However, such costs could be significant and have an adverse effect on our financial results, financial condition and cash flow.

Increases in labor costs, potential labor disputes and work stoppage could materially decrease our sales and profitability.

Our financial performance is affected by the availability of qualified personnel and the cost of labor. As of January 31, 2017, we had 4,050 employees, including 158 bargaining unit hourly employees. Employees represented by a union are subject to one collective bargaining agreement in the United States that expires in February 2018. We have experienced one work stoppage in 2007. We have already executed a successor agreement with our unionized employees through 2023, which will replace the collective bargaining agreement that expires in February 2018. If we are unable to enter into new, satisfactory labor agreements with our unionized employees when necessary in the future or other labor controversies or union organizing efforts arise, we could experience a significant disruption to our operations, lose business or experience an increase in our operating expenses, which could reduce our profit margins. Furthermore, increased U.S. federal regulation or significant modifications to existing labor regulations could potentially increase our labor costs.

Our operations could be impacted by the effects of severe weather, which could be more severe than the damage and impact that our Louisiana operations encountered from hurricanes in prior years.

Some of our operations, including our operations in New Iberia, Louisiana and Houston, Texas, are located in geographic regions and physical locations that are susceptible to physical damage and longer-term economic disruption from hurricanes or

other severe weather. We also could make significant future capital expenditures in hurricane-susceptible or other severe weather locations from time to time. These weather events can disrupt our operations, result in damage to our properties and negatively affect the local economy in which these facilities operate. In September 2008, for example, our New Iberia, Louisiana facility was forced to close as a result of heavy rainfall, evacuations, strong winds and power outages resulting from Hurricane Gustav. Two weeks after Hurricane Gustav, winds and flooding from Hurricane Ike damaged our New Iberia, Louisiana, Houston, Texas and The Woodlands, Texas operations and offices, and those facilities were also closed for a period of time. Future hurricanes or other severe weather may cause production or delivery delays as a result of the physical damage to the facilities, the unavailability of employees and temporary workers, the shortage of or delay in receiving certain raw materials or manufacturing supplies and the diminished availability or delay of transportation for customer shipments, any of which may have an adverse effect on our sales and profitability. Additionally, the potential physical impact of theorized climate change could include more frequent and intense storms, which would heighten the risk to our operations in areas that are susceptible to hurricanes and other severe weather. Although we maintain insurance subject to certain deductibles, which may cover some of our losses, that insurance may become unavailable or prove to be inadequate.

We are subject to regulations governing the export of our products.

Due to our significant foreign sales, our export activities are subject to regulation, including the U.S. Treasury Department's Office of Foreign Assets Control's regulations. We believe we are in compliance with these regulations and maintain robust programs intended to maintain compliance. However, unintentional lapses in our compliance or uncertainties associated with changing regulatory requirements could result in future violations (or alleged violations) of these regulations. Any violations may subject us to government scrutiny, investigation and civil and criminal penalties and may limit our ability to export our products.

As a provider of products to the U.S. government, we are subject to federal rules, regulations, audits and investigations, the violation or failure of which could adversely affect our business.

We sell certain of our products to the U.S. government; and, therefore, we must comply with and are affected by laws and regulations governing purchases by the U.S. government. Government contract laws and regulations affect how we do business with our government customers and, in some instances, impose added costs on our business. For example, a violation of specific laws and regulations could result in the imposition of fines and penalties or the termination of our contracts or debarment from bidding on contracts. In some instances, these laws and regulations impose terms or rights that are more favorable to the government than those typically available to commercial parties in negotiated transactions.

Unanticipated changes in our effective tax rate could adversely affect our future results.

We are subject to income taxes in the United States and various foreign jurisdictions, and our domestic and international tax liabilities are subject to the allocation of expenses in differing jurisdictions. Our effective tax rate could be adversely affected by changes in the mix of earnings and losses in countries with differing statutory tax rates, certain non-deductible expenses arising from share based compensation, the valuation of deferred tax assets and liabilities and changes in federal, state or international tax laws and accounting principles. Increases in our effective tax rate could materially affect our net results. In addition, we are subject to income tax audits by many tax jurisdictions throughout the world. Although we believe our income tax liabilities are reasonably estimated and accounted for in accordance with applicable laws and principles, an adverse resolution of one or more uncertain tax positions in any period could have a material impact on the results of operations for that period.

Risks Related to Our Leverage

Our leverage and future debt service obligations could adversely affect our financial condition, limit our ability to raise additional capital to fund our operations, limit our ability to react to changes in the economy or our industry, impact the way we operate our business, expose us to interest rate risk to the extent of our variable rate debt and prevent us from fulfilling our debt service obligations.

We are leveraged and have future debt service obligations. Our financial performance could be affected by our leverage. As of December 31, 2016, our total indebtedness was \$263.2 million. In addition, at that date, under our senior secured revolving credit facility, we had \$37.2 million of letters of credit and bank guarantees outstanding and borrowing capacity of approximately \$412.8 million. Through separate facilities, our subsidiaries had \$7.5 million in bank guarantees outstanding at December 31, 2016. While we had \$282.0 million in cash at December 31, 2016, which we believe mitigates the risk related to our leverage, there is no assurance that we will continue to be profitable in the future or that we will not use our available cash in ways other than those that reduce our leverage or mitigate the risk related to our leverage. We may also incur additional indebtedness in the future. Our level of indebtedness could have important negative consequences, including:

- we may have difficulty generating sufficient cash flow to pay interest and satisfy our debt obligations;

- we may have difficulty obtaining financing in the future for working capital, capital expenditures, acquisitions or other purposes;
- we may need to use a substantial portion of our available cash flow to pay interest and principal on our debt, which would reduce the amount of money available to finance our operations and other business activities;
- future borrowings under our senior secured revolving credit facility have variable rates of interest, which could expose us to the risk of increased interest rates;
- our debt level increases our vulnerability to general economic downturns and adverse industry conditions;
- our debt level could limit our flexibility in planning for, or reacting to, changes in our business and in our industry in general;
- our debt and the amount we must pay to service our debt obligations could place us at a competitive disadvantage compared to our competitors that have less debt;
- our customers may react adversely to our debt level and seek or develop alternative suppliers; and
- our failure to comply with the financial and other restrictive covenants in our debt instruments which, among other things, require us to maintain specified financial ratios and limit our ability to incur debt and sell assets, could result in an event of default that, if not cured or waived, could have a material adverse effect on our business or prospects.

Our business may not generate sufficient cash flow from operations and future borrowings may not be available to us under our senior secured revolving credit facility or otherwise in an amount sufficient to permit us to pay the principal and interest on our indebtedness or fund our other liquidity needs. In addition, borrowings under our senior secured revolving credit facility bear interest at variable rates. If market interest rates increase, debt service on our variable-rate debt will rise, which would adversely affect our cash flow. We may be unable to refinance any of our debt, including our senior secured revolving credit facility or our 2.00% Convertible Senior Subordinated Notes due August 2018, on commercially reasonable terms. See Item 7. “Management’s Discussion and Analysis of Financial Condition and Results of Operations — Liquidity and Capital Resources.”

If our cash flows and capital resources are insufficient to fund our debt service obligations, we may be forced to sell assets, seek additional capital or seek to restructure or refinance our indebtedness. These alternative measures may not be successful and may not permit us to meet our scheduled debt service obligations. We may be unable to consummate those asset sales to raise capital or sell assets at prices that we believe are fair and proceeds that we do receive may be inadequate to meet any debt service obligations then due.

We may still be able to incur substantially more debt. This could further exacerbate the risks that we face.

We may be able to incur substantial additional indebtedness in the future. The terms of our debt instruments do not fully prohibit us from doing so. Our senior secured revolving credit facility provides commitments of up to \$450.0 million, approximately \$412.8 million of which would have been available for future borrowings (after giving effect to letters of credit and bank guarantees outstanding) as of December 31, 2016. See Item 7. “Management’s Discussion and Analysis of Financial Condition and Results of Operations — Liquidity and Capital Resources — Debt Instruments and Related Covenants.” We may also further increase the size of our senior secured revolving credit facility which includes an expansion option permitting us to add up to an aggregate of \$200.0 million in additional borrowings, subject to certain conditions, or we could refinance with higher borrowing limits. If new debt is added to our current debt levels, the related risks that we now face could intensify.

The senior secured revolving credit facility contains a number of restrictive covenants which limit our ability to finance future operations or capital needs or engage in other business activities that may be in our interest.

The senior secured revolving credit facility imposes, and the terms of any future indebtedness may impose, operating and other restrictions on us and our subsidiaries. Such restrictions affect or will affect, and in various circumstances limit or prohibit, among other things, our ability and the ability of our subsidiaries to:

- incur additional indebtedness;
- create liens;
- pay dividends based on our leverage ratio and make other distributions in respect of our capital stock;
- redeem or buy back our capital stock based on our leverage ratio;
- make certain investments or certain other restricted payments;
- sell or transfer certain kinds of assets;
- enter into certain types of transactions with affiliates; and
- effect mergers or consolidations.

The senior secured revolving credit facility also requires us to achieve certain financial and operating results and maintain compliance with specified financial ratios. Our ability to comply with these ratios may be affected by events beyond our control.

The restrictions contained in the senior secured revolving credit facility could:

- limit our ability to plan for or react to market or economic conditions or meet capital needs or otherwise restrict our activities or business plans; and
- adversely affect our ability to finance our operations, acquisitions, investments or strategic alliances or other capital needs or to engage in other business activities that would be in our interest.

A breach of any of these covenants or our inability to comply with the required financial ratios could result in a default under our senior secured revolving credit facility. If an event of default occurs under our senior secured revolving credit facility, which includes an event of default under the indenture governing our 2.00% Convertible Senior Subordinated Notes due August 2018, the lenders could elect to:

- declare all borrowings outstanding, together with accrued and unpaid interest, to be immediately due and payable; or
- require us to apply all of our available cash to repay the borrowings,

either of which could result in an event of default under our convertible notes or prevent us from making payments on the convertible notes when due in 2018. The lenders will also have the right in these circumstances to terminate any commitments they have to provide further financing.

If we were unable to repay or otherwise refinance these borrowings when due, our lenders could sell the collateral securing the senior secured revolving credit facility, which constitutes substantially all of our and our domestic wholly-owned subsidiaries' assets.

Our 2.00% Convertible Senior Subordinated Notes due August 2018 have certain fundamental change and conditional conversion features which, if triggered, may adversely affect our financial condition.

If a fundamental change occurs under our 2.00% Convertible Senior Subordinated Notes due August 2018, the holders of the convertible notes may require us to purchase for cash any or all of the convertible notes. However, there can be no assurance that we will have sufficient funds at the time of the fundamental change to purchase all of the convertible notes delivered for purchase, and we may not be able to arrange necessary financing on acceptable terms, if at all. Likewise, if one of the conversion contingencies of our convertible notes is triggered, holders of convertible notes will be entitled to convert the convertible notes at any time during specified periods. For example, as a result of attaining specified market price triggers, the notes were convertible during several quarters in 2013, although no notes have been converted to date. If one or more holders elects to convert their convertible notes during such future specified periods, we would be required to settle any converted principal through the payment of cash, which could adversely affect our liquidity.

We are subject to counterparty risk with respect to the convertible note hedge and capped call transactions associated with our 2.00% Convertible Senior Subordinated Notes due August 2018.

The option counterparties for our convertible note hedging arrangements are financial institutions, and we will be subject to the risk that any or all of them might default under the convertible note hedge and capped call transactions. Our exposure to the credit risk of the option counterparties is not secured by any collateral. Global economic conditions during the 2008-2009 economic downturn resulted in the actual or perceived failure or financial difficulties of many financial institutions. If an option counterparty becomes subject to insolvency proceedings, we will become an unsecured creditor in those proceedings with a claim equal to our exposure at that time under the convertible note hedge and capped call transactions with that option counterparty. Our exposure will depend on many factors but, generally, the increase in our exposure will be correlated to the increase in the market price and in the volatility of our common stock. In addition, upon a default by an option counterparty, we may suffer adverse tax consequences and more dilution than we currently anticipate with respect to our common stock. We can provide no assurances as to the financial stability or viability of the option counterparties.

We are a holding company and we may depend upon cash from our subsidiaries to service our debt. If we do not receive cash from our subsidiaries, we may be unable to meet our obligations.

We are a holding company and all of our operations are conducted through our subsidiaries. Accordingly, we may be dependent upon the earnings and cash flows from our subsidiaries to provide the funds necessary to meet our debt service obligations. If we could not have access to the cash flows of our subsidiaries, we may be unable to pay the principal or interest on our debt. In addition, certain of our subsidiaries are holding companies that rely on subsidiaries of their own as a source of funds to meet any obligations that might arise.

Generally, the ability of a subsidiary to make cash available to its parent is affected by its own operating results and is subject to applicable laws and contractual restrictions contained in its debt instruments and other agreements. Moreover, there may be restrictions on payments by our subsidiaries to us under applicable laws, including laws that require companies to maintain minimum amounts of capital, to make payments to shareholders only from profits and restrictions on our ability to repatriate dividends from our foreign subsidiaries. As a result, although our subsidiaries may have cash, we may be unable to obtain that cash to satisfy our obligations and make payments to our stockholders, if any.

Risks Related to the Trading Market for Our Common Stock

Our common stock has experienced, and may continue to experience, price volatility.

Our common stock has at times experienced substantial price volatility as a result of many factors, including the general volatility of stock market prices and volumes, changes in securities analysts' estimates of our financial performance, variations between our actual and anticipated financial results, fluctuations in order or backlog levels, fluctuations in energy prices, or uncertainty about current global economic conditions. For these reasons, among others, the price of our stock may continue to fluctuate.

Provisions in our amended and restated certificate of incorporation and amended and restated bylaws and other agreements and in Delaware law may discourage a takeover attempt.

Provisions contained in our amended and restated certificate of incorporation and amended and restated bylaws and Delaware law could make it more difficult for a third party to acquire us. Provisions of our amended and restated certificate of incorporation and amended and restated bylaws and Delaware law impose various procedural and other requirements, which could make it more difficult for stockholders to effect certain corporate actions. For example, our amended and restated certificate of incorporation authorizes our board of directors to determine the rights, preferences, privileges and restrictions of unissued series of preferred stock, without any vote or action by our stockholders. Therefore, our board of directors can authorize and issue shares of preferred stock with voting or conversion rights that could adversely affect the voting or other rights of holders of our common stock. These rights may have the effect of delaying or deterring a change of control of our company. These provisions could limit the price that certain investors might be willing to pay in the future for shares of our common stock.

In addition, the terms of our 2.00% Convertible Senior Subordinated Notes may require us to purchase these convertible notes for cash in the event of a takeover of our Company. The indenture governing the convertible notes also prohibits us from engaging in certain mergers or acquisitions unless, among other things, the surviving entity assumes our obligations under the convertible notes. These and other provisions applicable to the convertible notes may have the effect of increasing the cost of acquiring us or otherwise discourage a third party from acquiring us.

The issuance of common stock upon conversion of our 2.00% Convertible Senior Subordinated Notes due August 2018 could cause dilution to the interests of our existing stockholders.

As of December 31, 2016, we had \$250.0 million aggregate principal amount of convertible notes outstanding. Prior to the close of business on the business day immediately preceding May 1, 2018, the convertible notes will be convertible only upon satisfaction of certain conditions. As a result of attaining specified market price triggers, the notes were convertible during several quarters in 2013, although no notes have been converted to date. Holders may convert their convertible notes at their option at any time after May 1, 2018. We will settle conversions of convertible notes by paying cash up to the aggregate principal amount of the convertible notes to be converted and paying or delivering, as the case may be, cash, shares of our common stock, or a combination of cash and shares of our common stock, at our election, in respect of the remainder, if any, of our conversion obligation in excess of the aggregate principal amount of the notes being converted. The number of shares issued could be significant and such an issuance could cause significant dilution to the interests of the existing stockholders.

Item 1B. Unresolved Staff Comments

Not applicable.

Item 2. Properties

We occupy 47 facilities among the locations listed below totaling approximately 4.6 million square feet, with the majority devoted to manufacturing, assembly, and storage. Of these facilities, approximately 3.5 million square feet are owned and 1.1 million square feet are occupied under operating leases. We currently lease approximately 32,800 square feet for our corporate office in Garfield Heights, Ohio. We have announced plans to move our corporate headquarters to Canton, Georgia during the fourth quarter of 2017. Our major owned facilities in the United States are subject to mortgages securing our senior secured revolving credit facility.

The following table summarizes certain information about facilities occupied by us as of January 31, 2017:

Location	Segment	Approximate Square Footage	Ownership	Use
Garfield Heights, Ohio	Corporate	32,800	Leased	Office
Luxembourg, Luxembourg	Corporate	1,200	Leased	Office
Aichi, Japan	BioMedical	7,000	Leased	Service
Amherst, New York	BioMedical	150,100	Leased/Owned	Manufacturing/Warehouse/Office
Chengdu, China	BioMedical	176,000	Owned	Manufacturing/Office
Lidcombe, Australia	BioMedical	2,400	Leased	Office/Warehouse
Padova, Italy	BioMedical	11,800	Leased	Service
San Diego, California	BioMedical	24,500	Leased	Manufacturing/Office
Tokyo, Japan	BioMedical	1,600	Leased	Office
Troy, New York	BioMedical	12,000	Leased	Manufacturing/Office
Wokingham, United Kingdom	BioMedical	7,200	Leased	Office/Warehouse/Service
Wuppertal, Germany	BioMedical	104,900	Leased	Office/Warehouse/Service
Decin, Czech Republic	Distribution & Storage	619,000	Owned	Manufacturing/Office
Goch, Germany	Distribution & Storage	258,000	Owned	Manufacturing/Office
Houston, Texas	Distribution & Storage/Energy & Chemicals	50,800	Leased/Owned	Manufacturing/Service
Kuala Lumpur, Malaysia	Distribution & Storage	2,500	Leased	Marketing & Sales/Office
McCarran, Nevada	Distribution & Storage	42,300	Owned	Service
Mumbai, India	Distribution & Storage	100	Leased	Office
Nanjing, China	Distribution & Storage	39,700	Leased/Owned	Manufacturing/Office
Salem, New Hampshire	Distribution & Storage	1,300	Leased	Office
Solingen, Germany	Distribution & Storage	16,000	Leased	Manufacturing/Office/Service/Warehouse
Fremont, California	Distribution & Storage	19,600	Leased	Manufacturing/Office
Pershore, United Kingdom	Distribution & Storage	2,800	Leased	Office/Warehouse
Bogota, Colombia	Distribution & Storage	500	Leased	Office
East Java, Indonesia	Distribution & Storage	6,800	Leased	Manufacturing/Office
Shanghai, China	Distribution & Storage	400	Leased	Marketing & Sales/Office
Canton, Georgia	Distribution & Storage/BioMedical	337,700	Leased/Owned	Manufacturing/Office/Service/Testing Lab/Warehouse
New Prague, Minnesota	Distribution & Storage/BioMedical	419,300	Leased/Owned	Manufacturing/Office/Service
North Dartmouth, Massachusetts	Distribution & Storage	9,600	Owned	Office
Changzhou, China	Distribution & Storage	1,281,600	Leased/Owned	Manufacturing/Office
Franklin, Indiana	Energy & Chemicals	51,400	Leased	Manufacturing/Office
La Crosse, Wisconsin	Energy & Chemicals	296,000	Leased/Owned	Manufacturing/Office
New Iberia, Louisiana	Energy & Chemicals	108,700	Leased	Manufacturing
The Woodlands, Texas	Energy & Chemicals	33,500	Leased	Office
Tulsa, Oklahoma	Energy & Chemicals	222,800	Leased/Owned	Manufacturing/Office
Wuxi, China	Energy & Chemicals	200,000	Leased	Manufacturing/Office

In addition, we own a 110,000 square foot facility in Clarksville, Arkansas that is leased from the Company. The table above excludes leased facilities covering approximately 151,100 square feet that have been closed.

Regulatory Environment

We are subject to federal, state, and local regulations relating to the discharge of materials into the environment, production and handling of hazardous and regulated materials, and the conduct and condition of our production facilities. We do not believe that these regulatory requirements have had a material effect upon our capital expenditures, earnings, or competitive position. We are not anticipating any material capital expenditures in 2017 that are directly related to regulatory compliance matters. We are also not aware of any pending or potential regulatory changes that would

have a material adverse impact on our business.

Item 3. *Legal Proceedings*

We are occasionally subject to various legal claims related to performance under contracts, product liability, environmental liability, taxes, employment, intellectual property, and other matters, several of which claims assert substantial damages in the ordinary course of our business. Based on the Company's historical experience in litigating these claims, as well as the Company's current assessment of the underlying merits of the claims and applicable insurance, if any, we believe the resolution of these legal claims will not have a material adverse effect on our financial position, liquidity, cash flows or results of operations. Future developments may, however, result in resolution of these legal claims in a way that could have a material adverse effect. See Item 1A. "Risk Factors."

Item 4. *Mine Safety Disclosures*

Not applicable.

Item 4A. *Executive Officers of the Registrant**

The name, age and positions of each Executive Officer of the Company as of February 15, 2017 are as follows:

Name	Age	Position
Samuel F. Thomas ⁽¹⁾	65	Chairman and Chief Executive Officer
William C. Johnson ⁽¹⁾	53	President and Chief Operating Officer
Kenneth J. Webster ⁽²⁾	54	Vice President and Chief Financial Officer
Robert H. Wolfe	67	Vice President, General Counsel and Secretary
Mary C. (Katie) Cook	46	Chief Accounting Officer and Controller
Jillian C. Evanko ⁽²⁾	39	Vice President of Finance

⁽¹⁾ Effective as of the Company's May 25, 2017 Annual Meeting of Stockholders, Mr. Johnson will become the Company's Chief Executive Officer and President and Mr. Thomas will assume the position of Executive Chairman.

⁽²⁾ Effective March 1, 2017, Mr. Webster will cease to be an officer of the Company and Ms. Evanko will become the Company's Chief Financial Officer.

* Included pursuant to Instruction 3 to Item 401(b) of Regulation S-K.

Samuel F. Thomas is our Chairman of the Board and Chief Executive Officer. He has served as Chairman of our Board of Directors since March 2007 and served as our Chief Executive Officer and President and as a member of our Board of Directors since October 2003. Prior to joining our Company, Mr. Thomas was Executive Vice President of Global Consumables at ESAB Holdings Ltd., a provider of welding consumables and equipment. In addition to his most recent position at ESAB, Mr. Thomas was responsible for ESAB North America during his employment at ESAB Holdings Ltd. Prior to joining ESAB in February 1999, Mr. Thomas was Vice President of Friction Products for Federal Mogul, Inc. Prior to its acquisition by Federal Mogul in 1998, Mr. Thomas was employed by T&N plc from 1976 to 1998, where he served from 1991 as chief executive of several global operating divisions, including industrial sealing, camshafts and friction products. Mr. Thomas also serves on the board of Lumentum Holdings Inc.

William C. Johnson joined us in July 2016 as President and Chief Operating Officer. Prior to joining our Company, Mr. Johnson served as President and Chief Executive Officer at Dover Refrigeration & Food Equipment, Inc., a subsidiary of Dover Corporation. Mr. Johnson held multiple executive positions at Dover and its manufacturing companies, which he joined in August 2006 as Executive Vice President at Hill Phoenix, Inc. Prior to his tenure with Dover, Mr. Johnson served as President and Chief Executive Officer of Graham Corporation.

Kenneth J. Webster is our Vice President and Chief Financial Officer and has served in that capacity since April 2016. Prior to that, Mr. Webster was Chief Accounting Officer and Controller since March 2008 and Vice President since May 2010. Mr. Webster joined the Company in July 2006 as the Company's Director of Internal Audit. Prior to joining Chart, Mr. Webster served as Assistant Corporate Controller for International Steel Group, an integrated steel manufacturer, from March 2004 to April 2005, at which time International Steel Group was acquired by Mittal Steel USA, Inc. Following the acquisition, Mr. Webster continued to serve in his capacity as Assistant Corporate Controller for Mittal Steel USA, Inc. until July 2006. Before that, Mr. Webster served in various accounting and finance positions with Bethlehem Steel.

Robert H. Wolfe was appointed to serve as the Company's Vice President, General Counsel and Secretary in November 2016. Mr. Wolfe has been employed with the Company since 2011, serving as the Assistant General Counsel of Chart Energy & Chemicals, Inc. Prior to joining the Company, Mr. Wolfe had over 30 years of legal experience with several top engineering, construction and procurement firms including, most recently, URS Energy & Construction, Inc. Mr. Wolfe

also has substantial public company General Counsel experience from his prior tenure at Chicago Bridge & Iron Company, N.V.

Mary C. (Katie) Cook was appointed our Chief Accounting Officer and Controller in April 2016. Prior to that, Ms. Cook was our Assistant Corporate Controller since August 2012. She was previously the Manager of Financial Reporting for Applied Industrial Technologies, Inc. from December 2006 through August 2012. Prior to December 2006, Ms. Cook held various audit and accounting roles for Ernst & Young, LLP, Foseco, Inc. and Bonne Bell, Inc.

Jillian C. Evanko was appointed Vice President of Finance on February 13, 2017. Ms. Evanko served as the Vice President and Chief Financial Officer of Truck-Lite Co., LLC since October 2016, prior to which Ms. Evanko held multiple executive positions at Dover Corporation and its subsidiaries, including the role of Vice President and Chief Financial Officer of Dover Fluids since January 2014. Prior to joining Dover in 2004, Ms. Evanko worked in valuation services at Arthur Andersen, LLP and also held audit and accounting roles for Honeywell and Sony Corporation of America.

PART II

Item 5. *Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities*

The Company's common stock is traded on the NASDAQ Global Select Market under the symbol "GTLS." The high and low sales prices for the shares of common stock for the periods indicated are set forth in the table below:

	High and Low Sales Price			
	2016		2015	
	High	Low	High	Low
First quarter	\$ 22.05	\$ 13.27	\$ 39.93	\$ 27.34
Second quarter	28.24	20.86	45.62	31.61
Third quarter	33.06	22.74	38.10	17.22
Fourth quarter	40.74	27.01	24.48	15.08
Year	40.74	13.27	45.62	15.08

As of February 1, 2017, there were 182 holders of record of our common stock. Since many holders hold shares in "street name," we believe that there are a significantly larger number of beneficial owners of our common stock than the number of record holders.

We do not currently intend to pay any cash dividends on our common stock, and instead intend to retain earnings, if any, for future operations, potential acquisitions and debt reduction. The amounts available to us to pay future cash dividends may be restricted by our senior secured revolving credit facility to the extent our pro forma leverage ratio exceeds certain targets. Any decision to declare and pay dividends in the future will be made at the discretion of our board of directors and will depend on, among other things, our results of operations, financial condition, cash requirements, contractual restrictions and other factors that our board of directors may deem relevant.

Cumulative Total Return Comparison

Set forth below is a line graph comparing the cumulative total return of a hypothetical investment in the shares of common stock of Chart Industries, Inc. with the cumulative return of a hypothetical investment in each of the S&P SmallCap 600 Index and our Peer Group Index based on the respective market prices of each such investment on the dates shown below, assuming an initial investment of \$100 on December 31, 2011, including reinvestment of dividends, if any.

	December 31,					
	2011	2012	2013	2014	2015	2016
Chart Industries, Inc.	\$ 100.00	\$ 123.34	\$ 176.88	\$ 63.25	\$ 33.22	\$ 66.62
S&P SmallCap 600 Index	100.00	116.33	164.38	173.84	170.41	215.67
Peer Group Index	100.00	131.75	174.46	152.91	135.51	165.64

The Company selects the peer companies that comprise the Peer Group Index solely on the basis of objective criteria. These criteria result in an index composed of oil field equipment/service and other comparable industrial companies. The Peer Group Index (“Peer Group”) includes the following companies: Acuity Brands, Inc., Barnes Group Inc., Circor International, Inc., Colfax Corp., Enpro Industries Inc., Ensco plc, Esco Technologies Inc., Graco Inc., IDEX Corp., Nordson Corporation, Powell Industries Inc. and Worthington Industries, Inc. In accordance with SEC rules, the Peer Group Index is represented in the graph above.

Purchases of Equity Securities by the Issuer and Affiliated Purchasers

During the fourth quarter of 2016, 1,325 shares of common stock were surrendered to us by participants under our share-based compensation plans to satisfy tax withholding obligations relating to the vesting or payment of equity awards for an aggregate purchase price of approximately \$45,400. The total number of shares repurchased represents the net shares issued to satisfy tax withholdings. All such repurchased shares were subsequently retired during the three months ended December 31, 2016.

Period	Issuer Purchases of Equity Securities			
	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased As Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs
October 1 — 31, 2016	605	\$ 32.52	—	\$ —
November 1 — 30, 2016	27	31.02	—	—
December 1 — 31, 2016	693	35.93	—	—
Total	1,325	\$ 34.27	—	\$ —

Item 6. Selected Financial Data

The following table sets forth selected historical consolidated financial information as of the dates and for each of the periods indicated. The Company selected historical financial consolidated data as of and for the years ended December 31, 2016, 2015, and 2014 are derived from our audited financial statements for such periods incorporated by reference into Item 8 of this Annual Report on Form 10-K, which have been audited by Ernst & Young LLP. The Company selected historical financial consolidated data as of and for the years ended December 31, 2013 and 2012 are derived from our audited financial statements for such periods, which have been audited by Ernst & Young LLP and which are not included in this Annual Report on Form 10-K.

You should read the following table together with Item 7. “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and our consolidated financial statements and related notes included elsewhere in this Annual Report on Form 10-K (all dollar amounts, except per share data, in thousands):

	Year Ended December 31,				
	2016	2015	2014	2013	2012
Statements of Operations Data:					
Sales	\$ 859,154	\$ 1,040,160	\$ 1,192,952	\$ 1,177,438	\$ 1,014,152

	As of December 31,				
	2016	2015	2014	2013	2012
Balance Sheet Data:					
Cash and cash equivalents	\$ 281,959	\$ 123,708	\$ 103,656	\$ 137,345	\$ 141,498
Working capital ⁽⁷⁾	115,971	207,643	218,092	213,261	144,901
Goodwill ⁽⁴⁾	217,970	218,390	405,522	398,905	398,941
Identifiable intangible assets, net ⁽⁴⁾	93,443	106,714	153,666	172,142	189,463
Total assets ⁽⁴⁾	1,233,082	1,200,140	1,459,517	1,457,410	1,322,622
Long-term debt	233,711	213,798	201,553	60,468	246,802
Total debt	240,198	219,958	206,476	260,935	250,552
Chart Industries, Inc. shareholders' equity ⁽⁴⁾	697,265	670,592	879,879	754,785	696,478

- ⁽¹⁾ During the third quarter of 2016, the Company recovered for breaches of representations and warranties primarily related to warranty costs for certain product lines acquired in the 2012 acquisition of AirSep Corporation ("AirSep") under the related representation and warranty insurance. For the year ended December 31, 2016, this reduced cost of sales by \$15.1 million and reduced SG&A expenses by \$0.4 million, net of associated legal fees recorded in 2016.
- ⁽²⁾ Additionally, the year ended December 31, 2014 included a recovery of \$5.0 million reducing cost of sales for the year ended December 31, 2014 from an escrow settlement for breaches of representations and warranties relating to warranty costs (which are in excess of the settlement amount) for certain product lines acquired from AirSep in 2012.
- ⁽³⁾ Operating expenses include selling, general and administrative expenses and amortization expense. Amortization expense related to intangible assets for the years ended December 31, 2016, 2015, 2014, 2013 and 2012 was \$11.9 million, \$17.3 million, \$17.9 million, \$19.2 million, and \$14.8 million, respectively. Also includes a \$4.6 million reduction of expense associated with writing down acquisition related contingent consideration to fair value for the year ended December 31, 2012.
- ⁽⁴⁾ See Note 3, Asset Impairments, in the consolidated financial statements.
- ⁽⁵⁾ Zero incremental shares from share-based awards are included in the computation of diluted net loss per share for periods in which a net loss occurs, because to do so would be anti-dilutive.
- ⁽⁶⁾ Includes financing costs amortization for the years ended December 31, 2016, 2015, 2014, 2013 and 2012 of \$1.3 million, \$1.3 million, \$1.4 million, \$1.3 million, and \$1.5 million, respectively.
- ⁽⁷⁾ Working capital is defined as current assets excluding cash and cash equivalents minus current liabilities excluding short-term debt and current portion of long-term debt (including current convertible notes, if applicable).

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

You should read the following discussion of our results of operations and financial condition in conjunction with the "Selected Financial Data" section and our consolidated financial statements and related notes appearing elsewhere in this Annual Report on Form 10-K. This discussion contains forward-looking statements. Actual results may differ materially from those discussed below. See "Forward-Looking Statements" at the end of this discussion and Item 1A. "Risk Factors" for a discussion of the uncertainties, risks and assumptions associated with this discussion.

Overview

We are a leading diversified global manufacturer of highly engineered equipment for the industrial gas, energy, and biomedical industries. The largest portion of end-use applications for our products is energy-related. Our equipment and engineered systems are primarily used for low-temperature and cryogenic applications utilizing our expertise in cryogenic systems and equipment, which operate at low temperatures sometimes approaching absolute zero (0 Kelvin; -273° Centigrade; -459° Fahrenheit).

Sales for the year ended December 31, 2016 were \$859.2 million compared to sales of \$1,040.2 million for the year ended December 31, 2015, reflecting a decrease of \$181.0 million, or 17.4%. This decrease was primarily attributable to lower sales in our E&C segment across all product lines given continued challenging energy market conditions. Gross profit for the year ended December 31, 2016 was \$266.4 million, or 31.0% of sales, as compared to \$288.5 million, or 27.7% of sales, for the year ended December 31, 2015. Gross profit decreased during 2016 mainly due to lower volume and highly competitive markets within our E&C segment partially offset by improved product mix in our D&S and BioMedical segments. Also contributing to gross profit was the positive impact of an insurance recovery received by our BioMedical segment during the third quarter of 2016 as a result of the recovery for breaches of representations and warranties related to warranty costs for certain product lines acquired from AirSep Corporation ("AirSep") in 2012. The insurance recovery favorably impacted our gross profit by \$15.1 million and our gross margin percentage by 1.8%. The gross margin was also favorably impacted by improved project mix within our E&C segment, which included several high margin short lead-time replacement equipment projects in addition to contract expiration fees during the second quarter of 2016. The short lead-time projects and contract expiration fees in the second quarter contributed \$31.4 million to our gross profit and improved our gross margin percentage by 2.6% on a consolidated basis. Severance and other restructuring-related costs of \$10.9 million were recorded during 2016 in cost of goods sold (\$4.4 million) and selling, general and administrative expenses (\$6.5 million) as a result of our cost reduction initiatives and facility consolidation efforts. We recorded asset impairments of \$1.2 million and \$253.6 million during 2016 and 2015, respectively. The 2016 impairment charges related to the D&S segment and the 2015 impairment charges were primarily with respect to the BioMedical and Energy & Chemicals segments. During 2015, the drop in our market capitalization along with the macroeconomic trends described below with respect to energy prices, order trends, and weakness in China and in the BioMedical respiratory markets, led to reductions in our forecasts resulting in the non-cash impairment charges. See Note 3 to the accompanying financial statements for further information on the impairment charges for 2016 and 2015. Operating income for the year ended December 31, 2016 was \$57.4 million compared to an operating loss of \$183.2 million for the year ended December 31, 2015, mainly for the reasons discussed above.

Low energy prices and significant recent customer capacity continue to delay upstream LNG opportunities, which has negatively impacted our sales and order trends, particularly in the E&C segment. In addition, global competition and customer consolidation continue to put pressure on pricing generally. Although we are starting to see some rebound in natural gas processing opportunities, we continue to face challenges in the timing of orders. We have continued to implement productivity initiatives in light of recent order trends. We are closely monitoring our end markets and order rates and will continue to take appropriate and timely actions as necessary. Accordingly, 2017 will present performance challenges, particularly in our E&C business, given low energy prices and timing of orders. We expect additional severance and restructuring-related costs in 2017 to be approximately \$10.4 million for actions already implemented. These expected severance and restructuring-related costs include the announced Corporate headquarters and other facility consolidations in an effort to more broadly utilize a shared service model across our business units. We expect these consolidations will equate to annualized savings of approximately \$10 million, approximately \$4 million of which we anticipate realizing in 2017.

Operating Results

The following table sets forth the percentage relationship that each line item in our consolidated statements of operations represents to sales for the years ended December 31, 2016, 2015, and 2014:

	2016	2015	2014
Sales	100.0 %	100.0 %	100.0%
Cost of sales ^{(1) (2)}	69.0	72.3	70.0
Gross profit	31.0	27.7	30.0
Selling, general and administrative expenses ^{(1) (3)}	22.8	19.3	16.9
Amortization expense	1.4	1.7	1.5
Asset impairments ⁽⁴⁾	0.1	24.4	—
Operating income (loss)	6.7	(17.6)	11.6
Interest expense, net ⁽⁵⁾	2.0	1.5	1.4
Financing costs amortization	0.1	0.1	0.1
Foreign currency loss	—	0.1	0.1
Income tax expense, net	1.6	0.3	3.0
Net income (loss)	2.9	(19.7)	7.0
Noncontrolling interests, net of taxes	(0.4)	(0.1)	0.1
Net income (loss) attributable to Chart Industries, Inc.	3.3	(19.5)	6.9

⁽¹⁾ During the third quarter of 2016, the Company recovered for breaches of representations and warranties primarily related to warranty costs for certain product lines acquired in the 2012 acquisition of AirSep under the related representation and warranty insurance. For the year ended December 31, 2016, this reduced cost of sales by \$15.1 million and reduced SG&A expenses by \$0.4 million, net of associated legal fees recorded in 2016.

Included in cost of sales is recovery of \$5.0 million, reducing cost of sales for the year ended December 31, 2014, from an escrow settlement for breaches of representations and warranties relating to warranty costs (which are in excess of the settlement amount) for certain product lines acquired from AirSep in 2012.

⁽²⁾ Includes severance and other restructuring-related costs of \$4.4 million and \$3.5 million for the year ended December 31, 2016 and 2015, respectively.

⁽³⁾ Includes facility shutdown costs, restructuring costs and severance of \$6.5 million and \$8.6 million for the years ended December 31, 2016 and 2015, respectively.

Includes share-based compensation expense of \$10.7 million, \$11.3 million, and \$9.4 million, representing 1.2%, 1.1%, and 0.8% of sales, for the years ended December 31, 2016, 2015, and 2014, respectively.

⁽⁴⁾ See Note 3, Asset Impairments, in the consolidated financial statements.

⁽⁵⁾ Includes \$12.5 million, \$11.5 million, and \$10.7 million of non-cash interest accretion expense related to the carrying amount of the 2.0% Convertible Senior Subordinated Notes due August 2018 (the "Convertible Notes"), representing 1.5%, 1.1%, and 0.9% of sales, for the years ended December 31, 2016, 2015, and 2014, respectively.

Segment Information

Certain consolidated results for our operating segments are presented below (all dollar amounts in thousands). Further detailed information regarding our operating segments is presented in Note 20 of the consolidated financial statements included elsewhere in this report.

	Year Ended December 31,		
	2016	2015	2014
Sales

BioMedical	20.2%	(74.6)%	11.1%
Consolidated	6.7%	(17.6)%	11.6%

(1) During the third quarter of 2016, the Company recovered for breaches of representations and warranties primarily related to warranty costs for certain product lines acquired in the 2012 acquisition of AirSep under the related representation and warranty insurance. For the year ended December 31, 2016, this reduced BioMedical cost of sales by \$15,145 and reduced Corporate SG&A expenses by \$376, net of associated legal fees recorded in 2016.

Included in cost of sales is recovery of \$5,003, reducing BioMedical cost of sales for the year ended December 31, 2014, from an escrow settlement for breaches of representations and warranties relating to warranty costs (which are in excess of the settlement amount) for certain product lines acquired from AirSep in 2012.

(2) Beginning in 2016, the Company allocates share-based compensation expense to each operating segment and maintains share-based compensation expense related to Corporate employees at Corporate. Prior to 2016, all share-based compensation expense was recorded at Corporate. Reclassifications from Corporate to the operating segments have been made to the 2015 and 2014 SG&A expenses to conform to the 2016 presentation.

(3) The year ended December 31, 2016 includes asset impairment charges of \$1,217 attributed to D&S. The year ended December 31, 2015 includes asset impairment charges of \$255,116 attributed to E&C - \$68,796, D&S - \$2,020, and BioMedical - \$184,300.

Results of Operations for the Year Ended December 31, 2016 Compared to the Year Ended December 31, 2015

Sales

Sales for 2016 were \$859.2 million compared to \$1,040.2 million for 2015, reflecting a decrease of \$181.0 million, or 17.4%.

E&C segment sales decreased by \$176.7 million, or 53.4%, compared to the prior year. This reduction was due to lower sales of LNG applications of \$97.9 million, a \$75.5 million decrease within natural gas processing (including petrochemical) applications, and a decline in industrial gas applications of \$3.3 million. Low energy prices continue to impact backlog and order trends as customers delay or defer large projects. Additionally, our E&C segment completed several major projects in 2015 with no major projects awarded in 2016 given the volatile energy environment.

D&S segment sales increased by \$9.6 million, or 2.0%, compared to the prior year, primarily attributable to a \$23.8 million increase within bulk industrial gas applications largely due to engineered systems. This increase was partially offset by an \$8.1 million decrease related to packaged gas industrial applications largely due to beverage applications, and a \$6.1 million decrease within LNG applications. Continued weakness in China was offset by improved sales in Europe and the U.S. compared to 2015. The overall currency translation impact on sales attributable to the D&S segment was approximately \$4.9 million unfavorable on a constant currency basis given the strength of the U.S. dollar versus the Chinese yuan.

BioMedical segment sales decreased by \$13.9 million, or 6.3%, compared to the prior year. This decrease was driven by a \$13.4 million decrease in respiratory therapy equipment sales primarily in the U.S. due to competitive pressure and a decrease in commercial oxygen generation systems of \$6.4 million, primarily attributable to a decline in large project revenue. These decreases were partially offset by an increase in life sciences of \$5.9 million during 2016.

Gross Profit and Margin

Gross profit for 2016 was \$266.4 million, or 31.0% of sales compared to \$288.5 million, or 27.7% of sales, for 2015, which reflected a decrease of \$22.1 million, while the related margin percentage increased by 3.3 percentage points. Gross profit and the related margin for the year ended December 31, 2016 were positively impacted by an insurance recovery during the third quarter at our BioMedical segment as further described in this section. For the year ended December 31, 2016, the insurance recovery added 1.8% to the margin. The favorable impact of the insurance recovery was offset by decreased gross profit resulting from lower sales volumes at our E&C segment.

E&C segment gross profit decreased by \$49.7 million primarily due to decreased volume within LNG and natural gas applications, but was favorably impacted by several short-lead time orders and contract expiration fees which improved gross profit by \$31.4 million in the second quarter of 2016 and the gross margin by 18.0 percentage points for the year.

D&S segment gross profit increased by \$6.8 million and the related margin increased by 0.9 percentage points compared to the prior year primarily due to higher volume and productivity initiatives in the U.S. and Europe. The finalization of an insurance claim during the first quarter of 2016 positively impacted gross margin by approximately \$1.0 million. These increases are partially offset by severance costs of \$2.3 million that are reflected in cost of sales, which equates to a 0.5% gross margin impact, along with unfavorable product mix and inventory write-downs in Asia.

BioMedical segment gross profit increased by \$20.8 million and the related margin increased by 12.1 percentage points compared to the prior-year period, primarily due to an insurance recovery, as well as lower warranty expense and favorable product mix. During the third quarter of 2016, we recovered for breaches of representations and warranties primarily related to warranty costs for certain product lines acquired in the 2012 acquisition of AirSep under the related representation and warranty insurance. For the year ended December 31, 2016, this reduced BioMedical's cost of sales by \$15.1 million and added 7.3% to the year-to-date margin. The BioMedical segment's warranty expense as a percent of sales was 1.6% during 2016 compared to 4.1% in the prior-year period. Warranty expense has decreased due to lower return rates on certain products and product mix.

Selling General & Administrative (SG&A) Expenses

SG&A expenses for 2016 were \$195.9 million, or 22.8% of sales, compared to \$200.8 million, or 19.3% of sales, for 2015, representing a decrease of \$4.9 million. SG&A expenses related to restructuring activities were \$6.5 million during 2016, which was primarily comprised of severance costs related to facility consolidation effects. This compares to restructuring costs relating to facility shutdown and headcount reductions of \$8.6 million during 2015. Additionally, SG&A expenses declined by \$14.9 million due to lower payroll and benefits, professional services, travel and entertainment, commissions, and restructuring-related expenses. This was partially offset by increases of \$10.4 million for variable short-term incentive compensation based on performance, primarily with respect to the D&S, BioMedical, and Corporate segments, and bad debt expense.

Beginning in 2016, we allocated share-based compensation expense to each operating segment and maintained share-based compensation expense related to Corporate employees at Corporate. Prior to 2016, all share-based compensation expense was

recorded at Corporate. Reclassifications from Corporate to the operating segments have been made to the 2015 and 2014 SG&A expenses to conform to the 2016 presentation.

E&C segment SG&A expenses decreased by \$3.7 million compared to the prior year. SG&A expense declined by \$4.5 million due to decreased variable short-term incentive compensation, lower costs related to outside professional services, and reduced employee costs due to headcount reductions. This was partially offset by an increase of \$1.0 million related to bad expense and higher marketing costs.

D&S segment SG&A expenses decreased by \$4.5 million compared to the prior year. The decrease was due to \$10.8 million of lower costs related to restructuring-related expenses, outside professional services, travel and entertainment, employee costs due to headcount reductions, and decreased severance charges, commission expense, and supplies expense. This was partially offset by an increase of \$7.5 million for higher variable short-term incentive compensation and bad debt expense.

BioMedical segment SG&A expenses increased by \$2.8 million compared to the prior year primarily due to \$4.4 million of increases related to higher variable short-term incentive compensation and increased bad debt expense. This was partially offset by decreases of \$2.8 million related to lower restructuring related expenses, lower employee costs due to headcount reductions, and lower commission expense.

Corporate SG&A expenses increased by \$0.5 million compared to the prior year. SG&A expenses increased by \$5.9 million due to higher restructuring-related expenses and variable short-term incentive compensation expense. This was partially offset by lower costs of \$4.6 million related to outside professional services and lower employee costs due to headcount reductions.

Asset Impairments

During 2016, we recorded asset impairment charges of \$1.2 million attributed to our D&S segment. In comparison, during 2015, we recorded asset impairment charges of \$253.6 million attributed to our operating segments as follows: E&C - \$68.8 million, D&S - \$0.5 million, and BioMedical - \$184.3 million. See Note 3, Asset Impairments, to the accompanying financial statements for more information relating to the 2016 and 2015 asset impairments.

Operating Income (Loss)

As a result of the foregoing, operating income for 2016 was \$57.4 million, or 6.7% of sales, compared to operating loss of \$183.2 million, or 17.6% of sales, for the same period in 2015.

Interest Expense, Net and Financing Costs Amortization

Net interest expense for 2016 and 2015 was \$17.3 million and \$16.0 million, respectively. Interest expense for 2016 included \$5.0 million of 2.0% cash interest and \$12.5 million of non-cash interest accretion expense related to the carrying value of the Convertible Notes. For 2016 and 2015, financing costs amortization were \$1.3 million in each period.

Foreign Currency Loss

For 2016 and 2015, foreign currency losses were \$0.4 million and \$1.3 million, respectively. Losses decreased by \$0.9 million during 2016 due to reduced exchange rate volatility, especially with respect to the euro.

Income Tax Expense

Income tax expense of \$13.7 million and \$2.7 million for 2016 and 2015, respectively, represents taxes on both U.S. and foreign earnings at a combined effective income tax rate of 35.7% and (1.3)%, respectively. The favorable impact of an insurance settlement for breaches of representations and warranties that resulted in an adjustment to our purchase price of AirSep shares was offset by valuation allowances recorded against current and accumulated operating losses incurred by certain of the Company's foreign operations (primarily China) for which no benefit was recorded. The change in rate from the prior year was primarily due to the \$67.3 million tax impact in 2015 related to the impairment charges of \$253.6 million.

Net Income (Loss)

As a result of the foregoing, net income attributable to the Company during 2016 was \$28.2 million while the net loss was \$203.0 million during 2015, including asset impairment charges of \$1.2 million and \$255.1 million for 2016 and 2015, respectively.

Results of Operations for the Year Ended December 31, 2015 Compared to the Year Ended December 31, 2014

Sales

Sales for 2015 were \$1,040.2 million compared to \$1,193.0 million for 2014, reflecting a decrease of \$152.8 million, or 12.8%.

E&C segment sales decreased by \$57.0 million, or 14.7%, compared to the prior year. Within natural gas processing (including petrochemical) applications and industrial gas applications, sales decreased by \$27.8 million and \$21.4 million, respectively, due to decreased capital spending by our energy-related customers and highly competitive market conditions. Sales within LNG applications decreased by \$7.8 million as several major projects were completed during the year, which reduced revenue when compared to the twelve months ended December 31, 2014.

D&S segment sales decreased by \$91.3 million, or 15.8%, compared to the prior year, mainly attributable to a \$93.7 million decrease related to LNG applications globally, particularly in China. This was partially offset by an increase of \$2.4 million in industrial applications. Currency was also a factor that negatively impacted D&S sales. The overall currency translation impact on sales attributable to the D&S segment was approximately \$21.0 million unfavorable on a constant currency basis.

BioMedical segment sales decreased by \$4.5 million, or 2.0%, compared to the prior year. Currency and increased competition largely drove the \$9.0 million decrease in respiratory therapy equipment sales. This decrease was partially offset by a \$5.8 million increase in commercial oxygen generation systems. Sales within life sciences decreased by \$1.3 million during the year. The overall currency translation impact on sales attributable to the BioMedical segment was approximately \$10.8 million unfavorable on a constant currency basis.

Gross Profit and Margin

Gross profit for 2015 was \$288.5 million, or 27.7% of sales compared to \$357.9 million, or 30.0% of sales, for 2014, which reflected a decrease of \$69.4 million, and the related margin percentage decreased by 2.3 percentage points.

E&C segment gross profit decreased by \$19.3 million mainly due to decreased volume within industrial gas and natural gas processing applications related to brazed aluminum heat exchangers, partially offset by improved volume and project mix related to air cooled heat exchangers and process systems. The related margin decreased by 0.8 percentage points mainly due to lower volume within brazed aluminum heat exchangers, partially offset by favorable project execution and cost reduction initiatives in all businesses.

D&S segment gross profit decreased by \$38.8 million and the related margin decreased by 2.7 percentage points compared to the prior year mainly due to decreased volume in LNG applications globally, higher costs due to cost reduction initiatives, including the previously disclosed shutdown of the D&S manufacturing facility in Owatonna, Minnesota, severance associated with reductions in headcount, and increases in inventory reserves, primarily associated with inventories in China. Costs associated with facility shutdown, headcount reductions, and inventory reserves impacted the D&S segment margin by 0.6 percentage points.

BioMedical segment gross profit decreased by \$11.3 million mainly due to lower volume in respiratory therapy equipment partially offset by higher volume in commercial oxygen generation systems. Margin decreased by 4.3 percentage points compared to the prior year mainly due to unfavorable product mix within respiratory therapy equipment and higher warranty costs. The BioMedical segment's warranty expense as a percent of sales was 4.1% and 3.8% during 2015 and 2014, respectively. We received \$5.0 million in the fourth quarter of 2014 under an escrow settlement for breaches of representations and warranties relating to warranty costs (which are in excess of the settlement amount) for certain product lines acquired from AirSep in 2012. This improved BioMedical segment margin by 2.2% in 2014.

SG&A Expenses

SG&A expenses for 2015 were \$200.8 million, or 19.3% of sales, compared to \$201.8 million, or 16.9% of sales, for 2014, representing a decrease of \$1.0 million. SG&A expenses relating to facility shutdown and headcount reductions were \$8.6 million during 2015. SG&A expenses relating to acquisition-related costs and retention and severance costs were \$4.5 million during 2014. Excluding these costs, SG&A expenses were down \$5.2 million compared to the prior year, largely due to reduced discretionary spending.

Beginning in 2016, we allocated share-based compensation expense to each operating segment and maintained share-based compensation expense related to Corporate employees at Corporate. Prior to 2016, all share-based compensation expense was recorded at Corporate. Reclassifications from Corporate to the operating segments have been made to the 2015 and 2014 SG&A expenses to conform to the 2016 presentation.

E&C segment SG&A expenses decreased by \$0.3 million compared to the prior year mainly due to lower sales commissions, partially offset by higher variable short-term incentive compensation based on performance.

D&S segment SG&A expenses increased by \$2.8 million compared to the prior year mainly due to \$4.8 million in facility shutdown and severance costs due to headcount reductions, partially offset by lower variable short-term incentive compensation based on performance.

BioMedical segment SG&A expenses decreased by \$3.6 million compared to the prior year mainly due to lower acquisition-related and severance costs.

Corporate SG&A expenses increased by \$0.1 million compared to the prior year mainly due to a \$1.5 million increase in share-based compensation expense mainly due to acceleration of expense based on retirement eligibility provisions, as a greater mix of share-based awards satisfied these provisions during the first quarter of 2015, and also a \$1.3 million increase in severance costs related to cost reductions. These increases were partially offset by lower costs related to outside professional services and discretionary spending.

Asset Impairments

During 2015, we recorded asset impairment charges of \$253.6 million. The amounts are attributed to our operating segments as follows: E&C - \$68.8 million, D&S - \$0.5 million, and BioMedical - \$184.3 million. See Note 3, Asset Impairments, to the accompanying financial statements for more information relating to asset impairments.

Operating (Loss) Income

As a result of the foregoing, operating loss for 2015 was \$183.2 million, or 17.6% of sales compared to operating income of \$138.2 million, or 11.6% of sales, for the same period in 2014.

Interest Expense, Net and Financing Costs Amortization

Net interest expense for 2015 and 2014 was \$16.0 million and \$16.6 million, respectively. Interest expense for 2015 included \$5.0 million of 2.0% cash interest and \$11.5 million of non-cash interest accretion expense related to the carrying value of the Convertible Notes. For 2015 and 2014, financing costs amortization was \$1.3 million and \$1.4 million, respectively.

Foreign Currency Loss

For 2015 and 2014, foreign currency losses were \$1.3 million and \$1.0 million, respectively. Losses increased by \$0.3 million during 2015 due to exchange rate volatility, especially with respect to the Chinese yuan and the euro.

Income Tax Expense

Income tax expense of \$2.7 million and \$36.1 million for 2015 and 2014, respectively, represents taxes on both U.S. and foreign earnings at a combined effective income tax rate of (1.3)% and 30.3%, respectively. The change in rate from the prior year was primarily due to the \$67.3 million tax impact related to the impairment charges of \$253.6 million. Excluding impairment charges, the effective tax rate would have been 42.1%, which is higher than the prior year's effective tax rate due to the establishment of valuation allowances of \$4.7 million against net operating loss carryforwards, as well as other deferred tax assets at some of our Chinese operations and an unfavorable mix of earnings in higher taxed jurisdictions.

Net (Loss) Income

As a result of the foregoing, net loss attributable to the Company during 2015 was \$203.0 million, which included \$255.1 million of asset impairment charges, while net income was \$81.9 million during 2014.

Orders and Backlog

We consider orders to be those for which we have received a firm signed purchase order or other written contractual commitment from the customer. Backlog is comprised of the portion of firm signed purchase orders or other written contractual commitments received from customers that we have not recognized as revenue upon shipment or under the percentage of completion method. Backlog can be significantly affected by the timing of orders for large projects, particularly in the E&C segment, and is not necessarily indicative of future backlog levels or the rate at which backlog will be recognized as sales. Orders included in our backlog may include customary cancellation provisions under which the customer could cancel part or all of the order, potentially subject to the payment of certain costs and/or fees. Our backlog as of December 31, 2016, 2015, and 2014 was \$342.6 million, \$374.6 million and \$640.1 million, respectively.

The table below represents orders received and backlog by segment for the periods indicated (dollar amounts in thousands):

	Year Ended December 31,		
	2016	2015	2014
Orders			
Energy & Chemicals	\$ 110,174	\$ 187,657	\$ 339,357
Distribution & Storage	531,032	529,080	591,765
BioMedical	213,568	218,090	218,125
Total	\$ 854,774	\$ 934,827	\$ 1,149,247

	As of December 31,		
	2016	2015	2014
Backlog			
Energy & Chemicals	\$ 99,842	\$ 151,638	\$ 294,204
Distribution & Storage	218,210	206,518	328,350
BioMedical	24,571	16,456	17,509
Total	\$ 342,623	\$ 374,612	\$ 640,063

Orders and Backlog for the Year Ended and As of December 31, 2016 Compared to the Year Ended and As of December 31, 2015

Orders for 2016 were \$854.8 million compared to \$934.8 million for 2015, representing a decrease of \$80.1 million, or 8.6%.

E&C orders for 2016 were \$110.2 million compared to \$187.7 million for 2015, a decrease of \$77.5 million. E&C backlog totaled \$99.8 million at December 31, 2016, compared to \$151.6 million as of December 31, 2015. Low energy prices continue to delay natural gas, petrochemical, and LNG-related opportunities and current market conditions reinforce a challenging outlook for project awards given the reduction in capital spending by our energy-related customers. Included in the E&C backlog is approximately \$40 million related to the previously announced Magnolia LNG order where production release is delayed into 2018. E&C backlog at December 31, 2016 was reduced approximately \$6.2 million related to orders received prior to 2016 and cancelled during the year ended December 31, 2016. Order flow in the E&C segment is historically volatile due to project size and it is not unusual to see order intake change significantly year over year.

D&S orders for 2016 were \$531.0 million compared to \$529.1 million for 2015, an increase of \$2.0 million, or 0.4%. D&S backlog totaled \$218.2 million at December 31, 2016 compared to \$206.5 million as of December 31, 2015. The increase in D&S segment orders and backlog was primarily attributable to LNG applications in Europe.

BioMedical orders for 2016 were \$213.6 million compared to \$218.1 million for 2015. The decrease in BioMedical orders was primarily attributable to respiratory therapy applications. BioMedical backlog totaled \$24.6 million at December 31, 2016, compared to \$16.5 million as of December 31, 2015.

Orders and Backlog for the Year Ended and As of December 31, 2015 Compared to the Year Ended and As of December 31, 2014

Orders for 2015 were \$934.8 million compared to \$1,149.2 million for 2014, representing a decrease of \$214.4 million, or 18.7%. In our 2014 Annual Report on Form 10-K, we reported orders of \$1,116.0 million for 2014, which was net of \$33.2 million of adjustments; this was updated in our 2015 Annual Report on Form 10-K and subsequent filings to conform to the current presentation.

E&C orders for 2015 were \$187.7 million compared to \$339.4 million for 2014, a decrease of \$151.7 million. Low energy prices continue to delay natural gas, petrochemical, and LNG-related opportunities, as evidenced by the decline in E&C order trends and backlog. Current market conditions reinforce a challenging outlook for LNG project awards given the reduction in capital spending with our energy-related customers. E&C backlog totaled \$151.6 million at December 31, 2015, compared to \$294.2 million as of December 31, 2014.

D&S orders for 2015 were \$529.1 million compared to \$591.8 million for 2014, a decrease of \$62.7 million, or 10.6%. The decrease in D&S segment orders and backlog year over year was driven primarily by the impact of lower energy prices and the continued economic slowdown in China. Approximately 23% of the D&S backlog was related to China as of December 31, 2015,

including approximately \$3.8 million related to PetroChina. D&S segment backlog was reduced by \$150.0 million in 2015 related to previously received orders, primarily in China. While these orders had not been canceled, they exceeded the expected time of performance and circumstances suggested that our customers were not likely to take delivery in the future.

BioMedical orders were \$218.1 million during both 2015 and 2014. BioMedical backlog totaled \$16.5 million at December 31, 2015, compared to \$17.5 million as of December 31, 2014.

Liquidity and Capital Resources

Debt Instruments and Related Covenants

Convertible Notes: The outstanding aggregate principal amount of the Company's Convertible Notes is \$250.0 million. The Convertible Notes bear interest at a fixed rate of 2.0% per year, payable semiannually in arrears on February 1 and August 1 of each year, and will mature on August 1, 2018. The effective interest rate at issuance, under generally accepted accounting principles, was 7.9%. Upon conversion, holders of the Convertible Notes will receive cash up to the principal amount of the Convertible Notes, and it is the Company's intention to settle any excess conversion value in shares of the Company's common stock. However, the Company may elect to settle, at its discretion, any such excess value in cash, shares of the Company's common stock or a combination of cash and shares. The initial conversion price of \$69.03 per share represents a conversion premium of 30% over the last reported sale price of the Company's common stock on July 28, 2011, the date of the Convertible Notes offering, which was \$53.10 per share. At the end of the fourth quarter of 2016, events for early conversion were not met, and thus the Convertible Notes were not convertible as of, and for the fiscal quarter beginning January 1, 2017. There have been no conversions as of the date of this filing. In the event that holders of Convertible Notes elect to convert, the Company expects to fund any cash settlement of any such conversion from cash balances or borrowings under its senior secured revolving credit facility.

Senior Secured Revolving Credit Facility: The Company has a five-year \$450.0 million senior secured revolving credit facility (the "SSRCF") which matures on October 29, 2019. The SSRCF includes a \$25.0 million sub-limit for the issuance of swingline loans and a \$100.0 million sub-limit to be used for letters of credit. There is a foreign currency limit of \$100.0 million under the SSRCF which can be used for foreign currency denominated letters of credit and borrowings in a foreign currency, in each case in currencies agreed upon with the lenders. In addition, the facility permits borrowings up to \$100.0 million made by the Company's wholly-owned subsidiaries, Chart Industries Luxembourg S.à r.l. ("Chart Luxembourg") and Chart Asia Investment Company Limited. The SSRCF also includes an expansion option permitting the Company to add up to an aggregate \$200.0 million in term loans or revolving credit commitments from its lenders. Loans under the SSRCF bear interest at LIBOR or the Adjusted Base Rate as defined in the Debt and Credit Arrangements note (Note 7) to our consolidated financial statements included elsewhere in this report, plus a margin that varies with the Company's leverage ratio. Significant financial covenants for the SSRCF include a leverage ratio and an interest coverage ratio. The Company had \$37.2 million in letters of credit and bank guarantees supported by the SSRCF, which had availability of \$412.8 million, at December 31, 2016. The Company was in compliance with all covenants, including its financial covenants, at December 31, 2016.

Foreign Facilities – China: Chart Cryogenic Engineering Systems (Changzhou) Company Limited ("CCESC"), Chart Energy & Chemicals Wuxi Co., Ltd. ("Wuxi") and Chart Biomedical (Chengdu) Co. Ltd. ("Chengdu"), wholly-owned subsidiaries of the Company, and Chart Cryogenic Distribution Equipment (Changzhou) Company Limited ("CCDEC"), a joint venture of the Company, maintain joint banking facilities (the "China Facilities") which include a revolving facility with 50.0 million Chinese yuan (equivalent to \$7.2 million) in borrowing capacity which can be utilized for either revolving loans, bonds/guarantees, or bank draft acceptances. Any borrowings made by CCESC, CCDEC, Chengdu or Wuxi under the China Facilities are guaranteed by the Company. At December 31, 2016, there were no borrowings outstanding under the revolving facility but, CCESC and CCDEC had 7.5 million Chinese yuan (equivalent to \$1.1 million) and 0.8 million Chinese yuan (equivalent to \$0.1 million) in bank guarantees, respectively.

CCDEC maintains an unsecured credit facility whereby CCDEC may borrow up to 30.0 million Chinese yuan (equivalent to \$4.3 million) for working capital purposes. This credit facility is effective until May 25, 2017. At December 31, 2016, there was 25.0 million Chinese yuan (equivalent to \$3.6 million) outstanding under this facility, bearing interest at 4.35%.

CCESC entered into a term loan during the second quarter of 2016. The term loan is secured by certain CCESC land use rights and allows for up to 86.6 million Chinese yuan (equivalent to \$12.5 million) in borrowings. The loan has a term of eight years with semi-annual installment payments of at least 10.0 million Chinese yuan and a final maturity date of May 26, 2024. At December 31, 2016, there was 66.6 million Chinese yuan (equivalent to \$9.6 million) outstanding on this loan, bearing interest at 5.39%.

Foreign Facilities – Europe: Chart Ferox, a.s. (“Ferox”), a wholly-owned subsidiary of the Company, maintains a secured credit facility with capacity of up to 125.0 million Czech koruna (equivalent to \$4.9 million) and two secured credit facilities with capacity of up to 6.5 million euros (equivalent to \$6.9 million). All three facilities allow Ferox to request bank guarantees and letters of credit. None of these facilities allow revolving credit borrowings. Under two of the facilities, Ferox must pay letter of credit and guarantee fees equal to 0.70% per annum on the face amount of each guarantee or letter of credit and under one facility Ferox must pay the letter of credit and guarantee fees equal to 0.50%. Ferox’s land, buildings, and cash collateral secure the credit facilities. As of December 31, 2016, there were bank guarantees of 155.4 million Czech koruna (equivalent to \$6.1 million) supported by the Ferox credit facilities.

Chart Luxembourg maintains an overdraft facility with \$5.0 million in borrowing capacity. There were no borrowings under the Chart Luxembourg facility as of December 31, 2016.

Our debt and related covenants are further described in Note 7 to our consolidated financial statements included elsewhere in this report.

Sources and Uses of Cash

Our cash and cash equivalents totaled \$282.0 million as of December 31, 2016, an increase of \$158.3 million from the balance at December 31, 2015. Our foreign subsidiaries held cash of approximately \$72.9 million and \$71.9 million at December 31, 2016 and December 31, 2015, respectively, to meet their liquidity needs. No material restrictions exist in accessing cash held by our foreign subsidiaries. We expect to meet our U.S. funding needs without repatriating non-U.S. cash and incurring incremental U.S. taxes. Cash equivalents are invested in money market funds that invest in high quality, short-term instruments, such as U.S. government obligations, certificates of deposit, repurchase obligations, and commercial paper issued by corporations that have been highly rated by at least one nationally recognized rating organization. We believe that our existing cash and cash equivalents, funds available under our SSRCF and cash provided by operations will be sufficient to finance our normal working capital needs, acquisitions and investments in properties, facilities, and equipment for the foreseeable future.

Years Ended December 31, 2016 and 2015

Cash provided by operating activities during 2016 and 2015 was \$170.8 million and \$101.0 million, respectively. The increase in cash provided by operations is largely due to improvements in working capital, including greater cash collections during 2016, and reductions in inventory. Also, 2016 cash flows reflect the \$16.7 million receipt of the representation and warranty insurance recovery proceeds.

Cash used in investing activities was \$18.1 million and \$73.5 million during 2016 and 2015, respectively. Cash used in investing activities in 2016 was largely for capital expenditures. Investing activities in 2015 included capital expenditures of \$47.0 million and payments for land use rights of \$11.0 million, which were largely attributed to the D&S segment’s capacity expansion project in China. Also, in connection with this expansion, we received an \$8.7 million government grant. Additionally, we used \$24.5 million of cash related to the Thermax Inc. (“Thermax”) acquisition in 2015.

Cash provided by financing activities during 2016 and 2015 was \$7.7 million and \$0.4 million, respectively. During 2016, we borrowed 111.6 million Chinese yuan (equivalent to \$17.0 million) and repaid 60.0 million Chinese yuan (equivalent to \$9.0 million) on our China Facilities. We used \$0.7 million for the purchase of common stock which was surrendered to cover tax withholdings during 2016. Also during 2016, we received \$0.4 million in proceeds from stock option exercises.

Years Ended December 31, 2015 and 2014

Our cash and cash equivalents totaled \$123.7 million as of December 31, 2015, an increase of \$20.0 million from the balance at December 31, 2014.

Cash provided by operating activities during 2015 and 2014 was \$101.0 million and \$118.6 million, respectively. The decrease in cash provided by operations was due to lower income from operations, partially offset by lower investment in working capital.

Cash used in investing activities was \$73.5 million and \$72.5 million during 2015 and 2014, respectively. Capital expenditures and payments for land use rights were \$47.0 million and \$11.0 million, respectively, during 2015, primarily for a D&S segment capacity expansion project in China for which we also received an \$8.7 million government grant. Also during 2015, we used \$24.5 million of cash relating to the Thermax acquisition.

Cash provided by financing activities during 2015 was \$0.4 million and cash used in financing activities during 2014 was \$70.7 million. During 2015, we borrowed and repaid \$66.4 million on our SSRCF. We also borrowed 15.0 million Chinese yuan (equivalent to \$2.4 million) and repaid 5.0 million Chinese yuan (equivalent to \$0.8 million) on our China Facilities. Also during 2015, we received \$0.5 million in proceeds from stock option exercises. We used \$0.9 million for the purchase of common stock

which was surrendered to cover tax withholdings during 2015. Other uses of cash included a \$0.6 million contingent consideration payment related to a prior acquisition.

Cash Requirements

We do not currently anticipate any unusual cash requirements for working capital needs for the year ending December 31, 2017. Management anticipates we will be able to satisfy cash requirements for our ongoing business for the foreseeable future with cash generated by operations, existing cash balances and available borrowings under our credit facilities. We may repurchase a portion of our Convertible Notes on the open market to the extent permitted by our debt covenants with available cash. We expect capital expenditures for 2017 to be in the range of \$35.0 to \$45.0 million, which will be deployed primarily for an expansion of the brazed aluminum heat exchanger facility in La Crosse, Wisconsin, as well as cost saving improvement projects and routine maintenance across all businesses. In January 2017, we used approximately \$22 million to acquire Hetsco, Inc. as further described in the Subsequent Events footnote to the consolidated financial statements. In 2017, we contemplate the use of approximately \$10.0 to \$20.0 million of cash to pay U.S. and foreign income taxes.

Contractual Obligations

Our known contractual obligations as of December 31, 2016 and cash requirements resulting from those obligations are as follows (all dollar amounts in thousands):

	Payments Due by Period				
	Total	Less Than 1 Year	1 – 3 Years	3 – 5 Years	More Than 5 Years
Gross debt ⁽¹⁾	\$ 263,208	\$ 6,487	\$ 256,721	\$ —	\$ —
Long-term Convertible Notes interest	8,000	5,000	3,000	—	—
Operating leases	41,300	9,800	15,600	9,100	6,800
Severance	7,600	7,600	—	—	—
Pension obligations ⁽²⁾	5,800	—	3,300	2,500	—
Total contractual cash obligations	\$ 325,908	\$ 28,887	\$ 278,621	\$ 11,600	\$ 6,800

⁽¹⁾ The \$250,000 principal balance of the Convertible Notes will mature on August 1, 2018.

⁽²⁾ The planned funding of the pension obligations is based upon actuarial and management estimates taking into consideration the current status of the plan.

Not included in the table above are unrecognized tax benefits of \$0.8 million at December 31, 2016 and contingent consideration arrangements from prior acquisitions with a maximum potential payout of \$11.3 million.

Our commercial commitments as of December 31, 2016, which include standby letters of credit and bank guarantees, represent potential cash requirements resulting from contingent events that require performance by us or our subsidiaries pursuant to funding commitments, and are as follows (all dollar amounts in thousands):

	Total	Expiring in 2017	Expiring in 2018 and beyond
Standby letters of credit	\$ 28,235	\$ 9,520	\$ 18,715
Bank guarantees	16,447	9,152	7,295
Total commercial commitments	\$ 44,682	\$ 18,672	\$ 26,010

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements.

Contingencies

We are involved with environmental compliance, investigation, monitoring, and remediation activities at certain of our operating facilities or formerly owned manufacturing facilities and accrue for these activities when commitments or remediation plans have been developed and when costs are probable and can be reasonably estimated. Historical annual cash expenditures for these activities have been charged against the related environmental reserves. Future expenditures relating to these environmental remediation efforts are expected to be made over the next 12 years as ongoing costs of remediation programs. Management

believes that any additional liability in excess of amounts accrued, which may result from the resolution of such matters, should not have a material adverse effect on our financial position, liquidity, cash flows or results of operations.

We are occasionally subject to various legal claims related to performance under contracts, product liability, taxes, employment matters, environmental matters, intellectual property, and other matters, several of which claims assert substantial damages, in the ordinary course of our business. Based on our historical experience in litigating these claims, as well as our current assessment of the underlying merits of the claims and applicable insurance, if any, we believe the resolution of these legal claims will not have a material adverse effect on our financial position, liquidity, cash flows or results of operations. Future developments may, however, result in resolution of these legal claims in a way that could have a material adverse effect. See Item 1A. “Risk Factors” and Item 3. “Legal Proceedings” for further information.

Foreign Operations

During 2016, we had operations in Asia, Australia, Europe, and South America, which accounted for approximately 32% of consolidated sales and 25% of total assets at December 31, 2016. Functional currencies used by these operations include the U.S. dollar, Chinese yuan, the euro, the British pound, and the Japanese yen. We are exposed to foreign currency exchange risk as a result of transactions by these subsidiaries in currencies other than their functional currencies, and from transactions by our domestic operations in currencies other than the U.S. dollar. The majority of these functional currencies and the other currencies in which we record transactions are fairly stable, although we experienced variability in the current year as more fully discussed in Item 7A. The use of these currencies, combined with the use of foreign currency forward purchase and sale contracts, has enabled us to be sheltered from significant gains or losses resulting from foreign currency transactions. This situation could change if these currencies experience significant fluctuations or the volume of forward contracts changes.

Application of Critical Accounting Policies

Our consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles and are based on the selection and application of significant accounting policies, which require management to make estimates and assumptions about future events that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ materially from those estimates. Management believes the following are the more critical judgmental areas in the application of its accounting policies that affect its financial position and results of operations.

Goodwill and Indefinite-Lived Intangible Assets. We evaluate goodwill and indefinite-lived intangible assets for impairment on an annual basis, as of October 1 or whenever events or changes in circumstances indicate that an evaluation should be completed. A significant amount of judgment is involved in determining if an indicator of impairment has occurred. Such indicators may include deterioration in general economic conditions, negative developments in equity and credit markets, a decline in stock price and market capitalization, adverse changes in the markets in which we operate, and a trend of negative or declining cash flows over multiple periods. The fair value that could be realized in an actual transaction may differ from that used to evaluate the impairment of goodwill.

Goodwill is analyzed on a reporting unit basis. The reporting units are the same as our operating and reportable segments: E&C, D&S and BioMedical. We first evaluate qualitative factors, such as macroeconomic conditions and our overall financial performance to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount, including goodwill. We then evaluate how significant each of the identified factors could be to the fair value or carrying amount of a reporting unit and weigh these factors in totality in forming a conclusion of whether or not it is more likely than not that the fair value of a reporting unit is less than its carrying amount (the “Step 0 Test”). If we determine that it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, the first and second steps of the goodwill impairment test are not necessary. Otherwise, we would perform the first step of the two-step goodwill impairment test.

Alternatively, we may also bypass the Step 0 Test and proceed directly to the two-step goodwill impairment test. Under the first step (“Step 1”), we estimate the fair value of our reporting units by considering income and market approaches to develop fair value estimates, which are weighted to arrive at a fair value estimate for each reporting unit. With respect to the income approach, a model has been developed to estimate the fair value of each reporting unit. This fair value model incorporates estimates of future cash flows, estimates of allocations of certain assets and cash flows among reporting units, estimates of future growth rates, and management’s judgment regarding the applicable discount rates to use to discount such estimates of cash flows. With respect to the market approach, a guideline company method is employed whereby pricing multiples are derived from companies with similar assets or businesses to estimate fair value of each reporting unit. If the fair value of the reporting unit exceeds the carrying amount of the net assets assigned to that reporting unit, then goodwill is not impaired and no further testing is required. However, if the fair value of the reporting unit is less than its carrying amount, we perform the second step (“Step 2”) of the goodwill impairment test to measure the amount of impairment loss, if any, to recognize.

In Step 2, the implied fair value of the reporting unit's goodwill is determined by allocating the reporting unit's fair value to the assets and liabilities, other than goodwill, in a hypothetical purchase price allocation. The resulting implied fair value is then compared to the carrying amount of the goodwill and if the carrying amount exceeds the implied fair value, an impairment charge is recorded for the difference.

In order to assess the reasonableness of the calculated fair values of our reporting units, we also compare the sum of the reporting units' fair values to our market capitalization and calculate an implied control premium (the excess of the sum of the reporting units' fair values over the market capitalization). We evaluate the control premium by comparing it to control premiums of recent comparable transactions. If the implied control premium is not reasonable in light of this assessment, we reevaluate our fair value estimates of the reporting units by adjusting the discount rates and other assumptions as necessary.

Changes to the assumptions and estimates used throughout the steps described above may result in a significantly different estimate of the fair value of the reporting units, which could result in a different assessment of the recoverability of goodwill and result in future impairment charges.

With respect to indefinite-lived intangible assets, we first evaluate relevant events and circumstances to determine whether it is more likely than not that the fair value of an indefinite-lived intangible asset is less than its carrying amount. If, in weighing all relevant events and circumstances in totality, we determine that it is not more likely than not that an indefinite-lived intangible asset is impaired, no further action is necessary. Otherwise, we would determine the fair value of indefinite-lived intangible assets and perform a quantitative impairment assessment by comparing the indefinite-lived intangible asset's fair value to its carrying amount. We may bypass such a qualitative assessment and proceed directly to the quantitative assessment. We estimate the fair value of our indefinite-lived assets using the income approach. This may include the relief from royalty method or use of a model similar to the one described above related to goodwill which estimates the future cash flows attributed to the indefinite-lived intangible asset and then discounting these cash flows back to a present value. Under the relief from royalty method, fair value is estimated by discounting the royalty savings, as well as any tax benefits related to ownership to a present value. The fair value from either approach is compared to the carrying value and an impairment is recorded if the fair value is determined to be less than the carrying value.

2016 Goodwill and Indefinite-Lived Intangible Assets Impairment Assessment

As of October 1, 2016 ("annual assessment date") we elected to bypass the Step 0 test and based on our Step 1 test, we determined that the fair value of each of our reporting units was greater than its respective carrying value and, therefore, the second step of the goodwill impairment test was not necessary. Our D&S reporting unit passed the Step 1 test with an estimated fair value within 10% to 20% of its carrying value. Furthermore, as of the annual assessment date, we also elected to bypass the qualitative assessment for the indefinite-lived intangible assets and based on our quantitative assessment, we determined that the fair value of each of the indefinite-lived intangible assets was greater than its respective carrying value, therefore, no further action was necessary.

Goodwill at December 31, 2016 is \$218.0 million (attributed to the segments as follows: E&C - \$27.9 million; D&S - \$165.5 million; and BioMedical \$24.6 million).

2015 Goodwill and Indefinite-Lived Intangible Assets Impairment Assessment

We performed an interim impairment assessment in the third quarter of 2015 and as a result of that assessment, we noted that the estimated fair values of our D&S and BioMedical reporting units were within 10% to 20% of their carrying values. We anticipated at that time that the fair values of each reporting unit would increase over time; however, as outlined below, projected additional declines in the operating results of each reporting unit (including E&C) were identified in the annual forecasting process in November and December of 2015.

We quantitatively evaluated indefinite-lived intangible assets as part of the impairment testing. As a result of these tests, we recorded goodwill and indefinite-lived intangible asset impairment charges in the fourth quarter of 2015 as management concluded that the goodwill and certain indefinite-lived intangible assets within each reporting unit were impaired. The total goodwill and indefinite-lived impairment charges in the fourth quarter of 2015 were \$207.7 million (attributed to the segments as follows: E&C - \$65.0 million, D&S - \$0.3 million and BioMedical - \$142.3 million).

Key factors that affected our conclusion that impairment indicators had occurred during the fourth quarter included the continued significant decline in the energy markets, a continued decline in economic activity in China, and the deferral of large capital expenditures by many companies given macroeconomic uncertainties. Each of these factors, as further described below, have a material direct impact on the operating results of our reporting units. These factors contributed significantly to less favorable longer-term forecasted operating results. Management prepares its annual forecast mid-November through December each year. As the 2016 forecast was developed, management considered many factors when assessing the outlook for 2016 and beyond.

Because of these factors, management revised its forecasts down significantly, which led to the impairment charges described below. In addition to the items considered for each reporting unit below, management also considered the sustained decline in the Company's market capitalization. The Company's stock price was \$95.64 on December 31, 2013, \$34.20 on December 31, 2014 and \$17.96 on December 31, 2015.

Based on the results of Step 1, we determined that the E&C and BioMedical reporting units failed Step 1; and, therefore, we performed a Step 2 analysis for these reporting units. Our D&S reporting unit passed the Step 1 test with an estimated fair value within 10% of its carrying value. Discount rates used to present value the forecasted cash flows ranged from 14.0% to 16.5% for the reporting units.

Goodwill and indefinite-lived intangible assets within the E&C reporting unit were impaired \$65.0 million as a result of revised estimates developed during our annual forecasting process. The revised estimates were the result of the following: 1) continued significant decline in energy prices during the fourth quarter which led to a significant reduction in expected order levels as LNG projects were cancelled or deferred, which impacted our longer-term forecasts; 2) in late 2015, the Company received notification of delays in major projects from several large customers; and 3) concerns with global growth, recent negative macroeconomic developments and highly competitive market conditions.

Indefinite-lived intangible assets within the D&S reporting unit were impaired \$0.3 million as a result of revised estimates developed during our annual forecasting process.

Goodwill and indefinite-lived intangible assets within the BioMedical reporting unit were impaired \$142.3 million as a result of revised estimates developed during our annual forecasting process. The revised estimates were the result of the following: 1) realization that the effects of Medicare competitive bidding, including the reduction of reimbursement rates and the subsequent consolidation of our customers, can no longer be considered temporary and will have lasting negative impacts on the growth of the homecare industry and their suppliers; 2) increased rivalry with competitive technology; and 3) concerns with global growth and recent negative macroeconomic developments.

Remaining goodwill at December 31, 2015 was \$218.4 million (attributed to the segments as follows: E&C - \$27.9 million, D&S - \$165.9 million, and BioMedical - \$24.6 million). Remaining indefinite-lived intangible assets at December 31, 2015 were \$35.7 million. A significant amount of judgment was used in the analyses prepared for goodwill and indefinite-lived impairment testing. If further indicators of impairment occur, or if results of operations for the reporting units are below the developed forecasts, management may determine that further impairment charges are necessary.

Long-Lived Assets. We monitor our property, plant and equipment, and finite-lived intangible assets for impairment indicators on an ongoing basis. If impairment indicators exist, assets are grouped and tested at the lowest level for which identifiable cash flows are available and the Company performs the required analysis and records impairment charges if applicable. In conducting its analysis, the Company compares the undiscounted cash flows expected to be generated from the long-lived assets to the related net book values. If the undiscounted cash flows exceed the net book value, the long-lived assets are considered not to be impaired. If the net book value exceeds the undiscounted cash flows, an impairment loss is measured and recognized. An impairment loss is measured as the difference between the net book value and the fair value of the long-lived assets. Fair value is estimated from discounted future net cash flows (for assets held for use) or net realizable value (for assets held for sale). In assessing the recoverability of our long-lived assets, a significant amount of judgment is involved in estimating the future cash flows, discount rates and other factors necessary to determine the fair value of the respective assets. If these estimates or the related assumptions change in the future, we may be required to record impairment charges for these assets in the period such determination was made. The Company amortizes intangible assets that have finite lives over their estimated useful lives.

2016 Long-Lived Asset Impairments

During the third quarter of 2016, the Company identified impairment indicators that suggest the carrying value of a certain asset group in China within the D&S segment may not be recoverable. The primary impairment indicators included recently completed projections of future cash flows and the associated impact on the long-range strategic plan forecasts, lower than expected cash flows attributed to this asset group and poor market conditions. An undiscounted cash flow test performed for this asset group indicated it was not recoverable. The fair value of the asset group was established using a discounted cash flow model which utilized Level 3 inputs in the fair value hierarchy. As a result of the long-lived asset impairment assessment performed, the Company recorded long-lived asset impairment charges on its D&S reporting unit of \$1.2 million. The impairment charges were \$0.5 million related to finite-lived intangible assets and \$0.7 million related to tangible property, plant and equipment. There were no remaining long-lived assets recorded on the consolidated balance sheet for this asset group as of December 31, 2016.

Additionally, during the third quarter of 2016, events and circumstances indicated that other tangible property, plant and equipment in China within our D&S segment might be impaired. However, the Company's estimate of undiscounted cash flows indicated that such carrying values were expected to be recovered. Nonetheless, it is reasonably possible that the estimate of

undiscounted cash flows may negatively change in the near term, which may result in the need to write down these assets to fair value. The Company's estimate of cash flows may change in the future due to poor market conditions and excess capacity in the industry.

2015 Long-Lived Asset Impairments

During the fourth quarter of 2015, we identified impairment indicators described above in the *Goodwill and Indefinite-Lived Intangible Assets* section that suggest the carrying values of certain asset groups within each segment may not be recoverable. The primary indicators include projections of future cash flows and the associated impact on our long-range strategic plan forecasts, lower than expected cash flows attributed to certain asset groups, increased competition, the continued decline in energy prices, and our lower market capitalization. As a result of the analyses, we recorded \$38.1 million of impairment charges for finite-lived intangible assets related to the BioMedical segment (attributed to customer relationships – \$15.7 million and unpatented technology – \$22.4 million). We also impaired \$3.9 million of BioMedical property, plant and equipment. The BioMedical impairment charges were due to reductions in expected future cash flows associated with the respiratory product lines. We impaired \$3.8 million of E&C property, plant and equipment due to reductions in expected future cash flows associated with certain assets in China. The results of impairment analyses in 2015 for other asset groups in the D&S and E&C segments indicated recoverability of their carrying value.

Defined Benefit Pension Plan. We sponsor one defined benefit pension plan which has been frozen since February 2006. The funded status is measured as the difference between the fair value of the plan assets and the projected benefit obligation. We recognize the change in the funded status of the plan in the year in which the change occurs through accumulated other comprehensive loss. Our funding policy is to contribute at least the minimum funding amounts required by law. We have chosen policies according to accounting guidance that allow the use of a calculated value of plan assets (which is further described below), which generally reduces the volatility of expense (income) from changes in pension liability discount rates and the performance of the pension plans' assets.

A significant element in determining our pension expense in accordance with accounting guidance is the expected return on plan assets. We have assumed that the expected long-term rate of return on plan assets as of December 31, 2016 and 2015 was 7.0% and 7.25%, respectively. The expected return assumptions were developed using an averaging formula based upon the plans' investment guidelines, mix of asset classes, historical returns of equities and bonds, and expected future returns. We believe our assumptions for expected future returns are reasonable. However, we cannot guarantee that we will achieve these returns in the future. The assumed long-term rate of return on assets is applied to the market value of plan assets. This produces the expected return on plan assets that reduces pension expense. The difference between this expected return and the actual return on plan assets is deferred. The net deferral of past asset gains or losses affects future net periodic pension expense.

At the end of each year, we determine the rate to be used to discount plan liabilities. The discount rate reflects the current rate at which the pension liabilities could be effectively settled at the end of the year. In estimating this rate, we look to rates of return on high quality, fixed-income investments that receive one of the two highest ratings given by a recognized rating agency and the expected timing of benefit payments under the plan. At December 31, 2016 and 2015, we determined this rate to be 4.00%. Changes in discount rates over the past three years have not materially affected pension expense (income), and the net effect of changes in the discount rate, as well as the net effect of other changes in actuarial assumptions and experience, have been deferred and amortized over the expected future service of participants.

Assumptions as to the mortality of the plan participants is a key estimate in measuring expected payments a participant may receive over their lifetime and therefore, the amount of pension expense we will recognize. During 2014, the Society of Actuaries released a series of updated mortality tables resulting from recent studies conducted by them measuring mortality rates for various groups of individuals. The updated mortality tables reflected improved trends in longevity and therefore have had the effect of increasing the estimate of benefits to be received by the plan participants. We adopted these updated mortality assumptions which contributed to the increased benefit obligation at December 31, 2014. During 2015 and 2016, the Society of Actuaries updated the mortality tables which reflected additional improvements in mortality than the 2014 mortality tables. We adopted these updated assumptions which did not have a significant impact on the benefit obligation at December 31, 2016.

At December 31, 2016, our consolidated net pension liability recognized was \$14.4 million, a decrease of \$2.9 million from December 31, 2015. This decrease in the liability was due to improved pension asset returns, as well as a contribution of \$1.0 million during 2016. Benefit payments were \$3.9 million in fiscal 2016. We recognized approximately \$1.0 million and \$0.5 million in net periodic pension expense for the year ended December 31, 2016 and 2015, respectively, and \$0.4 million in net periodic pension income for the year ended December 31, 2014. See Note 15 to our consolidated financial statements included elsewhere in this report for further information.

Product Warranties. We provide product warranties with varying terms and durations for the majority of our products. We estimate product warranty costs and accrue for these costs as products are sold with a charge to cost of sales. Factors considered

in estimating warranty costs include historical and projected warranty claims, historical and projected cost-per-claim and knowledge of specific product issues that are outside of our typical experience. Warranty accruals are evaluated and adjusted as necessary based on actual claims experience and changes in future claim and cost estimates.

As a result of the BioMedical segment's acquisition of AirSep in August 2012, the Company assumed exposure for warranty claims for AirSep's various product lines. One of these product lines in particular experienced high failure rates with respect to certain of its models and designs as compared to AirSep's other products. The Company established a warranty reserve on AirSep's opening balance sheet to account for the cost of satisfying future warranty claims, including a separately calculated warranty reserve for those certain models and designs in the product line that experienced greater warranty return rates (collectively, the "acquired warranty reserve"). The Company has experienced a significant number of warranty claims as AirSep products sold in prior periods run through their respective warranty periods. Usage of the acquired warranty reserve includes claims related to all of AirSep's product lines, including costs associated with the population of units for which a warranty reserve was separately calculated. Usage of the acquired warranty reserve has exceeded warranty expense since the acquisition. The Company has made various design improvements to this product line, revised the warranty claim process, and reduced the average cost to repair units since the 2012 acquisition, all in an effort to mitigate the costs associated with these warranty issues. The Company does not expect future warranty expense to be as significant as it has been since the acquisition.

During the third quarter of 2016, the Company recovered for breaches of representations and warranties primarily related to warranty costs for certain product lines acquired in the acquisition of AirSep under the related representation and warranty insurance. This reduced our BioMedical segment's cost of sales by \$15.1 million.

Changes in assumptions used to calculate the warranty reserve estimates, including the number of expected warranty claims, the costs of satisfying those claims, or other issues, could materially affect our financial position and results from operations in future periods.

Revenue Recognition — Long-Term Contracts. We recognize revenue and gross profit as work on certain long-term contracts progresses using the percentage of completion method of accounting, which relies on estimates of total expected contract revenues and costs. We follow this method since reasonably dependable estimates of the revenue and costs applicable to various stages of a contract can be made. Since the financial reporting of these contracts depends on estimates, which are assessed continually during the term of the contract, recognized revenues and profit are subject to revisions as the contract progresses toward completion. Revisions in profit estimates are reflected in the period in which the facts that give rise to the revision become known. Accordingly, favorable changes in estimates result in additional profit recognition, and unfavorable changes will result in the reversal of previously recognized revenue and profits. When estimates indicate a loss is expected to be incurred under a contract, cost of sales is charged with a provision for the full loss immediately. As work progresses under a loss contract, revenue and cost of sales continue to be recognized in equal amounts, and the excess of costs over revenues is charged to the contract loss reserve. Change orders resulting in additional revenue and profit are recognized upon approval by the customer based on the percentage that incurred costs to date bear to total estimated costs at completion. Pre-contract costs relate primarily to salaries and benefits incurred to support the selling effort and, accordingly, are expensed as incurred. Certain contracts include incentive-fee arrangements clearly defined in the agreement and are not recognized until earned. The percentage of completion method of accounting is primarily used in the E&C segment, although it is used on certain contracts in our D&S and BioMedical segments.

Recent Accounting Standards

Refer to the Significant Accounting Policies note (Note 2) to our consolidated financial statements included elsewhere in this report for disclosure regarding recent accounting standards.

Forward-Looking Statements

The Company is making this statement in order to satisfy the “safe harbor” provisions contained in the Private Securities Litigation Reform Act of 1995. This Annual Report on Form 10-K includes “forward-looking statements.” These forward-looking statements include statements relating to our business. In some cases, forward-looking statements may be identified by terminology such as “may,” “should,” “expects,” “anticipates,” “believes,” “projects,” “forecasts,” “continue” or the negative of such terms or comparable terminology. Forward-looking statements contained herein (including future cash contractual obligations, liquidity, cash flow, orders, results of operations, projected revenues, and trends, among other matters) or in other statements made by us are made based on management’s expectations and beliefs concerning future events impacting us and are subject to uncertainties and factors relating to our operations and business environment, all of which are difficult to predict and many of which are beyond our control, that could cause our actual results to differ materially from those matters expressed or implied by forward-looking statements. We believe that the following factors, among others (including those described under Item 1A. “Risk Factors”), could affect our future performance and the liquidity and value of our securities and cause our actual results to differ materially from those expressed or implied by forward-looking statements made by us or on our behalf:

- the cyclical nature of the markets which we serve and the vulnerability of those markets to economic downturns;
- the loss of, or a significant reduction or delay in purchases by, our largest customers;
- our ability to control our costs and successfully manage our operations;
- fluctuations in energy prices;
- competition in our markets;
- the potential for negative developments in the natural gas industry related to hydraulic fracturing;
- the impairment of our goodwill or other intangible assets;
- degradation of our backlog as a result of modification or termination of orders;
- our ability to successfully acquire or integrate companies that provide complementary products or technologies;
- governmental energy policies could change, or expected changes could fail to materialize;
- our ability to manage our fixed-price contract exposure;
- economic downturns and deteriorating financial conditions;
- our reliance on the availability of key supplies and services;
- changes in government health care regulations and reimbursement policies;
- litigation and disputes involving us, including the extent of product liability, warranty, contract, employment, intellectual property and environmental claims asserted against us;
- fluctuations in foreign currency exchange rates and interest rates;
- the loss of key employees;
- general economic, political, business and market risks associated with our global operations;
- our warranty reserves may not adequately cover our warranty obligations;
- technological security threats and our reliance on information systems;
- financial distress of third parties;
- our ability to protect our intellectual property and know-how;
- United States Food and Drug Administration and comparable foreign regulation of our products;
- the pricing and availability of raw materials;
- claims that our products or processes infringe intellectual property rights of others;
- the cost of compliance with environmental, health and safety laws and responding to potential liabilities under these laws;
- additional liabilities related to taxes;
- our ability to continue our technical innovation in our product lines;
- the underfunded status of our pension plan;
- the risk of potential violations of the Foreign Corrupt Practices Act;
- increased government regulation;
- labor costs and disputes and the deterioration of our relations with our employees;
- disruptions in our operations due to severe weather;
- regulations governing the export of our products and other regulations applicable to us as a supplier of products to the U.S. government;

- fluctuations or adjustments in the Company's effective tax rate;
- risks associated with our indebtedness, leverage and liquidity;
- fluctuations in the price of our stock;
- potential dilution to existing holders of our common stock as a result of the conversion of our Convertible Notes and the need to utilize our cash balances and/or credit facility to fund any cash settlement related to such conversions; and
- other factors described herein.

There may be other factors that may cause our actual results to differ materially from the forward-looking statements.

All forward-looking statements attributable to us or persons acting on our behalf apply only as of the date of this Annual Report and are expressly qualified in their entirety by the cautionary statements included in this Annual Report. We undertake no obligation to update or revise forward-looking statements which may be made to reflect events or circumstances that arise after the filing date of this document or to reflect the occurrence of unanticipated events.

Item 7A. *Quantitative and Qualitative Disclosures About Market Risk*

In the normal course of business, the Company's operations are exposed to fluctuations in interest rates and foreign currency values that can affect the cost of operating and financing. Accordingly, the Company addresses a portion of these risks through a program of risk management.

Interest Rate Risk: The Company's primary interest rate risk exposure results from the SSRCF's various floating rate pricing mechanisms. As of December 31, 2016, there were no borrowings outstanding under the SSRCF. Based on zero borrowings at year-end, as well as historical borrowing practice under the SSRCF, the Company believes that interest rate exposure is not a material risk to the Company at this time.

Foreign Currency Exchange Rate Risk: The Company operates in the United States, Asia, Australia, Europe and South America, creating exposure to foreign currency exchange fluctuations in the normal course of business, which can impact our financial position, results of operations, cash flow and competitive position. The financial statements of foreign subsidiaries are translated into their U.S. dollar equivalents at end-of-period exchange rates for assets and liabilities, while income and expenses are translated at average monthly exchange rates. Translation gains and losses are components of other comprehensive income (loss) as reported in the consolidated statements of operations and comprehensive income (loss). Translation exposure is primarily with the euro, the Chinese yuan, and the Japanese yen. During 2016, the Chinese yuan and euro increased in relation to the U.S. dollar by 7% and 3%, respectively. During 2016, the Japanese yen decreased in relation to the U.S. dollar by 3%. At December 31, 2016, a hypothetical further 10% strengthening of the U.S. dollar would not materially affect the Company's financial statements.

Chart's primary transaction exchange rate exposures are with the euro, the Japanese yen, the Czech koruna, the Australian dollar, the British pound, and the Chinese yuan. Transaction gains and losses arising from fluctuations in currency exchange rates on transactions denominated in currencies other than the functional currency are recognized in the consolidated statements of operations as a component of foreign currency loss (gain). The Company enters into foreign exchange forward contracts to hedge anticipated and firmly committed foreign currency transactions. Chart does not use derivative financial instruments for speculative or trading purposes. The terms of the contracts are generally one year or less. At December 31, 2016, a hypothetical 10% weakening of the U.S. dollar would not materially affect the Company's outstanding foreign exchange forward contracts.

Market Price Sensitive Instruments

In connection with the issuance of the Convertible Notes, the Company entered into privately-negotiated convertible note hedge and capped call transactions with affiliates of certain of the underwriters (the "Option Counterparties"). The convertible note hedge and capped call transactions relate to, collectively, 3.6 million shares, which represents the number of shares of the Company's common stock underlying the Convertible Notes, subject to anti-dilution adjustments substantially similar to those applicable to the Convertible Notes. These convertible note hedge and capped call transactions are expected to reduce the potential dilution with respect to the Company's common stock upon conversion of the Convertible Notes and/or reduce the Company's exposure to potential cash or stock payments that may be required upon conversion of the Convertible Notes, except, in the case of the capped call transactions, to the extent that the market price per share of the Company's common stock exceeds the cap price of the capped call transactions.

The Company also entered into separate warrant transactions with the Option Counterparties initially relating to the number of shares of the Company's common stock underlying the convertible note hedge transactions, subject to customary anti-dilution adjustments. The warrant transactions will have a dilutive effect with respect to the Company's common stock to the extent that the price per share of the Company's common stock exceeds the strike price of the warrants unless the Company elects, subject to certain conditions, to settle the warrants in cash. The cap price of the capped call transactions and the strike price of the warrant

transactions was initially \$84.96 per share. Further information is located in Note 7 to the Company's consolidated financial statements included in Item 8 of this Annual Report on Form 10-K.

Item 8. *Financial Statements and Supplementary Data*

Our Financial Statements and the accompanying Notes that are filed as part of this Annual Report are listed under Item 15. "Exhibits and Financial Statement Schedules" and are set forth beginning on page F-1 immediately following the signature page of this Form 10-K and are incorporated into this Item 8 by reference.

Item 9. *Changes in and Disagreements With Accountants on Accounting and Financial Disclosure*

None.

Item 9A. *Controls and Procedures*

Evaluation of Disclosure Controls and Procedures

As of December 31, 2016, an evaluation was performed under the supervision and with the participation of the Company's management including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Rule 13a-15 under the Securities and Exchange Act of 1934, as amended (the "Exchange Act"). Based upon that evaluation, such officers concluded that the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in the reports it files or submits under the Exchange Act (1) is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and (2) is accumulated and communicated to the Company's management including the Chief Executive Officer and Chief Financial Officer, as appropriate to allow for timely decisions regarding required disclosure.

Management's Report on Internal Control Over Financial Reporting

Management's Report on Internal Control Over Financial Reporting is set forth on page F-1 of this Annual Report on Form 10-K and incorporated herein by reference. Management used the updated Internal Control-Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission to perform the evaluation.

The effectiveness of the Company's internal control over financial reporting as of December 31, 2016 has been audited by Ernst & Young LLP, an independent registered public accounting firm, as stated in its report which is set forth in Item 8. "Financial Statements and Supplementary Data," on page F-3 under the caption "Report of Independent Registered Public Accounting Firm" and incorporated herein by reference.

Changes in Internal Control over Financial Reporting

There were no changes in the Company's internal control over financial reporting that occurred during the Company's most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 9B. *Other Information*

Not applicable.

PART III

Item 10. *Directors, Executive Officers and Corporate Governance*

Information required by this item as to the Directors of the Company appearing under the caption “Election of Directors” in the Company’s 2017 Proxy Statement is incorporated herein by reference. Information required by this item as to the Executive Officers of the Company is included as Item 4A of this Annual Report on Form 10-K as permitted by Instruction 3 to Item 401(b) of Regulation S-K. Information required by Item 405 is set forth in the 2017 Proxy Statement under the heading “Section 16(a) Beneficial Ownership Reporting Compliance,” which information is incorporated herein by reference. Information required by Items 406 and 407(c)(3), (d)(4) and (d)(5) of Regulation S-K is set forth in the 2017 Proxy Statement under the headings “Information Regarding Meetings and Committees of the Board of Directors,” “Code of Ethical Business Conduct and Officer Code of Ethics” and “Stockholder Communications with the Board,” which information is incorporated herein by reference.

The Charters of the Audit Committee, Compensation Committee and Nominations and Corporate Governance Committee and the Corporate Governance Guidelines, Officer Code of Ethics and Code of Ethical Business Conduct are available free of charge on the Company’s website at www.chartindustries.com and in print to any stockholder who requests a copy. Requests for copies should be directed to Secretary, Chart Industries, Inc., One Infinity Corporate Centre Drive, Suite 300, Garfield Heights, Ohio 44125. The Company intends to disclose any amendments to the Code of Ethical Business Conduct or Officer Code of Ethics and any waiver of the Code of Ethical Business Conduct or Officer Code of Ethics granted to any Director or Executive Officer of the Company on the Company’s website.

Item 11. *Executive Compensation*

The information required by Item 402 of Regulation S-K is set forth in the 2017 Proxy Statement under the heading “Executive and Director Compensation,” which information is incorporated herein by reference. The information required by Items 407(e)(4) and 407(e)(5) of Regulation S-K is set forth in the 2017 Proxy Statement under the headings “Compensation Committee Interlocks and Insider Participation” and “Compensation Committee Report,” respectively, which information is incorporated herein by reference.

Item 12. *Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters*

The information required by this item is set forth in the 2017 Proxy Statement under the headings “Security Ownership of Certain Beneficial Owners” and “Equity Compensation Plan Information,” which information is incorporated herein by reference.

Item 13. *Certain Relationships, Related Transactions, and Director Independence*

The information required by this item is set forth in the 2017 Proxy Statement under the headings “Related Party Transactions” and “Director Independence,” which information is incorporated herein by reference.

Item 14. *Principal Accounting Fees and Services*

The information required by this item is set forth in the 2017 Proxy Statement under the heading “Principal Accounting Fees and Services,” which information is incorporated herein by reference.

PART IV

Item 15. Exhibits and Financial Statement Schedules

(a) The following documents are filed as part of this 2016 Annual Report on Form 10-K:

1. *Financial Statements.* The following consolidated financial statements of the Company and its subsidiaries and the reports of the Company's independent registered public accounting firm are incorporated by reference in Item 8:

Management's Report on Internal Control over Financial Reporting

Reports of Independent Registered Public Accounting Firm

Consolidated Balance Sheets at December 31, 2016 and 2015

Consolidated Statements of Operations for the Years Ended December 31, 2016, 2015, and 2014

Consolidated Statements of Comprehensive Income (Loss) for the Years Ended December 31, 2016, 2015, and 2014

Consolidated Statements of Cash Flows for the Years Ended December 31, 2016, 2015, and 2014

Consolidated Statements of Equity for the Years Ended December 31, 2016, 2015, and 2014

Notes to Consolidated Financial Statements

2. *Financial Statement Schedules.* The following additional information should be read in conjunction with the consolidated financial statements:

Schedule II Valuation and Qualifying Accounts for the Years Ended December 31, 2016, 2015, and 2014

All other financial statement schedules have been omitted since they are either not required, not applicable, or the information is otherwise included.

3. *Exhibits.* See the Index to Exhibits at page E-1 of this Annual Report on Form 10-K.

**MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER
FINANCIAL REPORTING**

Management of Chart Industries, Inc. and its subsidiaries (the "Company") is responsible for establishing and maintaining adequate internal control over financial reporting. The Company's internal control over financial reporting is a process designed under the supervision of the Company's principal executive and financial officers to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the Company's financial statements for external reporting purposes in accordance with U.S. generally accepted accounting principles.

The Company's internal control over financial reporting includes policies and procedures that:

- Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect transactions and dispositions of assets of the Company;
- Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and the directors of the Company; and
- Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the Company's financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies and procedures may deteriorate.

Management has assessed the effectiveness of its internal control over financial reporting as of December 31, 2016 based on the framework established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 Framework) (the "COSO criteria").

Based on this assessment, management has determined that the Company's internal control over financial reporting is effective as of December 31, 2016.

The effectiveness of the Company's internal control over financial reporting as of December 31, 2016 has been audited by Ernst & Young LLP, an independent registered public accounting firm, as stated in their report appearing below, which expresses an unqualified opinion on the effectiveness of the Company's internal control over financial reporting as of December 31, 2016.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of
Chart Industries, Inc. and Subsidiaries

We have audited the accompanying consolidated balance sheets of Chart Industries, Inc. and Subsidiaries as of December 31, 2016 and 2015, and the related consolidated statements of operations, comprehensive income (loss), equity, and cash flows for each of the three years in the period ended December 31, 2016. Our audits also included the financial statement schedule listed in the index at Item 15(a) 2. These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Chart Industries, Inc. and Subsidiaries at December 31, 2016 and 2015, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 31, 2016, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Chart Industries, Inc. and Subsidiaries' internal control over financial reporting as of December 31, 2016, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 Framework) and our report dated February 23, 2017 expressed an unqualified opinion thereon.

/S/ ERNST & YOUNG LLP

Cleveland, Ohio
February 23, 2017

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of
Chart Industries, Inc. and Subsidiaries

We have audited Chart Industries, Inc. and Subsidiaries' internal control over financial reporting as of December 31, 2016 based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 Framework) (the COSO criteria). Chart Industries, Inc. and Subsidiaries' management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Chart Industries, Inc. and Subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2016, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Chart Industries, Inc. and Subsidiaries as of December 31, 2016 and 2015, and the related consolidated statements of operations, comprehensive income (loss), equity, and cash flows for each of the three years in the period ended December 31, 2016, and our report dated February 23, 2017 expressed an unqualified opinion thereon.

The accompanying notes are an integral part of these consolidated financial statements.

CHART INDUSTRIES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Dollars and shares in thousands, except per share amounts)

NOTE 1 — Nature of Operations and Principles of Consolidation

Nature of Operations: Chart Industries, Inc. and its consolidated subsidiaries (herein referred to as the “Company,” “Chart” or “we”), is a leading diversified global manufacturer of highly engineered equipment for the industrial gas, energy, and biomedical industries. Chart’s equipment and engineered systems are primarily used for low-temperature and cryogenic applications utilizing our expertise in cryogenic systems and equipment which operate at low temperatures sometimes approaching absolute zero (0 Kelvin; -273° Centigrade; -459° Fahrenheit). The Company has domestic operations located across the United States, including principal executive offices located in Ohio, and an international presence in Asia, Australia, Europe and South America.

Principles of Consolidation: The consolidated financial statements include the accounts of the Company and its subsidiaries. Intercompany accounts and transactions are eliminated in consolidation.

Reclassifications: Certain reclassifications have been made to the 2015 and 2014 consolidated statements of cash flow in order to conform to the 2016 presentation.

The Company adopted Accounting Standards Update (“ASU”) 2015-03, “Interest–Imputation of Interest: Simplifying the Presentation of Debt Issuance Costs” for the fiscal year beginning January 1, 2016. The new guidance was applied retrospectively for the prior period presented. The impact of the adoption of the guidance resulted in classification of the unamortized debt issuance cost related to the convertible notes on the consolidated balance sheets in long-term debt. The unamortized debt issuance costs reclassified at December 31, 2015 were \$1,836. Debt issuance costs related to the Senior Secured Revolving Credit Facility are classified in other assets on the consolidated balance sheets. Refer to Note 2 for further information on this ASU.

NOTE 2 — Significant Accounting Policies

Use of Estimates: The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements. These estimates may also affect the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates and assumptions.

Cash and Cash Equivalents: The Company considers all investments with an initial maturity of three months or less when purchased to be cash equivalents.

Accounts Receivable, Net of Allowances: The Company evaluates the collectibility of accounts receivable based on a combination of factors. In circumstances where the Company is aware of a specific customer’s inability to meet its financial obligations (e.g., bankruptcy filings, or substantial downgrading of credit scores), a specific reserve is recorded to reduce the receivable to the amount the Company believes will be collected. The Company also records allowances for doubtful accounts based on historical experience. When collection of a specific amount due is deemed not probable, the account is written off against the allowance.

Inventories: Inventories are stated at the lower of cost or market with cost being determined by the first-in, first-out (“FIFO”) method. The Company determines inventory valuation reserves based on a combination of factors. In circumstances where the Company is aware of a specific problem in the valuation of a certain item, a specific reserve is recorded to reduce the item to its net realizable value. The Company also recognizes reserves based on the actual usage in recent history and projected usage in the near-term.

Property, Plant and Equipment: Capital expenditures for property, plant and equipment are recorded at cost. Expenditures for maintenance and repairs are charged to expense as incurred, whereas major improvements that extend the useful life are capitalized. The cost of applicable assets is depreciated over their estimated useful lives. Depreciation is computed using the straight-line method for financial reporting purposes and accelerated methods for income tax purposes.

Guarantees of Third-Party Performance: During the first quarter of 2016, the Company became a member to a consortium agreement relating to a project with a third-party. This agreement entails the Company guaranteeing not only its own performance, but also the work of a third-party consortium partner. In the event of non-fulfillment of contractual obligations by the consortium partner, the Company may be required to perform the obligations of the consortium partner. The agreement term covers the project through completion, approximately 1.5 years. At December 31, 2016, the estimated cost of the performance under this guarantee was 14.6 million euros (equivalent to \$15.4 million). If losses are incurred under the guarantee due to third-party non-performance,

CHART INDUSTRIES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(Dollars and shares in thousands, except per share amounts)

the Company has certain rights that would allow it to mitigate such losses. If necessary, the carrying amount of any liability recorded in the consolidated balance sheet would reflect the Company's best estimate of future payments which it may incur as part of fulfilling its guarantee obligation. There is no liability recorded at December 31, 2016.

Long-lived Assets: The Company monitors its property, plant, equipment, and finite-lived intangible assets for impairment indicators on an ongoing basis. If impairment indicators exist, assets are grouped and tested at the lowest level for which identifiable cash flows are available. The Company performs the required analysis and records impairment charges, if applicable. In conducting its analysis, the Company compares the undiscounted cash flows expected to be generated from the long-lived assets to the related net book values. If the undiscounted cash flows exceed the net book value, the long-lived assets are considered not to be impaired. If the net book value exceeds the undiscounted cash flows, an impairment loss is measured and recognized. An impairment loss is measured as the difference between the net book value and the fair value of the long-lived assets. Fair value is estimated from discounted future net cash flows (for assets held and used) or net realizable value (for assets held for sale). Changes in economic or operating conditions impacting these estimates and assumptions could result in the impairment of long-lived assets. The Company amortizes intangible assets that have finite lives over their estimated useful lives.

See Note 3, Asset Impairments, for more information relating to finite-lived intangible asset impairment losses recorded during 2016 and 2015.

Goodwill and Indefinite-Lived Intangible Assets: Goodwill is recognized as the excess cost of an acquired entity over the net amount assigned to assets acquired and liabilities assumed. The Company does not amortize goodwill or indefinite-lived intangible assets, but reviews them for impairment annually in the fourth quarter or whenever events or changes in circumstances indicate that an evaluation should be completed.

Goodwill is analyzed on a reporting unit basis. The reporting units are the same as the operating and reportable segments: Energy & Chemicals ("E&C"), Distribution & Storage ("D&S") and BioMedical. The Company first evaluates qualitative factors, such as macroeconomic conditions and the Company's overall financial performance to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount, including goodwill. The Company then evaluates how significant each of the identified factors could be to the fair value or carrying amount of a reporting unit and weigh these factors in totality in forming a conclusion of whether or not it is more likely than not that the fair value of a reporting unit is less than its carrying amount (the "Step 0 Test"). If the Company determines that it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, the first and second steps of the goodwill impairment test are not necessary. Otherwise, the Company would perform the first step of the two-step goodwill impairment test.

Alternatively, the Company may also bypass the Step 0 Test and proceed directly to the two-step goodwill impairment test. Under the first step ("Step 1"), the Company estimates the fair value of the reporting units by considering income and market approaches to develop fair value estimates, which are weighted to arrive at a fair value estimate for each reporting unit. With respect to the income approach, a model has been developed to estimate the fair value of each reporting unit. This fair value model incorporates estimates of future cash flows, estimates of allocations of certain assets and cash flows among reporting units, estimates of future growth rates and management's judgment regarding the applicable discount rates to use to discount such estimates of cash flows. With respect to the market approach, a guideline company method is employed whereby pricing multiples are derived from companies with similar assets or businesses to estimate fair value of each reporting unit. If the fair value of the reporting unit exceeds the carrying amount of the net assets assigned to that reporting unit, then goodwill is not impaired and no further testing is required. However, if the fair value of the reporting unit is less than its carrying amount, the Company performs the second step ("Step 2") of the goodwill impairment test to measure the amount of impairment loss, if any, to recognize.

In Step 2, the implied fair value of the reporting unit's goodwill is determined by allocating the reporting unit's fair value to the assets and liabilities, other than goodwill, in a hypothetical purchase price allocation. The resulting implied fair value is then compared to the carrying amount of the goodwill and if the carrying amount exceeds the implied fair value, an impairment charge is recorded for the difference.

In order to assess the reasonableness of the calculated fair values of the reporting units, the Company also compares the sum of the reporting units' fair values to the market capitalization and calculates an implied control premium (the excess of the sum of the reporting units' fair values over the market capitalization). The Company evaluates the control premium by comparing it to control premiums of recent comparable transactions. If the implied control premium is not reasonable in light of this assessment, the Company reevaluates the fair value estimates of the reporting units by adjusting the discount rates and other assumptions as necessary.

CHART INDUSTRIES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(Dollars and shares in thousands, except per share amounts)

Changes to the assumptions and estimates used throughout the steps described above may result in a significantly different estimate of the fair value of the reporting units, which could result in a different assessment of the recoverability of goodwill and result in future impairment charges.

With respect to indefinite-lived intangible assets, the Company first evaluates relevant events and circumstances to determine whether it is more likely than not that the fair value of an indefinite-lived intangible asset is less than its carrying amount. If, in weighing all relevant events and circumstances in totality, the Company determines that it is more likely than not that an indefinite-lived intangible asset is not impaired, no further action is necessary. Otherwise, the Company would determine the fair value of indefinite-lived intangible assets and perform a quantitative impairment assessment by comparing the indefinite-lived intangible asset's fair value to its carrying amount. The Company may bypass such a qualitative assessment and proceed directly to the quantitative assessment. The Company estimates the fair value of the indefinite-lived assets using the income approach. This may include the relief from royalty method or use of a model similar to the one described above related to goodwill which estimates the future cash flows attributed to the indefinite-lived intangible asset and then discounting these cash flows back to a present value. Under the relief from royalty method, fair value is estimated by discounting the royalty savings, as well as any tax benefits related to ownership to a present value. The fair value from either approach is compared to the carrying value and an impairment is recorded if the fair value is determined to be less than the carrying value.

See Note 3, Asset Impairments, and Note 6, Goodwill and Intangible Assets, for more information relating to goodwill and indefinite-lived intangible assets and the asset impairment charges recorded during 2016 and 2015.

Convertible Debt: The Company determined that the embedded conversion feature within the Company's 2.0% Convertible Senior Subordinated Notes due August 2018 (the "Convertible Notes") was clearly and closely related to the Company's common stock and therefore exempt from separate accounting treatment. Convertible Notes exempt from derivative accounting are recognized by bifurcating the principal balance into a liability component and an equity component where the fair value of the liability component is estimated by calculating the present value of its cash flows discounted at an interest rate that the Company would have received for similar debt instruments that have no conversion rights (the "straight-debt rate") and the equity component is the residual amount, net of tax, which creates a discount on the Convertible Notes. The Company recognizes non-cash interest accretion expense related to the carrying amount of the Convertible Notes which is accreted back to its principal amount over the expected life of the debt, which is also the stated life of the debt.

Financial Instruments: The fair values of cash equivalents, accounts receivable, accounts payable and short-term bank debt approximate their carrying amount because of the short maturity of these instruments.

To minimize credit risk from trade receivables, the Company reviews the financial condition of potential customers in relation to established credit requirements before sales credit is extended and monitors the financial condition and payment history of customers to help ensure timely collections and to minimize losses. Additionally, for certain domestic and foreign customers, particularly in the E&C segment, the Company requires advance payments, letters of credit, bankers' acceptances, and other such guarantees of payment. Certain customers also require the Company to issue letters of credit or performance bonds, particularly in instances where advance payments are involved, as a condition of placing the order.

Derivative Financial Instruments: The Company utilizes certain derivative financial instruments to enhance its ability to manage foreign currency risk that exists as part of ongoing business operations. Derivative instruments are entered into for periods consistent with related underlying exposures and do not constitute positions independent of those exposures. The Company does not enter into contracts for speculative purposes nor is it a party to any leveraged derivative instrument. The Company is exposed to foreign currency exchange risk as a result of transactions in currencies other than the functional currency of certain subsidiaries. The Company utilizes foreign currency forward purchase and sale contracts to manage the volatility associated with foreign currency purchases and certain intercompany transactions in the normal course of business. Contracts typically have maturities of less than one year. Principal currencies include the U.S. dollar, the euro, the Chinese yuan, the Czech koruna, the Australian dollar, the British pound, the Canadian dollar, and the Japanese yen. The Company's foreign currency forward contracts do not qualify as hedges as defined by accounting guidance. Foreign currency forward contracts are measured at fair value and recorded on the consolidated balance sheets as other current liabilities or assets. Changes in their fair value are recorded in the consolidated statements of operations as foreign currency gains or losses. The Company's foreign currency forward contracts are not exchange traded instruments and, accordingly, the valuation is performed using Level 2 inputs as defined in Note 11. Gains or losses on settled or expired contracts are recorded in the consolidated statements of operations as foreign currency gains or losses.

Product Warranties: The Company provides product warranties with varying terms and durations for the majority of its products. The Company estimates product warranty costs and accrues for these costs as products are sold with a charge to cost

CHART INDUSTRIES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(Dollars and shares in thousands, except per share amounts)

of sales. Factors considered in estimating warranty costs include historical and projected warranty claims, historical and projected cost-per-claim, and knowledge of specific product issues that are outside of typical experience. Warranty accruals are evaluated and adjusted as necessary based on actual claims experience and changes in future claim and cost estimates.

Revenue Recognition: For the majority of the Company's products, revenue is recognized when products are shipped, title has transferred, and collection is reasonably assured. For these products, there is also persuasive evidence of an arrangement and the selling price to the buyer is fixed or determinable. For brazed aluminum heat exchangers, cold boxes, liquefied natural gas fueling stations, engineered tanks, and commercial oxygen generation systems, the Company primarily uses the percentage of completion method of accounting. Earned revenue is based on the percentage of incurred costs to date compared to total estimated costs at completion after giving effect to the most current estimates. Timing of amounts billed on contracts varies from contract to contract and could cause significant variation in working capital needs. The cumulative impact of revisions in total cost estimates during the progress of work is reflected in the period in which these changes become known. Earned revenue reflects the original contract price adjusted for agreed upon claims and change orders, if any. Losses expected to be incurred on contracts in process, after consideration of estimated minimum recoveries from claims and change orders, are charged to operations as soon as such losses are known. Pre-contract costs relate primarily to salaries and benefits incurred to support the selling effort and are expensed as incurred. Change orders resulting in additional revenue and profit are recognized upon approval by the customer based on the percentage of incurred costs to date compared to total estimated costs at completion. Certain contracts include incentive-fee arrangements. The incentive fees in such contracts can be based on a variety of factors, but the most common are the achievement of target completion dates, target costs, and/or other performance criteria. Incentive-fee revenue is not recognized until it is earned.

The Company reports sales net of tax assessed by governmental authorities.

Cost of Sales: Manufacturing expenses associated with sales are included in cost of sales. Cost of sales includes all materials, direct and indirect labor, inbound freight, purchasing and receiving, inspection, internal transfers, and distribution and warehousing of inventory. In addition, shop supplies, facility maintenance costs, manufacturing engineering, project management, and depreciation expense for assets used in the manufacturing process are included in cost of sales on the consolidated statements of operations.

Selling, General and Administrative Expenses ("SG&A"): SG&A expenses include selling, marketing, customer service, product management, design engineering, and other administrative expenses not directly supporting the manufacturing process, as well as depreciation and amortization expense associated with non-manufacturing assets. In addition, SG&A expenses include corporate operating expenses for executive management, accounting, tax, treasury, corporate development, human resources, information technology, investor relations, legal, internal audit and risk management.

Shipping and Handling Costs: Amounts billed to customers for shipping are classified as sales, and the related costs are classified as cost of sales on the consolidated statements of operations. Shipping revenue of \$8,683, \$11,592, and \$8,855 for the years ended December 31, 2016, 2015, and 2014, respectively, are included in sales. Shipping costs of \$12,233, \$15,245, and \$15,913 for the years ended December 31, 2016, 2015, and 2014, respectively, are included in cost of sales.

Advertising Costs: The Company incurred advertising costs of \$4,702, \$5,074, and \$3,914 for the years ended December 31, 2016, 2015, and 2014, respectively. Such costs are expensed as incurred and included in SG&A expenses on the consolidated statements of operations.

Research and Development Costs: The Company incurred research and development costs of \$18,097, \$15,842, and \$15,588 for the years ended December 31, 2016, 2015, and 2014, respectively. Such costs are expensed as incurred and included in SG&A expenses on the consolidated statements of operations.

Foreign Currency Translation: The functional currency for the majority of the Company's foreign operations is the applicable local currency. The translation from the applicable foreign currencies to U.S. dollars is performed for asset and liability accounts using exchange rates in effect at the balance sheet date and for revenue and expense accounts using the average exchange rate during the period. The resulting translation adjustments are recorded as a component of other comprehensive income (loss) in the consolidated statements of comprehensive income (loss). Remeasurement from local to functional currencies is included in cost of goods sold or foreign currency loss (gain) on the consolidated statements of operations. Gains or losses resulting from foreign currency transactions are charged to operations as incurred.

Income Taxes: The Company and its U.S. subsidiaries file a consolidated federal income tax return. Deferred income taxes are provided for temporary differences between financial reporting and the consolidated tax return in accordance with the liability

CHART INDUSTRIES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(Dollars and shares in thousands, except per share amounts)

method. A valuation allowance is provided against net deferred tax assets when conditions indicate that it is more likely than not that the benefit related to such assets will not be realized. In assessing the need for a valuation allowance against deferred tax assets, the Company considers all available evidence, including past operating results, estimates of future taxable income, and the feasibility of tax planning strategies. In the event that the Company changes its determination as to the amount of deferred tax assets that can be realized, the valuation allowance will be adjusted with a corresponding impact to the provision for income taxes in the period in which such determination is made.

The Company utilizes a two-step approach for the recognition and measurement of uncertain tax positions. The first step is to evaluate the tax position and determine whether it is more likely than not that the position will be sustained upon examination by tax authorities. The second step is to measure the tax benefit as the largest amount that is more likely than not of being realized upon settlement.

Interest and penalties related to income taxes are accounted for as income tax expense on the consolidated statements of income.

Share-based Compensation: The Company measures share-based compensation expense for share-based payments to employees and directors, including grants of employee stock options, restricted stock, restricted stock units, performance units, and leveraged restricted share units based on the grant-date fair value. The fair value of stock options is calculated using the Black-Scholes pricing model and is recognized on an accelerated basis over the vesting period. The grant-date fair value calculation under the Black-Scholes pricing model requires the use of variables such as exercise term of the option, future volatility, dividend yield, and risk-free interest rate. The fair value of restricted stock and restricted stock units is based on the Company's market price on the date of grant and is generally recognized on an accelerated basis over the vesting period. The fair value of performance units is based on the Company's market price on the date of grant and pre-determined performance conditions as determined by the Compensation Committee of the Board of Directors and is recognized on straight-line basis over the performance measurement period based on the probability that the performance conditions will be achieved. The Company reassesses the vesting probability of performance units each reporting period and adjusts share-based compensation expense based on the Company's probability assessment. The fair value of leveraged restricted share units is based on market conditions, calculated using a Monte Carlo simulation model, and is recognized on a straight-line basis over the vesting period. Share-based compensation expense for all awards considers estimated forfeitures.

During the year, the Company may repurchase shares of common stock from equity plan participants to satisfy tax withholding obligations relating to the vesting or payment of equity awards. All such repurchased shares are retired in the period in which the repurchases occur.

Beginning in 2016, the Company allocates share-based compensation expense to each operating segment and maintains share-based compensation expense related to Corporate employees at Corporate. Prior to 2016, all share-based compensation expense was recorded at Corporate. Reclassifications from Corporate to the operating segments have been made to the 2015 and 2014 SG&A expenses to conform to the 2016 presentation.

Defined Benefit Pension Plan: The Company sponsors a defined benefit plan which is frozen, which covers certain U.S. employees. The funded status is measured as the difference between the fair value of the plan assets and the projected benefit obligation. The change in the funded status of the plan is recognized in the year in which the change occurs through accumulated other comprehensive loss. The Company's funding policy is to contribute at least the minimum funding amounts required by law. Management has chosen policies according to accounting guidance that allow the use of a calculated value of plan assets, which generally reduces the volatility of expense (income) from changes in pension liability discount rates and the performance of the pension plan's assets.

Recently Issued Accounting Standards: In January 2017, the Financial Accounting Standards Board ("FASB") issued ASU 2017-04, "Intangibles - Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment." The new guidance eliminates the requirement to calculate implied fair value of goodwill (Step 2 of the current guidance's goodwill impairment test) to measure a goodwill impairment charge. Instead, entities will record an impairment charge based on the excess of a reporting unit's carrying amount over its fair value (i.e. measure the charge based on current guidance's Step 1). The guidance will be applied prospectively for annual and interim impairment tests beginning after December 15, 2019. Early adoption is permitted for annual and interim goodwill impairment testing dates after January 1, 2017. The adoption of the provisions of this ASU would not materially impact the Company's consolidated financial statements unless Step 1 of the annual goodwill impairment test fails.

CHART INDUSTRIES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(Dollars and shares in thousands, except per share amounts)

In August 2016, the FASB issued ASU 2016-15, “Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments.” The FASB issued the update to clarify how entities should classify certain cash receipts and cash payments on the statement of cash flows. The new guidance also clarifies how the predominance principle should be applied when cash receipts and cash payments have aspects of more than one class of cash flows. The standard will be effective for fiscal years beginning after December 15, 2017 and interim periods within those years and the guidance will generally be applied retroactively. Early adoption is permitted with all of the amendments adopted in the same period. If an entity early adopts the guidance in an interim period, any adjustments must be reflected as of the beginning of the fiscal year that includes that interim period. The Company is currently assessing the effect that the ASU will have on the Company’s cash flows.

In March 2016, the FASB issued ASU 2016-09, “Compensation – Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting.” The FASB issued the update to change certain aspects of accounting for share-based payments to employees. The update eliminates additional paid-in-capital pools and requires all income tax effects of awards to be recognized in the statements of operations when the awards vest or settle. ASU 2016-09 allows companies to make an accounting policy election to estimate forfeitures, as required today, or record them when they occur and allows companies to withhold an amount up to the maximum statutory tax rate without causing the award to be classified as a liability. Within the statement of cash flows, ASU 2016-09 requires excess tax benefits to be classified as an operating activity and cash payments to tax authorities in connection with shares withheld to be classified as a financing activity. The standard will be effective for fiscal years beginning after December 15, 2016, including interim periods within such fiscal years. The Company adopted this guidance for the fiscal year beginning January 1, 2017. The Company has elected to continue to estimate the number of share-based awards expected to vest, as permitted by ASU 2016-09, rather than electing to account for forfeitures as they occur. The impact of ASU 2016-09 will generally be dependent on the amount of employee exercises of share-based awards and the value of share-based awards at vesting, which will result in increased volatility in income tax expense on a prospective basis.

In February 2016, the FASB issued ASU 2016-02, “Leases (Topic 842).” The FASB issued the update to require the recognition of lease assets and lease liabilities on the balance sheet of lessees. The standard will be effective for fiscal years beginning after December 15, 2018, including interim periods within such fiscal years. The ASU requires a modified retrospective transition method with the option to elect a package of practical expedients. Early adoption is permitted. The Company is currently assessing the effect that the ASU will have on the Company’s financial position, results of operations, cash flows and disclosures.

In July 2015, the FASB issued ASU 2015-11, “Simplifying the Measurement of Inventory.” The amendments require an entity to measure inventory at the lower of cost and net realizable value. Net realizable value is the estimated selling prices in the ordinary course of business, less reasonably predictable costs of completion, disposal and transportation. The amendments do not apply to inventory that is measured using the last-in, first-out cost method. The amendments apply to all other inventory, which includes inventory that is measured using first-in, first-out or average cost. This ASU is effective for fiscal years beginning after December 15, 2016. The Company adopted this guidance prospectively for the fiscal year beginning January 1, 2017. The adoption of the guidance will not have a material impact on the Company’s consolidated financial statements.

In May 2014, the FASB issued ASU 2014-09, “Revenue from Contracts with Customers.” The amendments require entities to recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In August 2015, the FASB issued ASU 2015-14, which deferred the effective date of the new standard by one year. As a result, the standard will be effective for fiscal years beginning after December 15, 2017, including interim periods within such fiscal years. In March 2016, the FASB issued ASU 2016-08, which amended the principal versus agent guidance in the new revenue standard. This amended guidance is intended to result in more consistent application and reduce the cost and complexity of applying the new standard. In April 2016, the FASB issued ASU 2016-10, which amended the guidance to clarify accounting for licenses of intellectual property and to clarify the guidance on performance obligations. In May 2016, the FASB issued ASU 2016-12, which provided narrow-scope amendments and practical expedients for the new revenue standard and is intended to reduce the cost and complexity of applying the new standard. In December 2016, the FASB issued ASU 2016-20, which is intended to clarify or correct narrow aspects of the guidance issued in ASU 2014-09. The new revenue recognition ASU allows full retrospective or modified retrospective adoption. Early adoption is permitted as of fiscal years beginning after December 15, 2016; the Company has not elected to early adopt this standard. The Company has developed an implementation plan to adopt this new guidance. As part of this plan, the Company has identified its revenue streams and is in the process of performing contract reviews to assess the impact of the new guidance on its results of operations. The Company intends to adopt this ASU on January 1, 2018. The Company has not yet selected a transition method, but expects to do so in 2017 upon completion of further analysis.

(Dollars and shares in thousands, except per share amounts)

NOTE 3 — Asset Impairments

The following tables summarize information about the impairment charges recorded in 2016 and 2015. These charges relate to non-financial assets that were measured at fair value on a non-recurring basis using Level 3 inputs according to the fair value hierarchy as described further in Note 11, Fair Value Measurements.

	Year ended December 31, 2016			
	Goodwill and Indefinite-lived Intangible Assets	Finite-lived Intangible Assets	Property, Plant & Equipment	Total
Distribution & Storage	—	\$ 542	\$ 675	\$ 1,217
Consolidated	\$ —	\$ 542	\$ 675	\$ 1,217

	Year Ended December 31, 2015			
	Goodwill and Indefinite-lived Intangible Assets	Finite-lived Intangible Assets	Property, Plant & Equipment	Total
Energy & Chemicals	\$ 65,023	\$ —	\$ 3,773	\$ 68,796
Distribution & Storage ⁽¹⁾	316	—	1,704	2,020
BioMedical	142,333	38,083	3,884	184,300
Consolidated	\$ 207,672	\$ 38,083	\$ 9,361	\$ 255,116

⁽¹⁾ Asset impairments of \$1,556 were included in cost of sales on the consolidated statement of operations for the year ended December 31, 2015.

Goodwill and Indefinite-lived Intangible Assets

The Company recorded goodwill and indefinite-lived asset impairment charges in the fourth quarter of 2015 as management concluded that the goodwill and certain indefinite-lived intangible assets within certain reporting units were impaired. The total goodwill and indefinite-lived intangible asset impairment charges were \$207,672. Management prepares its annual forecast mid-November through December each year. As the 2016 forecast was developed, management considered several factors when assessing the outlook for 2016 and beyond. Because of those factors, management revised its forecasts down significantly which led to the impairment charges described below. In addition to the items considered for each reporting unit below, management also considered the sustained decline in the Company's market capitalization. The Company's stock price was \$95.64 on December 31, 2013, \$34.20 on December 31, 2014 and \$17.96 on December 31, 2015.

Goodwill and indefinite-lived intangible assets within the E&C reporting unit were impaired \$65,023 as a result of revised estimates developed during the Company's annual forecasting process. The revised estimates were the result of the following: 1) continued significant decline in energy prices during the fourth quarter which led to a significant reduction in expected order levels as Liquefied Natural Gas ("LNG") projects were cancelled or deferred, which impacts our longer-term forecasts; 2) in late 2015, the Company received notification of delays in major projects from several large customers; and 3) concerns with global growth, recent negative macroeconomic developments and highly competitive market conditions.

Indefinite-lived intangible assets within the D&S reporting unit were impaired \$316 as a result of revised estimates developed during our annual forecasting process.

Goodwill and indefinite-lived intangible assets within the BioMedical reporting unit were impaired \$142,333 as a result of revised estimates developed during our annual forecasting process. The revised estimates were the result of the following: 1) realization that the effects of Medicare competitive bidding, including the reduction of reimbursement rates and the subsequent consolidation of our customers, can no longer be considered temporary and will have lasting negative impacts on the growth of the homecare industry and their suppliers; 2) increased rivalry with competitive technology; and 3) concerns with global growth and recent negative macroeconomic developments.

There were no goodwill and indefinite-lived asset impairment charges for the year ended December 31, 2016.

CHART INDUSTRIES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(Dollars and shares in thousands, except per share amounts)

Long-lived Asset Impairments

2016 Long-lived Asset Impairments: During the third quarter of 2016, the Company identified impairment indicators that suggest the carrying value of a certain asset group in China within the D&S segment may not be recoverable. The primary impairment indicators included recently completed projections of future cash flows and the associated impact on the long-range strategic plan forecasts, lower than expected cash flows attributed to this asset group, and poor market conditions. An undiscounted cash flow test performed for this asset group indicated it was not recoverable. The fair value of the asset group was established using a discounted cash flow model which utilized Level 3 inputs in the fair value hierarchy. As a result of the long-lived asset impairment assessment performed, the Company recorded long-lived asset impairment charges on its D&S reporting unit as described further below. There were no remaining long-lived assets recorded on the consolidated balance sheet for this asset group as of December 31, 2016.

Additionally, during the third quarter of 2016, events and circumstances indicated that other tangible property, plant and equipment in China within the D&S segment might be impaired. However, the Company's estimate of undiscounted cash flows indicated that such carrying values were expected to be recovered. Nonetheless, it is reasonably possible that the estimate of undiscounted cash flows may negatively change in the near term, which may result in the need to write down these assets to fair value. The Company's estimate of cash flows may change in the future due to poor market conditions and excess capacity in the industry.

2015 Long-lived Asset Impairments: During the fourth quarter of 2015, the Company identified impairment indicators described above in the Goodwill and Indefinite-Lived Intangible Assets section that suggested the carrying values of certain asset groups within each reporting unit may not be recoverable. The primary indicators included projections of future cash flows and the associated impact on the long-range strategic plan forecasts, lower than expected cash flows attributed to certain asset groups, increased competition, the continued decline in energy prices, and the Company's lower market capitalization. As a result of the long-lived asset impairment assessments performed, the Company recorded long-lived asset impairments described further below.

The BioMedical long-lived asset impairment charges were due to declines in estimated fair value resulting from reductions in expected future cash flows associated with the respiratory product lines. The E&C long-lived asset impairment charges were due to reductions in expected future cash flows associated with certain assets in China.

Finite-lived Intangible Assets: For the year ended December 31, 2016, the Company recorded impairment charges of \$542 related to finite-lived intangible assets in its D&S reporting unit, attributed to customer relationships, trademarks, technology and patents. For the year ended December 31, 2015, the Company recorded impairment charges of \$38,083 related to finite-lived intangible assets in its BioMedical reporting unit, attributed to customer relationships – \$15,667 and unpatented technology – \$22,417.

Property, Plant & Equipment: As a result of long-lived asset impairment assessments performed in the third quarter of 2016, the Company recorded long-lived asset impairment charges for certain tangible property, plant and equipment of \$675 attributed to D&S. As a result of long-lived asset impairment assessments performed in the fourth quarter of 2015, the Company recorded long-lived asset impairment charges for certain tangible property, plant and equipment of \$7,657; \$3,773 attributed to E&C and \$3,884 attributed to BioMedical. Additionally, as a result of restructuring activities in 2015 within the D&S segment, the Company recorded \$1,704 of asset impairment charges to record certain property, plant and equipment at fair value.

NOTE 4 — Inventories

The following table summarizes the components of inventory:

	December 31,	
	2016	2015
Raw materials and supplies	\$ 65,719	\$ 76,680
Work in process	31,576	33,721
Finished goods	72,388	88,901
Total inventories, net	<u>\$ 169,683</u>	<u>\$ 199,302</u>

The allowance for excess and obsolete inventory balance at December 31, 2016 and 2015 was \$10,069 and \$11,269, respectively.

CHART INDUSTRIES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Dollars and shares in thousands, except per share amounts)

NOTE 5 — Property, Plant and Equipment

The following table summarizes the components of property, plant and equipment:

Classification	Estimated Useful Life	December 31,	
		2016	2015
Land and buildings	20-35 years	\$ 162,999	\$ 164,181
Machinery and equipment	3-12 years	169,408	163,200
Computer equipment, furniture and fixtures	3-7 years	35,398	33,993
Construction in process		50,855	52,815
Total property, plant and equipment, gross		418,660	414,189
Less: accumulated depreciation		(167,611)	(147,912)
Total property, plant and equipment, net		\$ 251,049	\$ 266,277

Depreciation expense was \$25,636, \$28,115 and \$25,231 for the years ended December 31, 2016, 2015, and 2014, respectively. Included in construction in progress at December 31, 2016 and 2015 was approximately \$46,000 in each period, related to the plant expansion in Changzhou, China.

Included in property, plant & equipment and accounts payable in the consolidated balance sheet at December 31, 2015 is \$6,791 related to property purchases which were unpaid at December 31, 2015. These amounts were paid in 2016.

See Note 3, Asset Impairments, for information regarding property, plant and equipment impaired in 2016 and 2015.

NOTE 6 — Goodwill and Intangible Assets

During the 2015 annual assessment of goodwill, management determined that it was more likely than not that the fair value was less than the carrying amount of certain reporting units and, therefore, the two-step goodwill impairment test was necessary. Additionally, management quantitatively evaluated indefinite-lived intangible assets as part of the impairment testing. Furthermore, management identified indicators of impairment on certain finite-lived intangible assets which were evaluated for impairment. As a result of these evaluations, the Company recorded goodwill, intangible asset and long-lived asset impairment charges in the fourth quarter of 2015 as management concluded that certain assets within each reporting unit were impaired.

During the third quarter of 2016, as a result of the long-lived asset impairment assessment, the Company recorded long-lived asset impairment charges on its D&S reporting unit related to finite-lived intangible assets and tangible property, plant and equipment.

See Note 3, Asset Impairments, for further information related to the impairment charges recorded in 2016 and 2015.

Goodwill

The following table presents the changes in goodwill:

	December 31,	
	2016	2015
Beginning balance	\$ 218,390	\$ 405,522
Foreign currency translation adjustments and other	(420)	(1,887)
Goodwill acquired during the year	—	10,601
Impairment loss	—	(195,846)
Ending balance	\$ 217,970	\$ 218,390
Accumulated goodwill impairment loss	\$ 195,846	\$ 195,846

Intangible Assets

The following table displays the gross carrying amount and accumulated amortization for finite-lived intangible assets and indefinite-lived intangible assets (exclusive of goodwill)⁽¹⁾:

	December 31, 2016		December 31, 2015	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Finite-lived intangible assets:				
Unpatented technology	\$ 8,186	\$ (3,132)	\$ 8,530	\$ (2,660)
Patents	1,235	(695)	7,770	(6,753)
Trademarks and trade names	4,918	(2,198)	10,052	(6,886)
Customer relationships	119,320	(81,614)	138,223	(90,180)
Land use rights	12,650	(860)	13,484	(567)
Total finite-lived intangible assets	\$ 146,309	\$ (88,499)	\$ 178,059	\$ (107,046)
Indefinite-lived intangible assets:				
Trademarks and trade names	\$ 35,633		\$ 35,701	

⁽¹⁾ Amounts include the impact of foreign currency translation. Fully amortized or impaired amounts are written off.

Amortization expense for intangible assets subject to amortization was \$11,873, \$17,333 and \$17,945 for the years ended December 31, 2016, 2015, and 2014, respectively. The Company estimates amortization expense to be recognized during the next five years as follows:

For the Year Ending December 31,	
2017	\$ 10,400
2018	9,800
2019	9,800
2020	8,200
2021	2,100

Government Grants

The Company received \$1,055 and \$8,650 in government grants during 2016 and 2015, respectively, related to property, plant and equipment and land use rights related to the expansion in China. The grants are recorded in other current liabilities and other long-term liabilities in the consolidated balance sheets and recognized into income over the useful life of the associated assets (10 to 50 years). At December 31, 2016, \$446 and \$8,153 was recorded in other current liabilities and other long-term liabilities, respectively, related to the government grants. At December 31, 2015, \$368 and \$8,133 was recorded in other current liabilities and other long-term liabilities, respectively, related to the government grants.

NOTE 7 — Debt and Credit Arrangements

Summary of Outstanding Borrowings

The following table represents the components of the Company's borrowings:

	December 31,	
	2016	2015
Convertible notes, due August 2018, effective interest rate of 7.9%	\$ 228,115	\$ 215,634
Foreign facilities	13,208	6,160
Total debt	241,323	221,794
Unamortized debt issuance costs	(1,125)	(1,836)
Total debt, net of unamortized debt issuance costs	240,198	219,958
Less: current maturities	(6,487)	(6,160)
Long-term debt	\$ 233,711	\$ 213,798

Convertible Notes

The outstanding aggregate principal amount of the Company's Convertible Notes is \$250,000. The Convertible Notes bear interest at a fixed rate of 2.0% per year, payable semiannually in arrears on February 1 and August 1 of each year, and will mature on August 1, 2018. The effective interest rate at issuance was 7.9%.

The Convertible Notes are senior subordinated unsecured obligations of the Company and are not guaranteed by any of the Company's subsidiaries. The Convertible Notes are senior in right of payment to the Company's future subordinated debt, equal in right of payment with the Company's future senior subordinated debt and are subordinated in right of payment to the Company's existing and future senior indebtedness, including indebtedness under the Company's existing credit agreement.

In connection with the issuance of the Convertible Notes, the Company entered into privately-negotiated convertible note hedge and capped call transactions with affiliates of certain of the underwriters (the "Option Counterparties"). The convertible note hedge and capped call transactions relate to, collectively, 3,622 shares, which represents the number of shares of the Company's common stock underlying the Convertible Notes, subject to anti-dilution adjustments substantially similar to those applicable to the Convertible Notes. These convertible note hedge and capped call transactions are expected to reduce the potential dilution with respect to the Company's common stock upon conversion of the Convertible Notes and/or reduce the Company's exposure to potential cash or stock payments that may be required upon conversion of the Convertible Notes, except, in the case of the capped call transactions, to the extent that the market price per share of the Company's common stock exceeds the cap price of the capped call transactions. The Company also entered into separate warrant transactions with the Option Counterparties initially relating to the number of shares of the Company's common stock underlying the convertible note hedge transactions, subject to customary anti-dilution adjustments. The warrant transactions will have a dilutive effect with respect to the Company's common stock to the extent that the price per share of the Company common stock exceeds the strike price of the warrants unless the Company elects, subject to certain conditions, to settle the warrants in cash. These warrants were exercisable as of the issuance date of the Convertible Notes. The cap price of the capped call transactions and the strike price of the warrant transactions was initially \$84.96 per share. Proceeds received from the issuance of the warrants totaled approximately \$48,848 and were recorded as an addition to additional paid-in-capital. The net cost of the convertible note hedge and capped call transactions, taking into account the proceeds from the issuance of the warrants, was approximately \$17,638.

In accordance with ASC 815, contracts are initially classified as equity if (1) the contract requires physical settlement or net-share settlement, or (2) the contract gives the entity a choice of net-cash settlement in its own shares (physical settlement or net-share settlement). The Company concluded that the settlement terms of the convertible note hedge, capped call and warrant transactions permit net-share settlement. As such, the convertible note hedge, capped call and warrant transactions were recorded in equity.

Upon issuance of the Convertible Notes, the Company bifurcated the \$250,000 principal balance of the Convertible Notes into a liability component of \$170,885, which was recorded as long-term debt, and an equity component of \$79,115, which was initially recorded as additional paid-in-capital. The liability component was recognized at the present value of its associated cash

CHART INDUSTRIES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(Dollars and shares in thousands, except per share amounts)

flows using a 7.9% straight-debt rate which represented the Company's interest rate for similar debt instruments at that time without a conversion feature and is being accreted to interest expense over the term of the Convertible Notes. At December 31, 2016 and 2015, the carrying amount of the liability component was \$228,115 less debt issuance costs of \$1,125 and \$215,634 less debt issuance costs of \$1,836, respectively, and the unamortized debt discount of the Convertible Notes was \$21,885 and \$34,366, respectively.

For the years ended December 31, 2016, 2015, and 2014, interest expense for the Convertible Notes was \$17,481, \$16,535, and \$15,662, respectively, which included \$12,481, \$11,535, and \$10,662 of non-cash interest accretion expense related to the carrying amount of the Convertible Notes, respectively, and \$5,000 of 2.0% cash interest in each year. In accordance with ASC 470-20, which requires issuers to separately account for the liability and equity components of convertible debt instruments that may be settled in cash upon conversion, the Company allocated debt issuance costs to the liability and equity components in proportion to their allocated value. Debt issuance costs were \$7,277, with \$2,303 recorded as a reduction in additional paid-in-capital. The remaining \$4,974 is being amortized over the term of the Convertible Notes. Total expense associated with the amortization of these debt issuance costs was \$711 in each of the years ended December 31, 2016, 2015, and 2014.

Prior to May 1, 2018, the Convertible Notes will be convertible at the option of the holders thereof only under the following circumstances: (1) during any fiscal quarter commencing after September 30, 2011 (and only during such fiscal quarter), if the last reported sale price of the Company's common stock for at least 20 trading days (whether or not consecutive) during the period of 30 consecutive trading days ending on the last trading day of the immediately preceding fiscal quarter is greater than or equal to 130% of the applicable conversion price (currently \$69.03) for the Convertible Notes on each applicable trading day; (2) during the five business day period after any five consecutive trading day period (the "Measurement Period") in which, as determined following a request by a holder of Convertible Notes as provided in the bond indenture (the "Indenture"), the trading price per \$1,000 principal amount of Convertible Notes for each trading day of such Measurement Period was less than 97% of the product of the last reported sale price of the Company's common stock and the applicable conversion rate for the Convertible Notes on each such trading day; or (3) upon the occurrence of specified corporate events pursuant to the terms of the Indenture. On or after May 1, 2018, until the close of business on the second scheduled trading day immediately preceding the maturity date of the Convertible Notes, holders of the Convertible Notes may convert their Convertible Notes at any time, regardless of the foregoing circumstances. Upon conversion, the Company will pay cash up to the aggregate principal amount of the Convertible Notes to be converted and pay or deliver, as the case may be, cash, shares of the Company's common stock or a combination of cash and shares of the Company's common stock, at the Company's election, in respect of the remainder, if any, of the Company's conversion obligation in excess of the aggregate principal amount of the Convertible Notes being converted. It is the Company's intention to settle any excess conversion value in shares of the Company's common stock.

The conversion rate on the Convertible Notes will be subject to adjustment upon the occurrence of certain events, but will not be adjusted for any accrued and unpaid interest. In addition, following the occurrence of a make-whole fundamental change, the Company will, in certain circumstances, increase the conversion rate for a holder that converts its Convertible Notes in connection with such make-whole fundamental change. The Company may not redeem the Convertible Notes prior to maturity. If the Company undergoes a fundamental change, subject to certain conditions, holders may require the Company to purchase the Convertible Notes in whole or in part for cash at a fundamental change purchase price equal to 100% of the principal amount of the Convertible Notes to be purchased, plus accrued and unpaid interest, if any, to, but excluding, the fundamental change purchase date. For purposes of calculating earnings per share, if the average market price of the Company's common stock exceeds the applicable conversion price during the periods reported, shares contingently issuable under the Convertible Notes will have a dilutive effect with respect to the Company's common stock.

The Company reassesses the convertibility of the Convertible Notes and the related balance sheet classification on a quarterly basis. As of December 31, 2016 and December 31, 2015, events for early conversion were not met, and thus the Convertible Notes were not convertible as of and for the fiscal quarter beginning January 1, 2017 or January 1, 2016, respectively. There have been no conversions as of the date of this filing.

CHART INDUSTRIES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(Dollars and shares in thousands, except per share amounts)

Senior Secured Revolving Credit Facility

The Company has a five-year \$450,000 senior secured revolving credit facility (the “SSRCF”) which matures on October 29, 2019. The SSRCF includes a \$25,000 sub-limit for the issuance of swingline loans and a \$100,000 sub-limit to be used for letters of credit. There is a foreign currency limit of \$100,000 under the SSRCF which can be used for foreign currency denominated letters of credit and borrowings in a foreign currency, in each case in currencies agreed upon with the lenders. In addition, the facility permits borrowings up to \$100,000 made by the Company’s wholly-owned subsidiaries, Chart Industries Luxembourg S.à r.l. (“Chart Luxembourg”) and Chart Asia Investment Company Limited (“Chart Asia”). The SSRCF also includes an expansion option permitting the Company to add up to an aggregate \$200,000 in term loans or revolving credit commitments from its lenders.

The Company recorded \$2,869 in deferred debt issuance costs associated with the SSRCF which are being amortized over the five-year term of the SSRCF. For the years ended December 31, 2016, 2015, and 2014, total expense associated with the amortization of these debt issuance costs was \$573, \$579, and \$586, respectively.

Revolving loans under the SSRCF bear interest, at the applicable Borrower’s election, at either LIBOR or the greatest of (a) the JPMorgan prime rate in effect on such day, (b) the Federal Funds Effective Rate in effect on such day plus 1/2 of 1% or (c) the Adjusted LIBOR Rate (as defined in the SSRCF) for the relative interest period on such day (or if such day is not a business day, the immediately preceding business day) plus 1% (the “Adjusted Base Rate”), plus a margin that varies with the Company’s leverage ratio. In addition, the Company is required to pay a commitment fee of between 0.25% and 0.40% of the unused revolver balance and a letter of credit participation fee equal to the daily aggregate letter of credit exposure at the rate per annum equal to the Applicable Margin for Eurocurrency Revolving Facility Borrowings (ranging from 1.5% to 2.75%, depending on the leverage ratio calculated at each fiscal quarter end). A fronting fee must be paid on each letter of credit that is issued equal to 0.125% per annum of the stated dollar amount of the letter of credit.

Significant financial covenants for the SSRCF include a minimum liquidity requirement equal to the principal amount of the Convertible Notes outstanding six months prior to the maturity date of the Convertible Notes and when holders of the Convertible Notes have the option to require the Company to repurchase the Convertible Notes, a maximum leverage ratio of 3.25 and a minimum interest coverage to EBITDA ratio of 3.0. The required leverage ratio can be relaxed on up to two occasions, upon notification to the lenders, to 3.75 for up to four consecutive fiscal quarters, for acquisitions and plant expansions of \$100,000 or greater. The SSRCF contains a number of other customary covenants including, but not limited to, restrictions on the Company’s ability to incur additional indebtedness, create liens or other encumbrances, sell assets, enter into sale and lease-back transactions, make certain payments, investments, loans, advances or guarantees, make acquisitions and engage in mergers or consolidations and pay dividends or distributions. At December 31, 2016, the Company was in compliance with all covenants.

At December 31, 2016, there were no borrowings outstanding under the SSRCF. The Company had \$37,196 in letters of credit issued and bank guarantees supported by the SSRCF, which had availability of \$412,804 at December 31, 2016. The obligations under the SSRCF are guaranteed by the Company and substantially all of its U.S. subsidiaries and secured by substantially all of the assets of the Company and its U.S. subsidiaries and 65% of the capital stock of the Company’s material non-U.S. subsidiaries (as defined by the SSRCF) that are owned by U.S. subsidiaries.

Foreign Facilities – China

Chart Cryogenic Engineering Systems (Changzhou) Company Limited (“CCESC”), Chart Energy & Chemicals Wuxi Co., Ltd. (“Wuxi”) and Chart Biomedical (Chengdu) Co. Ltd. (“Chengdu”), wholly-owned subsidiaries of the Company, and Chart Cryogenic Distribution Equipment (Changzhou) Company Limited (“CCDEC”), a joint venture of the Company, maintain joint banking facilities (the “China Facilities”) which include a revolving facility with 50.0 million Chinese yuan (equivalent to \$7,208) in borrowing capacity which can be utilized for either revolving loans, bonds/guarantees, or bank draft acceptances. Any borrowings made by CCESC, CCDEC, Chengdu or Wuxi under the China Facilities are guaranteed by the Company. At December 31, 2016, there were no borrowings outstanding under the revolving facility but, CCESC and CCDEC had 7.5 million Chinese yuan (equivalent to \$1,075) and 0.8 million Chinese yuan (equivalent to \$115) in bank guarantees, respectively.

CCDEC maintains an unsecured credit facility whereby CCDEC may borrow up to 30.0 million Chinese yuan (equivalent to \$4,325) for working capital purposes. This credit facility is effective until May 25, 2017. At December 31, 2016, there was 25.0 million Chinese yuan (equivalent to \$3,604) outstanding under this facility, bearing interest at 4.35%.

CCESC entered into a term loan during the second quarter of 2016. The term loan is secured by certain CCESC land use rights and allows for up to 86.6 million Chinese yuan (equivalent to \$12,487) in borrowings. The loan has a term of eight years with semi-annual installment payments of at least 10.0 million Chinese yuan and a final maturity date of May 26, 2024. At December 31, 2016, there was 66.6 million Chinese yuan (equivalent to \$9,604) outstanding on this loan, bearing interest at 5.39%.

CHART INDUSTRIES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(Dollars and shares in thousands, except per share amounts)

Foreign Facilities – Europe

Chart Ferox, a.s. (“Ferox”), a wholly-owned subsidiary of the Company, maintains a secured credit facility with capacity of up to 125.0 million Czech koruna (equivalent to \$4,876) and two secured credit facilities with capacity of up to 6.5 million euros (equivalent to \$6,851). All three facilities allow Ferox to request bank guarantees and letters of credit. None of these facilities allow revolving credit borrowings. Under two of the facilities, Ferox must pay letter of credit and guarantee fees equal to 0.70% per annum on the face amount of each guarantee or letter of credit and under one facility Ferox must pay the letter of credit and guarantee fees equal to 0.50%. Ferox’s land, buildings, and cash secure the credit facilities. As of December 31, 2016, there were bank guarantees of 155.4 million Czech koruna (equivalent to \$6,062) supported by the Ferox credit facilities.

Chart Luxembourg maintains an overdraft facility with \$5,000 in borrowing capacity. There were no borrowings under the Chart Luxembourg facility as of December 31, 2016.

Scheduled Annual Maturities

The scheduled annual maturities of debt at December 31, 2016, are as follows:

Year	Amount
2017	\$ 6,487
2018	255,766
2019	955
Total	\$ 263,208

Cash paid for interest during the years ended December 31, 2016, 2015, and 2014 was \$5,584, \$5,113, and \$6,838, respectively.

Fair Value Disclosures

The fair value of the Convertible Notes was approximately 96% of their par value as of December 31, 2016 and approximately 88% of their par value as of December 31, 2015. The Convertible Notes are actively quoted instruments and, accordingly, the fair value of the Convertible Notes was determined using Level 1 inputs as defined in Note 11.

NOTE 8 — Financial Instruments and Derivative Financial Instruments

Concentrations of Credit Risks: The Company sells its products to gas producers, distributors and end-users across the industrial gas, hydrocarbon, chemical processing, respiratory therapy, and life sciences industries in countries all over the world. Approximately 50%, 51%, and 53% of sales were to customers in foreign countries in 2016, 2015, and 2014, respectively. One customer exceeded ten percent of consolidated sales in 2016. Total sales revenue from this customer represents approximately \$98,919 of total consolidated sales revenue and is attributable to the E&C, D&S, and BioMedical segments. No single customer exceeded ten percent of consolidated sales in 2015 and 2014. Sales to the Company’s top ten customers accounted for 38%, 36% and 34% of consolidated sales in 2016, 2015, and 2014, respectively. The Company’s sales to particular customers fluctuate from period to period, but the large industrial gas producer and distributor customers of the Company tend to be a consistently large source of revenue for the Company.

The Company is also subject to concentrations of credit risk with respect to its cash and cash equivalents and forward foreign currency exchange contracts. To minimize credit risk from these financial instruments, the Company enters into arrangements with major banks and other quality financial institutions and invests only in high-quality instruments. The Company does not expect any counterparties to fail to meet their obligations.

The changes in fair value with respect to the Company’s foreign currency forward contracts generated a net loss of \$765 for the year ended December 31, 2016 and net gains of \$2,673 and \$2,670 for the years ended December 31, 2015 and 2014, respectively.

CHART INDUSTRIES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(Dollars and shares in thousands, except per share amounts)

NOTE 9 — Product Warranties

The Company provides product warranties with varying terms and durations for the majority of its products. The Company estimates its warranty reserve by considering historical and projected warranty claims, historical and projected cost-per-claim, and knowledge of specific product issues that are outside its typical experience. The Company records warranty expense in cost of sales in the consolidated statement of operations. Product warranty claims not expected to occur within one year are recorded in the long-term portion of the warranty reserve in the consolidated balance sheets.

The following table represents changes in the Company’s consolidated warranty reserve:

	Year Ended December 31,		
	2016	2015	2014
Beginning balance	\$ 20,975	\$ 24,246	\$ 33,827
Warranty expense	9,962	16,705	14,463
Warranty usage	(12,666)	(19,976)	(24,044)
Ending balance	\$ 18,271	\$ 20,975	\$ 24,246

As a result of the BioMedical segment’s acquisition of AirSep Corporation (“AirSep”) in August 2012, the Company assumed exposure for warranty claims for AirSep’s various product lines. One of these product lines in particular experienced high failure rates with respect to certain of its models as compared to AirSep’s other products. The Company established a warranty reserve on AirSep’s opening balance sheet to account for the cost of satisfying future warranty claims, including a separately calculated warranty reserve for those certain models in the product line that experienced greater warranty return rates (collectively, the “acquired warranty reserve”). The Company has experienced a significant number of warranty claims as AirSep products sold in prior periods run through their respective warranty periods. Usage of the acquired warranty reserve includes claims related to all of AirSep’s product lines, including costs associated with the population of units for which a warranty reserve was separately calculated. Usage of the acquired warranty reserve has exceeded warranty expense since the acquisition. The Company has made various design improvements to this product line, revised the warranty claim process, and reduced the average cost to repair units since the 2012 acquisition, all in an effort to mitigate the costs associated with these warranty issues. The Company does not expect future warranty expense to be as significant as it has been since the acquisition. During the third quarter of 2016, the Company recovered for breaches of representations and warranties primarily related to warranty costs for certain product lines acquired from AirSep under the related representation and warranty insurance. For the year ended December 31, 2016, this reduced our BioMedical segment’s cost of sales by \$15,145.

Warranty expense for 2016 does not include the impact of the \$15,145 the Company recovered during 2016 for breaches of representations and warranties primarily related to warranty costs for certain product lines acquired in the 2012 acquisition of AirSep under the related representation and warranty insurance. Warranty expense for 2014 does not include the impact of the Company’s recovery of \$5,003 during 2014 from an escrow settlement relating to excess warranty costs for certain product lines acquired from AirSep in 2012.

NOTE 10 — Business Combinations

Thermax Acquisition

On July 1, 2015, the Company acquired 100% of the equity interests of Thermax, Inc. (“Thermax”) for an estimated purchase price of \$29,687 after working capital adjustments, of which \$24,197 was paid at closing (net of \$2,307 in cash acquired). The purchase price was subject to post-closing adjustments. As a result of these post-closing adjustments, the final working capital adjustment of \$1,383 was paid during the second quarter of 2016. The remainder of the purchase price represents the estimated fair value of the contingent consideration to be paid over four years based on the achievement of certain earnings targets. The fair value of the net assets acquired and goodwill at the date of acquisition was \$19,332 and \$10,355, respectively. Net assets includes \$10,000 in intangible assets, which consists of customer relationships, unpatented technology and trademarks and trade names.

Thermax, headquartered in Dartmouth, Massachusetts, designs and sells cryogenic fluid vaporizers and other ambient and powered vaporizer products used in industrial gas, petrochemical, and liquefied natural gas applications. Thermax’s results are included in the Company’s D&S business segment from the date of acquisition.

CHART INDUSTRIES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(Dollars and shares in thousands, except per share amounts)

Contingent Consideration

The estimated fair value of contingent consideration relating to the Thermax acquisition was \$1,800 at the date of acquisition and was valued according to a discounted cash flow approach, which includes assumptions regarding the probability of achieving certain earnings targets and a discount rate applied to the potential payments. Potential payments may be paid between July 1, 2017 and July 1, 2019 based on the attainment of certain earnings targets. The potential payment related to Thermax contingent consideration is between \$0 and \$11,288.

The potential contingent consideration related to a prior BioMedical segment acquisition expired at the end of March 2016 with no additional payment.

Valuations are performed using Level 3 inputs as defined in Note 11 and are evaluated on a quarterly basis based on forecasted sales and earnings targets. Contingent consideration liabilities are classified as other current liabilities and other long-term liabilities in the consolidated balance sheets. Changes in fair value of contingent consideration, including accretion, are recorded as selling, general and administrative expenses in the consolidated statements of operations and comprehensive income (loss).

The following table represents the changes in contingent consideration liabilities by segment:

	Distribution & Storage	BioMedical	Total
Balance at January 1, 2014	\$ —	\$ 2,289	\$ 2,289
Decrease in fair value of contingent consideration liabilities	—	(474)	(474)
Payment of contingent consideration	—	(741)	(741)
Balance at December 31, 2014	—	1,074	1,074
Fair value of contingent consideration at inception	1,800	—	1,800
Decrease in fair value of contingent consideration liabilities	(39)	(463)	(502)
Payment of contingent consideration	—	(611)	(611)
Balance at December 31, 2015	1,761	—	1,761
Increase in fair value of contingent consideration liabilities	162	—	162
Balance at December 31, 2016	\$ 1,923	\$ —	\$ 1,923

NOTE 11 — Fair Value Measurements

The Company measures its financial assets and liabilities at fair value on a recurring basis using a three-tier fair value hierarchy, which prioritizes the inputs used in the valuation methodologies. The three levels of inputs used to measure fair value are as follows:

Level 1 — Valuations based on quoted prices for identical assets and liabilities in active markets.

Level 2 — Valuations based on observable inputs other than quoted prices included in Level 1, such as quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets and liabilities in markets that are not active, or other inputs that are observable or can be corroborated by observable market data.

Level 3 — Valuations based on unobservable inputs reflecting our own assumptions, consistent with reasonably available assumptions made by other market participants. These valuations require significant judgment.

CHART INDUSTRIES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(Dollars and shares in thousands, except per share amounts)

Recurring Fair Value Measurements

Financial assets and liabilities measured at fair value on a recurring basis and presented in the Company's consolidated balance sheets are as follows:

	December 31, 2016		
	Total	Level 2	Level 3
Foreign currency forward contracts	\$ 39	\$ 39	\$ —
Total financial assets	<u>\$ 39</u>	<u>\$ 39</u>	<u>\$ —</u>
Foreign currency forward contracts	\$ 92	\$ 92	\$ —
Contingent consideration liabilities	1,923	—	1,923
Total financial liabilities	<u>\$ 2,015</u>	<u>\$ 92</u>	<u>\$ 1,923</u>

	December 31, 2015		
	Total	Level 2	Level 3
Foreign currency forward contracts	\$ 561	\$ 561	\$ —
Total financial assets	<u>\$ 561</u>	<u>\$ 561</u>	<u>\$ —</u>
Foreign currency forward contracts	\$ 470	\$ 470	\$ —
Contingent consideration liabilities	1,761	—	1,761
Total financial liabilities	<u>\$ 2,231</u>	<u>\$ 470</u>	<u>\$ 1,761</u>

Refer to Note 8 for further information regarding foreign currency forward contracts and Note 10 for further information regarding contingent consideration liabilities.

Non-Recurring Fair Value Measurements

During 2016 and 2015, the Company recorded asset impairment charges of \$1,217 and \$255,116, respectively. Refer to Note 3, Asset Impairments, for further information regarding these charges and the associated significant unobservable inputs.

NOTE 12 — Accumulated Other Comprehensive Loss

The components of accumulated other comprehensive loss are as follows:

	December 31, 2016		
	Foreign currency translation adjustments	Pension liability adjustments, net of taxes	Accumulated other comprehensive loss
Beginning Balance	\$ (12,513)	\$ (12,391)	\$ (24,904)
Other comprehensive (loss) income before reclassifications, net of taxes of \$535	(12,188)	881	(11,307)
Amounts reclassified from accumulated other comprehensive loss, net of taxes of \$538 ⁽¹⁾	—	999	999
Net current-period other comprehensive (loss) income, net of taxes	(12,188)	1,880	(10,308)
Ending Balance	\$ (24,701)	\$ (10,511)	\$ (35,212)

	December 31, 2015		
	Foreign currency translation adjustments	Pension liability adjustments, net of taxes	Accumulated other comprehensive loss
Beginning Balance	\$ 3,808	\$ (12,494)	\$ (8,686)
Other comprehensive loss before reclassifications, net of taxes of \$447	(16,321)	(825)	(17,146)
Amounts reclassified from accumulated other comprehensive loss, net of taxes of \$501 ⁽¹⁾	—	928	928
Net current-period other comprehensive (loss) income, net of taxes	(16,321)	103	(16,218)
Ending Balance	\$ (12,513)	\$ (12,391)	\$ (24,904)

⁽¹⁾ Amounts reclassified from accumulated other comprehensive loss were expensed and included in cost of sales (\$605 and \$562 for the years ended December 31, 2016 and 2015, respectively) and selling, general and administrative expenses (\$932 and \$867 for the years ended December 31, 2016 and 2015, respectively) in the consolidated statements of operations.

CHART INDUSTRIES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(Dollars and shares in thousands, except per share amounts)

NOTE 13 — Earnings (Loss) Per Share

The following table presents calculations of net income (loss) per share of common stock:

	Year Ended December 31,		
	2016	2015	2014
Net income (loss) attributable to Chart Industries, Inc.	\$ 28,237	\$ (202,960)	\$ 81,864
Net income (loss) attributable to Chart Industries, Inc. per common share:			
Basic	\$ 0.92	\$ (6.66)	\$ 2.69
Diluted	\$ 0.91	\$ (6.66)	\$ 2.67
Weighted average number of common shares outstanding — basic	30,583	30,493	30,384
Incremental shares issuable upon assumed conversion and exercise of share-based awards	411	—	282
Weighted average number of common shares outstanding — diluted	30,994	30,493	30,666

Diluted earnings per share does not consider the following potential common shares as the effect would be anti-dilutive:

	Year Ended December 31,		
	2016	2015	2014
Share-based awards	563	943	48
Warrants	3,368	3,368	3,368
Total anti-dilutive securities	3,931	4,311	3,416

NOTE 14 — Income Taxes

Income (Loss) Before Income Taxes

Income (loss) before income taxes consists of the following:

	For the Year Ended December 31,		
	2016	2015	2014
United States	\$ 40,471	\$ (187,252)	\$ 87,505
Foreign	(2,072)	(14,580)	31,659
Income (loss) before income taxes	\$ 38,399	\$ (201,832)	\$ 119,164

CHART INDUSTRIES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(Dollars and shares in thousands, except per share amounts)

Provision

Significant components of the provision for income taxes are as follows:

	Year Ended December 31,		
	2016	2015	2014
Current:			
Federal	\$ 9,977	\$ 22,846	\$ 22,608
State and local	1,009	1,138	1,406
Foreign	5,299	3,103	12,326
Total current	16,285	27,087	36,340
Deferred:			
Federal	(3,334)	(25,707)	3,135
State and local	(206)	(619)	180
Foreign	957	1,923	(3,563)
Total deferred	(2,583)	(24,403)	(248)
Total provision	\$ 13,702	\$ 2,684	\$ 36,092

Effective Tax Rate Reconciliation

The reconciliation of income taxes computed at the U.S. federal statutory tax rate to income tax expense is as follows:

	Year Ended December 31,		
	2016	2015	2014
Income tax expense at U.S. statutory rate	\$ 13,440	\$ (70,641)	\$ 41,708
State income taxes, net of federal tax benefit	694	361	841
Foreign income, net of credit on foreign taxes	164	12	(245)
Effective tax rate differential of earnings outside of U.S.	513	(46)	(5,411)
Change in valuation allowance	6,581	5,658	—
Research & experimentation credits	(896)	(860)	(1,150)
Non-deductible items	756	2,745	1,947
Change in uncertain tax positions	(158)	60	(52)
Domestic production activities deduction	(1,236)	(2,133)	(2,093)
Tax effect of asset impairments	—	67,340	—
Tax effect of insurance proceeds	(5,845)	—	—
Other items	(311)	188	547
Income tax expense	\$ 13,702	\$ 2,684	\$ 36,092

CHART INDUSTRIES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(Dollars and shares in thousands, except per share amounts)

Deferred Taxes

Deferred income taxes reflect the net tax effect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of the Company's deferred tax assets and liabilities are as follows:

	December 31,	
	2016	2015
Deferred tax assets:		
Accruals and reserves	\$ 24,076	\$ 23,363
Pensions	5,298	6,276
Inventory	6,835	6,768
Share-based compensation	9,347	8,593
Tax credit carryforwards	2,179	1,046
Foreign net operating loss carryforwards	5,903	2,454
State net operating loss carryforwards	1,646	1,922
Other — net	889	2,714
Total deferred tax assets before valuation allowance	56,173	53,136
Valuation allowance	(15,051)	(8,842)
Total deferred tax assets, net of valuation allowance	\$ 41,122	\$ 44,294
Deferred tax liabilities:		
Property, plant and equipment	\$ 19,446	\$ 20,482
Goodwill and intangible assets	22,894	25,474
Convertible notes	1,023	1,586
Total deferred tax liabilities	\$ 43,363	\$ 47,542
Net deferred tax liabilities	\$ 2,241	\$ 3,248
The net deferred tax liability is classified as follows:		
Other assets	(2,000)	(1,898)
Long-term deferred tax liabilities	4,241	5,146
Net deferred tax liabilities	\$ 2,241	\$ 3,248

Federal, State and Local Net Operating Loss Carryforwards: As a result of the Company's acquisition of SeQual in 2010, the Company has \$22,418 of state net operating losses. California tax law limits the use of these state net operating losses. The remaining state net operating losses expire between 2017 and 2030. In addition, the Company has state net operating losses in various other states which begin to expire in 2017. The gross deferred tax asset for the state net operating losses of \$1,646 is substantially offset by a valuation allowance of \$1,454.

Foreign Net Operating Loss and Tax Credit Carryforwards: As of December 31, 2016, cumulative foreign operating losses of \$28,912 generated by the Company were available to reduce future taxable income. Approximately \$27,494 of these operating losses expire between 2019 and 2024. The remaining \$1,418 can be carried forward indefinitely. The deferred tax asset for the foreign operating losses of \$5,903 is substantially offset by a valuation allowance of \$5,700. As of December 31, 2016, the Company has \$828 of investment tax credits available to reduce its future tax liability. The gross deferred tax asset of \$828 is fully offset by a valuation allowance due to uncertainties relating to the Company's ability to fully use these credits prior to expiration.

Other Tax Information

The Company has not provided for income taxes on approximately \$190,419 of foreign subsidiaries' undistributed earnings as of December 31, 2016, since the earnings retained have been reinvested indefinitely by the subsidiaries. It is not practicable to estimate the additional income taxes and applicable foreign withholding taxes that would be payable on the remittance of such undistributed earnings.

Cash paid for income taxes during the years ended December 31, 2016, 2015, and 2014 was \$17,576, \$30,492, and \$31,208, respectively.

CHART INDUSTRIES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(Dollars and shares in thousands, except per share amounts)

Unrecognized Income Tax Benefits

The reconciliation of beginning to ending unrecognized tax benefits is as follows:

	Year Ended December 31,		
	2016	2015	2014
Unrecognized tax benefits at beginning of the year	\$ 1,024	\$ 948	\$ 941
Additions for tax positions of prior years	—	98	358
Reductions for tax positions of prior years	(17)	—	(329)
Lapse of statutes of limitation	(219)	(22)	(22)
Unrecognized tax benefits at end of the year	\$ 788	\$ 1,024	\$ 948

Included in the balance of unrecognized tax benefits at December 31, 2016 and 2015 were \$579 and \$714, respectively, of income tax benefits which, if ultimately recognized, would impact the Company's annual effective tax rate.

The Company had accrued approximately \$86 and \$121 for the payment of interest and penalties at December 31, 2016 and 2015, respectively. The Company accrued approximately \$21 and \$27 during the years ended December 31, 2016 and 2015, respectively in additional interest associated with uncertain tax positions.

The Company is subject to income taxes in the U.S. federal jurisdiction and various state and foreign jurisdictions. Tax regulations within each jurisdiction are subject to the interpretation of the related tax laws and regulations and require significant judgment to apply. With few exceptions, the Company is no longer subject to U.S. federal, state and local or non-U.S. income tax examinations by tax authorities for years prior to 2012.

Due to the expiration of various statutes of limitation, it is reasonably possible the Company's unrecognized tax benefits at December 31, 2016 may decrease within the next twelve months by approximately \$77.

NOTE 15 — Employee Benefit Plans

Defined Benefit Plan

The Company has a defined benefit pension plan which is frozen, that covers certain U.S. hourly and salary employees. The defined benefit plan provides benefits based primarily on the participants' years of service and compensation.

The components of net periodic pension expense (income) are as follows:

	Year Ended December 31,		
	2016	2015	2014
Interest cost	\$ 2,285	\$ 2,289	\$ 2,360
Expected return on plan assets	(2,789)	(3,199)	(3,105)
Amortization of net loss	1,537	1,429	320
Total net periodic pension expense (income)	\$ 1,033	\$ 519	\$ (425)

CHART INDUSTRIES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(Dollars and shares in thousands, except per share amounts)

The changes in the projected benefit obligation and plan assets, the funded status of the plans and the amounts recognized in the consolidated balance sheets are as follows:

	December 31,	
	2016	2015
Change in projected benefit obligation:		
Projected benefit obligation at beginning of year	\$ 58,273	\$ 62,107
Interest cost	2,285	2,289
Benefits paid	(3,857)	(3,088)
Actuarial gains	(1,237)	(3,035)
Projected benefit obligation at year end	\$ 55,464	\$ 58,273
Change in plan assets:		
Fair value of plan assets at beginning of year	\$ 40,990	\$ 45,187
Actual return (loss)	2,969	(1,109)
Employer contributions	1,000	—
Benefits paid	(3,857)	(3,088)
Fair value of plan assets at year end	\$ 41,102	\$ 40,990
Funded status (Accrued pension liabilities)	\$ (14,362)	\$ (17,283)
Unrecognized actuarial loss recognized in accumulated other comprehensive loss	\$ 16,704	\$ 19,657

The estimated net loss for the defined benefit pension plan that will be amortized from accumulated other comprehensive loss into net periodic benefit cost over the next fiscal year is \$1,240.

The actuarial assumptions used in determining pension plan information are as follows:

	December 31,		
	2016	2015	2014
Assumptions used to determine benefit obligation at year end:			
Discount rate	4.00%	4.00%	3.75%
Assumptions used to determine net periodic benefit cost:			
Discount rate	4.00%	3.75%	4.75%
Expected long-term weighted-average rate of return on plan assets	7.00%	7.25%	7.25%

The discount rate reflects the current rate at which the pension liabilities could be effectively settled at year end. In estimating this rate, the Company looks to rates of return on high quality, fixed-income investments that receive one of the two highest ratings given by a recognized rating agency and the expected timing of benefit payments under the plan.

The expected return assumptions were developed using an averaging formula based upon the plans' investment guidelines, mix of asset classes, historical returns of equities and bonds, and expected future returns. The Company employs a total return investment approach whereby a mix of equities and fixed income investments are used to maximize the long-term return of plan assets for a prudent level of risk. Risk tolerance is established through careful consideration of short and long-term plan liabilities, plan funded status and corporate financial condition. The investment portfolio contains a diversified blend of equity and fixed-income investments. Furthermore, equity investments are diversified across U.S. and non-U.S. stocks, as well as growth, value, and small and large capitalizations. Investment risk is measured and monitored on an ongoing basis through quarterly investment portfolio reviews, annual liability measurements, and periodic asset/liability studies.

CHART INDUSTRIES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(Dollars and shares in thousands, except per share amounts)

The target allocations by asset category and fair values of the plan assets by asset class at December 31 are as follows:

Plan Assets:	Target Allocations by Asset Category	Fair Value					
		Total		Level 2		Level 3	
		2016	2015	2016	2015	2016	2015
Equity funds	60%	\$ 28,103	\$ 27,814	\$ 28,103	\$ 27,814	\$ —	\$ —
Fixed income funds	30%	11,737	12,846	11,737	12,846	—	—
Other investments	10%	1,262	330	—	—	1,262	330
Total	100%	\$ 41,102	\$ 40,990	\$ 39,840	\$ 40,660	\$ 1,262	\$ 330

The plan assets are primarily invested in pooled separate funds. The fair values of equity securities and fixed income securities held in pooled separate funds are based on net asset value of the units of the funds as determined by the fund manager. These funds are similar in nature to retail mutual funds, but are typically more efficient for institutional investors. The fair value of pooled funds is determined by the value of the underlying assets held by the fund and the units outstanding. The value of the pooled funds is not directly observable, but is based on observable inputs. As such, these plan assets are valued using Level 2 inputs as defined in Note 11. Certain plan assets in the other investments asset category are invested in a general investment account where the fair value is derived from the liquidation value based on an actuarial formula as defined under terms of the investment contract. These plan assets were valued using unobservable inputs and, accordingly, the valuation was performed using Level 3 inputs as defined in Note 11.

The following table represents changes in the fair value of plan assets categorized as Level 3 from the preceding table:

Balance at January 1, 2015	\$	1,986
Return on plan assets		89
Purchases, sales and settlements, net		(3,486)
Transfers, net		1,741
Balance at December 31, 2015	\$	330
Return on plan assets		23
Purchases, sales and settlements, net		(4,231)
Transfers, net		5,140
Balance at December 31, 2016	\$	1,262

The Company's funding policy is to contribute at least the minimum funding amounts required by law. Based upon current actuarial estimates, the Company does not expect to contribute to its defined benefit pension plan until 2018. The following benefit payments are expected to be paid by the plan in each of the next five years and in the aggregate for the subsequent five years:

2017	\$	2,442
2018		2,631
2019		2,806
2020		2,850
2021		3,009
In aggregate during five years thereafter		16,310

Multi-Employer Plan

The Company contributes to a multi-employer plan for certain collective bargaining U.S. employees. The risks of participating in this multi-employer plan are different from a single employer plan in the following aspects:

- (a) Assets contributed to the multi-employer by one employer may be used to provide benefits to employees of other participating employers.

CHART INDUSTRIES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(Dollars and shares in thousands, except per share amounts)

- (b) If a participating employer ceases contributing to the plan, the unfunded obligations of the plan may be inherited by the remaining participating employers.
- (c) If the Company chooses to stop participating in the multi-employer plan, the Company may be required to pay those plans an amount based on the underfunded status of the plan, referred to as a withdrawal liability.

The Company has assessed and determined that the multi-employer plan to which it contributes is not significant to the Company's financial statements. The Company does not expect to incur a withdrawal liability or expect to significantly increase its contribution over the remainder of the current contract period, which ends in February 2018. The Company made contributions to the bargaining unit supported multi-employer pension plan resulting in expense of \$287, \$739, and \$992 for the years ended December 31, 2016, 2015, and 2014, respectively. The reduction in contributions is due to fewer employees participating in this plan.

Defined Contribution Savings Plan

The Company has a defined contribution savings plan that covers most of its U.S. employees. Company contributions to the plan are based on employee contributions, and include a Company match and discretionary contributions. Expenses under the plan totaled \$9,989, \$10,818, and \$10,773 for the years ended December 31, 2016, 2015, and 2014, respectively.

Voluntary Deferred Income Plan

The Company provides additional retirement plan benefits to certain members of management under the Amended and Restated Chart Industries, Inc. Voluntary Deferred Income Plan. This is an unfunded plan. The Company recorded \$257, \$255, and \$409 of expense associated with this plan for the years ended December 31, 2016, 2015, and 2014, respectively.

NOTE 16 — Share-based Compensation

Under the Amended and Restated 2005 Stock Incentive Plan ("Stock Incentive Plan") which became effective in October 2005, the Company could grant stock options, stock appreciation rights ("SARs"), restricted stock units ("RSUs"), stock awards, and performance based stock awards to employees and directors. The Stock Incentive Plan had reserved 3,421 shares of the Company's common stock for issuance. As of December 31, 2016, 102 options were outstanding under the Stock Incentive Plan. The Company no longer grants awards under this plan.

Under the Amended and Restated 2009 Omnibus Equity Plan ("Omnibus Equity Plan") which was originally approved by the shareholders in May 2009 and reapproved by shareholders in May 2012 as amended and restated, the Company may grant stock options, SARs, RSUs, restricted stock, performance shares, leveraged restricted shares, and common shares to employees and directors. The maximum number of shares available for grant is 3,350, which may be treasury shares or unissued shares. As of December 31, 2016, 1,011 stock options, 329 shares of restricted stock and RSUs, 58 performance units, and 10 leveraged restricted share units were outstanding under the Omnibus Equity Plan.

The Company recognized share-based compensation expense of \$10,679, \$11,325, and \$9,420 for the years ended December 31, 2016, 2015, and 2014, respectively. This expense is included in selling, general and administrative expenses in the consolidated statements of operations. The Company also recognized a related tax deficiency of \$1,672 and \$890 during the years ended December 31, 2016 and 2015, respectively, and a tax benefit of \$1,859 for the year ended December 31, 2014. As of December 31, 2016, total share-based compensation of \$5,133 is expected to be recognized over the remaining weighted-average period of approximately 1.9 years.

CHART INDUSTRIES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(Dollars and shares in thousands, except per share amounts)

Stock Options

The Company uses a Black-Scholes option pricing model to estimate the fair value of stock options. The expected volatility is based on historical information. For 2016 and 2015, the expected term is based on the historical average life of stock options. Prior to 2015, the Company used the simplified method as defined in SEC Staff Accounting Bulletin No. 107 to determine the expected term. The risk-free rate is based on the U.S. Treasury yield in effect at the time of the grant. Weighted-average grant-date fair values of stock options and the assumptions used in estimating the fair values are as follows:

	Year Ended December 31,		
	2016	2015	2014
Weighted-average grant-date fair value per share	\$ 10.36	\$ 19.04	\$ 56.15
Expected term (years)	5.20	5.60	6.25
Risk-free interest rate	1.66%	1.70%	1.00%
Expected volatility	61.40%	61.54%	63.73%

Under the terms of the Omnibus Equity Plan, stock options generally have a 4 year graded vesting period, an exercise price equal to the fair market value of a share of common stock on the date of grant, and a contractual term of 10 years. The following table summarizes the Company's stock option activity:

	December 31, 2016			
	Number of Shares	Weighted-average Exercise Price	Aggregate Intrinsic Value	Weighted-average Remaining Contractual Term
Outstanding at beginning of year	698	\$ 41.52		
Granted	561	19.33		
Exercised	(18)	20.17		
Forfeited	(128)	37.56		
Outstanding at end of year	1,113	\$ 31.13	\$ 11,881	6.6 years
Vested and expected to vest at end of year	1,096	\$ 31.25	\$ 4,005	6.6 years
Exercisable at end of year	495	\$ 37.36	\$ 11,659	4.4 years

As of December 31, 2016, total unrecognized compensation cost related to stock options expected to be recognized over the weighted-average period of approximately 2.3 years is \$2,281.

The total intrinsic value of options exercised during the years ended December 31, 2016, 2015, and 2014 was \$218, \$740, and \$940, respectively. The total fair value of stock options vested during the years ended December 31, 2016, 2015, and 2014 was \$3,914, \$3,625, and \$3,163, respectively.

CHART INDUSTRIES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(Dollars and shares in thousands, except per share amounts)

Restricted Stock and RSUs

Restricted stock and RSUs generally vest ratably over a three-year period and are valued based on the Company's market price on the date of grant. The following table summarizes the Company's unvested restricted stock and RSUs activity:

	December 31, 2016	
	Number of Shares	Weighted-Average Grant-Date Fair Value
Unvested at beginning of year	145	\$ 46.40
Granted	283	19.08
Forfeited	(35)	26.45
Vested	(64)	50.66
Unvested at end of year	329	\$ 24.06

As of December 31, 2016, total unrecognized compensation cost related to unvested restricted stock and RSUs expected to be recognized over the weighted-average period of approximately 1.7 years is \$2,112.

The weighted-average grant-date fair value of restricted stock and RSUs granted during the years ended December 31, 2016, 2015, and 2014 was \$19.08, \$34.15, and \$92.17, respectively. The total fair value of restricted stock and RSUs that vested during the years ended December 31, 2016, 2015, and 2014 was \$1,182, \$1,563, and \$3,930, respectively.

Performance Units

Performance units are earned over a three-year period. Based on the attainment of pre-determined performance condition targets as determined by the Compensation Committee of the Board of Directors, performance units earned may be in the range of between 0% and 200%. The following table summarizes the Company's performance units activity:

	December 31, 2016	
	Number of Shares	Weighted-Average Grant-Date Fair Value
Unvested at beginning of year	59	\$ 59.15
Granted	58	19.94
Forfeited	(13)	37.72
Vested	(46)	41.25
Unvested at end of year	58	\$ 32.39

As of December 31, 2016, total unrecognized compensation cost related to performance units expected to be recognized over a weighted-average period of approximately 1.8 years is \$530.

The weighted-average grant-date fair value of performance units granted during the years ended December 31, 2016, 2015, and 2014 was \$19.94, \$28.25, and \$93.34, respectively. The total fair value of performance units that vested during the years ended December 31, 2016, 2015, and 2014 was \$1,843, \$842, and \$2,650, respectively.

CHART INDUSTRIES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(Dollars and shares in thousands, except per share amounts)

Leveraged Restricted Share Units

Leveraged restricted share unit awards vest based on the attainment of pre-determined market condition targets as determined by the Compensation Committee of the Board of Directors over a three-year performance period. Units earned may be in the range of between 50% and 150%. The Company valued the leverage restricted share unit awards based on market conditions using a Monte Carlo Simulation model. The following table summarizes the Company's leveraged restricted share unit awards activity:

	December 31, 2016	
	Number of Shares	Weighted-average Grant-Date Fair Value
Unvested at beginning of year	41	\$ 92.66
Forfeited	(3)	106.90
Vested	(28)	68.85
Unvested at end of year	10	\$ 106.90

As of December 31, 2016, total unrecognized compensation cost related to leveraged restricted share awards of \$210 will be recognized during 2017.

The weighted-average grant-date fair value of leveraged restricted share awards granted during the year ended December 31, 2014 was \$106.90. The total fair value of leveraged restricted share awards that vested during the years ended December 31, 2016 and 2015 was \$1,028 and \$619, respectively. No leveraged restricted share awards vested during the year ended December 31, 2014.

Directors' Stock Grants

In 2016, 2015, and 2014, the Company granted the non-employee directors stock awards covering 28, 23, and 8 shares of common stock, respectively, which had fair values of \$633, \$682, and \$588, respectively. These stock awards were fully vested on the grant date. Likewise, the fair values were recognized immediately on the grant date.

NOTE 17 — Lease Commitments

The Company incurred \$9,527, \$11,147, and \$11,375 of rental expense under operating leases for the years ended December 31, 2016, 2015, and 2014, respectively. Certain leases contain rent escalation clauses and lease concessions that require additional rental payments in the later years of the term. Rent expense for these types of leases is recognized on a straight-line basis over the minimum lease term. In addition, the Company has the right, but no obligation, to renew certain leases for various renewal terms.

The following table summarizes the future minimum lease payments for non-cancelable operating leases as of December 31, 2016:

2017	\$	9,800
2018		8,400
2019		7,200
2020		5,300
2021		3,800
Thereafter		6,800
Total future minimum lease payments	\$	41,300

NOTE 18 — Commitments and Contingencies

Environmental

The Company is subject to federal, state, local, and foreign environmental laws and regulations concerning, among other matters, waste water effluents, air emissions, and handling and disposal of hazardous materials, such as cleaning fluids. The Company is involved with environmental compliance, investigation, monitoring, and remediation activities at certain of its owned

CHART INDUSTRIES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(Dollars and shares in thousands, except per share amounts)

and formerly owned manufacturing facilities and at one owned facility that is leased to a third party, and, except for these continuing remediation efforts, believes it is currently in substantial compliance with all known environmental regulations. At December 31, 2016 and 2015, the Company had undiscounted accrued environmental reserves of \$3,003 and \$3,226, respectively. The Company accrues for certain environmental remediation-related activities for which commitments or remediation plans have been developed and for which costs can be reasonably estimated. These estimates are determined based upon currently available facts and circumstances regarding each facility. Actual costs incurred may vary from these estimates due to the inherent uncertainties involved. Future expenditures relating to these environmental remediation efforts are expected to be made over the next 12 years as ongoing costs of remediation programs.

Although the Company believes it has adequately provided for the cost of all known environmental conditions, the applicable regulatory agencies could insist upon different and more costly remediation than those the Company believes are adequate or required by existing law or third parties may seek to impose environmental liabilities on the Company. The Company believes that any additional liability in excess of amounts accrued which may result from the resolution of such matters will not have a material adverse effect on the Company's financial position, liquidity, cash flows or results of operations.

Legal Proceedings

The Company is occasionally subject to various legal claims related to performance under contracts, product liability, taxes, employment matters, environmental matters, intellectual property, and other matters incidental to the normal course of its business. Based on the Company's historical experience in litigating these claims, as well as the Company's current assessment of the underlying merits of the claims and applicable insurance, if any, management believes that the final resolution of these matters will not have a material adverse effect on the Company's financial position, liquidity, cash flows, or results of operations. Future developments may, however, result in resolution of these legal claims in a way that could have a material adverse effect.

CHART INDUSTRIES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(Dollars and shares in thousands, except per share amounts)

NOTE 19 — Restructuring Activities

Due to economic conditions, including low energy prices and global competition, the Company implemented a number of cost reduction or avoidance actions during 2015 and 2016, including headcount reductions. During the year ended December 31, 2016, the Company incurred severance and other restructuring charges of \$10,928 associated with headcount reductions in all of its segments. These charges were recorded in cost of sales (\$4,412) and selling, general, and administrative expenses (\$6,516) in the consolidated statement of operations. For the year ended December 31, 2015, the Company incurred severance expense of \$7,448, primarily recorded in selling, general and administrative expenses in the consolidated statement of operations. The Company currently expects additional severance and restructuring charges in 2017 to be approximately \$10,400 (Corporate - \$3,300, BioMedical - \$2,900, E&C - \$3,000 and D&S - \$1,200). The Company is closely monitoring its end markets and order rates and will continue to take appropriate and timely actions as necessary.

During 2015, Chart announced its intention to close certain D&S leased facilities. These closures were cost reduction measures in response to lower orders within D&S. Total cost incurred during 2015 related to these closures was \$4,810 and include lease exit costs, long-lived asset impairment charges, and other miscellaneous costs. Approximately \$1,700 of these costs were included in cost of sales, \$2,960 of these costs were included in selling, general and administrative expenses and \$150 of these costs were included in asset impairment in the consolidated statements of operations. The remaining accrual for the facility restructuring costs within the D&S segment as of December 31, 2016 was \$2,152. These costs are expected to be paid out over the terms of the associated leases which are expected to end in 2023.

The following tables summarize the Company's restructuring activities for the year ended December 31, 2016:

	Energy & Chemicals	Distribution & Storage	BioMedical	Corporate	Total
Balance as of December 31, 2015	\$ 1,106	\$ 3,446	\$ 430	\$ 850	\$ 5,832
Restructuring charges	962	3,842	1,957	4,167	10,928
Cash payments and other	(1,941)	(4,424)	(1,079)	(1,992)	(9,436)
Balance as of December 31, 2016	<u>\$ 127</u>	<u>\$ 2,864</u>	<u>\$ 1,308</u>	<u>\$ 3,025</u>	<u>\$ 7,324</u>

NOTE 20 — Segment and Geographic Information

The structure of the Company's internal organization is divided into the following reportable segments, which are also the Company's operating segments: E&C, D&S, and BioMedical. The Company's reportable segments are business units that are each managed separately because they manufacture, offer, and distribute distinct products with different production processes and sales and marketing approaches. The E&C and D&S segments manufacture products used primarily in energy-related and industrial applications, such as the separation, liquefaction, distribution, and storage of hydrocarbon and industrial gases. The BioMedical segment supplies cryogenic and other equipment used in the medical, biological research, and animal breeding industries. Due to the nature of the products that each segment sells, intersegment sales are not material. Corporate includes operating expenses for executive management, accounting, tax, treasury, corporate development, human resources, information technology, investor relations, legal, internal audit, and risk management.

The Company evaluates performance and allocates resources based on operating income or loss from continuing operations before interest expense, net, financing costs amortization, foreign currency loss (gain), income tax expense, net, and noncontrolling interests, net of taxes. The accounting policies of the reportable segments are the same as those described in Note 2.

Capital expenditures	24,834	29,583	3,484	4,234	62,135

⁽¹⁾ During the third quarter of 2016, the Company recovered for breaches of representations and warranties primarily related to warranty costs for certain product lines acquired in the 2012 acquisition of AirSep under the related representation and warranty insurance. For the year ended December 31, 2016, this reduced BioMedical segment's cost of sales by \$15,145 and Corporate SG&A expenses by \$376, net of associated legal fees recorded in 2016. The 2016 operating income also includes asset impairment charges of \$1,217 attributed to D&S.

⁽²⁾ Beginning in 2016, the Company allocates share-based compensation expense to each operating segment and maintains share-based compensation expense related to Corporate employees at Corporate. Prior to 2016, all share-based compensation expense was recorded at Corporate. Reclassifications from Corporate to the operating segments have been made to the 2015 and 2014 SG&A to conform to the 2016 presentation.

⁽³⁾ Corporate assets consist primarily of cash, cash equivalents, and deferred income taxes.

⁽⁴⁾ Includes asset impairment charges of \$255,116 for the year ended December 31, 2015, attributed to E&C - \$68,796, D&S - \$2,020, and BioMedical - \$184,300.

⁽⁵⁾ The BioMedical segment's operating income included recovery of \$5,003 increasing operating income for the year ended December 31, 2014 from an escrow settlement for breaches of representations and warranties relating to warranty costs (which are in excess of the settlement amount) for certain product lines acquired from AirSep in 2012.

Total	\$ 859,154	\$ 1,040,160	\$ 1,192,952

In 2016, one customer accounted for more than 10 percent of our consolidated sales. Total sales revenue from this customer represents approximately \$98,919 of our total consolidated sales revenue and is attributable to our E&C, D&S and BioMedical segments. No customer accounted for more than 10 percent of our consolidated sales revenue in 2015 or 2014.

NOTE 21 — Quarterly Data (Unaudited)

Selected quarterly data for the years ended December 31, 2016 and 2015 are as follows:

	Year Ended December 31, 2016				
	First Quarter	Second Quarter	Third Quarter	Fourth Quarter	Total
Sales	\$ 193,757	\$ 247,095	\$ 203,930	\$ 214,372	\$ 859,154
Gross profit	52,701	86,951	69,623	57,098	266,373
Operating income ⁽¹⁾	37	34,939	20,064	2,332	57,372
Net (loss) income	(4,672)	19,563	13,684	(3,878)	24,697
Net (loss) income attributable to Chart Industries, Inc.	(4,651)	21,153	15,025	(3,290)	28,237
Net (loss) income attributable to Chart Industries, Inc. per share—basic ⁽²⁾	\$ (0.15)	\$ 0.69	\$ 0.49	\$ (0.11)	\$ 0.92
Net income (loss) attributable to Chart Industries, Inc. per share—diluted ^{(2) (3)}	\$ (0.15)	\$ 0.68	\$ 0.48	\$ (0.11)	\$ 0.91

⁽¹⁾ During the third quarter of 2016, the Company recovered for breaches of representations and warranties primarily related to warranty costs for certain product lines acquired in the 2012 acquisition of AirSep under the related representation and warranty insurance. For the year ended December 31, 2016, this reduced BioMedical segment's cost of sales by \$15,145 and Corporate SG&A expenses by \$376, net of associated legal fees recorded in 2016. The 2016 operating income also includes impairment of goodwill and intangible assets totaling \$1,217 as described in Note 3, Asset Impairments, to the consolidated financial statements.

⁽²⁾ Basic and diluted (loss) earnings per share are computed independently for each of the quarters presented. As such, the sum of quarterly basic and diluted (loss) earnings per share may not equal reported annual basic and diluted (loss) earnings per share.

⁽³⁾ Zero incremental shares from share-based awards are included in the computation of diluted net loss per share for periods in which a net loss occurs, because to do so would be anti-dilutive.

	Year Ended December 31, 2015				
	First Quarter	Second Quarter	Third Quarter	Fourth Quarter	Total
Sales	\$ 245,105	\$ 270,252	\$ 264,047	\$ 260,756	\$ 1,040,160
Gross profit	72,523	74,880	68,289	72,772	288,464
Operating income ⁽¹⁾	14,957	25,129	15,609	(238,918)	(183,223)
Net income (loss)	5,275	17,082	4,271	(231,144)	(204,516)
Net income (loss) attributable to Chart Industries, Inc.	5,246	17,157	4,760	(230,123)	(202,960)
Net income (loss) attributable to Chart Industries, Inc. per share—basic ⁽²⁾	\$ 0.17	\$ 0.56	\$ 0.16	\$ (7.54)	\$ (6.66)
Net income (loss) attributable to Chart Industries, Inc. per share—diluted ^{(2) (3)}	\$ 0.17	\$ 0.56	\$ 0.15	\$ (7.54)	\$ (6.66)

⁽¹⁾ Includes impairment of goodwill and intangible assets totaling \$253,560 as described in Note 3, Asset Impairments, to the consolidated financial statements.

⁽²⁾ Basic and diluted (loss) earnings per share are computed independently for each of the quarters presented. As such, the sum of quarterly basic and diluted (loss) earnings per share may not equal reported annual basic and diluted (loss) earnings per share.

⁽³⁾ Zero incremental shares from share-based awards are included in the computation of diluted net loss per share for periods in which a net loss occurs, because to do so would be anti-dilutive.

Section 2: EX-10.12 (EXHIBIT 10.12)

Exhibit 10.12

EMPLOYMENT AGREEMENT

EMPLOYMENT AGREEMENT (the "Agreement") dated November 4, 2016 by and between Chart Industries, Inc. (the "Company") and Robert H. Wolfe (the "Executive").

The Company desires to employ Executive and to enter into an agreement embodying the terms of such employment; and

Executive desires to accept such employment and enter into such an agreement.

In consideration of the premises and mutual covenants herein and for other good and valuable consideration, the parties agree as follows:

1. **Term of Employment.** Subject to the provisions of Section 8 of this Agreement, Executive shall be employed by the Company, on the terms and subject to the conditions set forth in this Agreement, for the period commencing on November 4, 2016, and ending on the first anniversary of said date (the "Employment Term"). Thereafter the Employment Term shall automatically be extended on November 4 of each year for a period of one year from such date. In addition, in the event of a Change in Control, the Employment Term shall automatically be extended for a period of three years beginning on the date of the Change in Control and ending on the third anniversary of the date of such Change in Control (unless further extended under the immediately preceding sentence). The Company or Executive may give notice to the other party that the Employment Term shall no longer be extended (the "Non-Renewal Notice"), in which event the Employment Term shall expire on the latest of: (i) such first anniversary of the original Employment Term commencement date, (ii) such third anniversary of a Change in Control, or (iii) the first anniversary of the delivery of such Non-Renewal Notice. In any case, the Employment Term may be terminated earlier under the terms and conditions set forth herein.
2. **Position.**
 - a. **Title.** During the Employment Term, Executive shall serve as the Company's Vice President, General Counsel & Secretary. In such position, Executive shall have such duties, authority and responsibility as shall be determined from time to time by the Board of Directors of the Company (the "Board"), the Chief Executive Officer or the Chief Operating Officer of the Company, which duties, authority and responsibility are consistent with the position of Vice President, General Counsel & Secretary of the Company. It is anticipated that Executive will remain in this role until his successor is identified, at which point he may continue in employment with the Company as Assistant General Counsel or such other position and at such other compensation as may be determined by the Chief Executive Officer or Chief Operating Officer at that time.
 - b. **Best Efforts.** During the Employment Term, Executive will devote Executive's full business time and best efforts to the performance of Executive's duties hereunder and will not engage in any other business, profession or occupation for compensation or otherwise which would conflict or interfere with the rendition of such services either directly or indirectly, without the prior written consent of the Board; provided that nothing herein shall preclude Executive, subject to the prior approval of the Board, from accepting appointment to or continue to serve on any board of directors or trustees of any business corporation or any charitable organization; provided in each case, and in the aggregate, that such activities do not conflict or interfere with the performance of Executive's duties hereunder or conflict with Section 10.
 - c. **Place of Employment.** In connection with Executive's employment by the Company, Executive shall be currently based in Houston, TX, but will be required to travel as required by the Executive's duties and responsibilities, including regular travel to Company headquarters.
3. **Base Salary.** During the Employment Term, the Company shall pay Executive a base salary at the annual rate of \$345,000, payable in regular installments in accordance with the Company's usual payment practices. Executive shall be entitled to such increases in Executive's base salary, if any, as may be determined from time to time in the sole discretion of the Board or any duly authorized committee thereof. Executive's annual base salary, as in effect from time to time, is hereinafter referred to as the "Base Salary."
4. **Annual Bonus.** With respect to each full fiscal year during the Employment Term (commencing with the 2017 fiscal year), Executive shall be eligible to earn an annual bonus award (an "Annual Bonus") of an amount,

expressed as a percentage of Executive's Base Salary, as determined by the Board, or any duly authorized committee thereof, within the first three months of each fiscal year of the Employment Term (with it being understood that such percentage of Executive's Base Salary is the "Target"), based upon the achievement of the performance targets established by the Board, or any duly authorized committee thereof, within the first three months of each fiscal year during the Employment Term. For the 2016 fiscal year, executive's Annual Bonus will be prorated between his prior bonus target and performance targets for the period of January 1, 2016 through November 4, 2016, and his Target, which will be 60%, and new performance metrics for the period of November 4, 2016 through December 31, 2016. The Annual Bonus, if any, shall be paid to Executive within two and one-half (2.5) months after the end of the applicable fiscal year. Any Annual Bonus payable hereunder shall be determined in accordance with the terms of the Company's Cash Incentive Plan, as currently in effect and as it may be amended from time to time, including any successor plan "(the Incentive Compensation Plan)". In the event of a Change In Control as defined in the Incentive Compensation Plan, the annual bonus may be pro-rated in accordance with the terms of the Incentive Compensation Plan.

5. Employee Benefits. During the Employment Term, Executive shall be entitled to participate in the Company's employee benefit plans (other than annual bonus and incentive plans) providing for health, life and disability insurance, retirement, deferred compensation and fringe benefits, as well as any equity compensation plans, as in effect from time to time (collectively "Employee Benefits"), on the same basis as those benefits are generally made available to other senior executives of the Company. Executive's right to participate in any Employee Benefits shall be subject to the applicable eligibility criteria for participation and Executive shall not be entitled to any benefits under, or based on, any Employee Benefits for any purposes of this Agreement if Executive does not during the Employment Term satisfy the eligibility criteria for participation in such Employee Benefits. Any equity incentive granted, awarded and held by the Executive shall be governed by the applicable terms of any such grant and award, and shall not be impacted by the terms of this Agreement, except to the extent taken into account in determinations under Section 9.

6. Vacation. During the Employment Term, Executive shall be entitled to standard vacation and other paid time off benefits in accordance with the policies in Houston, TX, and to be taken at such times as chosen by Executive.

7. Business Expenses and Perquisites.

a. Expenses. During the Employment Term, reasonable business expenses incurred by Executive in the performance of Executive's duties hereunder shall be reimbursed by the Company in accordance with Company policies.

b. Perquisites. During the Employment Term, Executive shall be eligible for an automobile allowance of up to \$800 per month, consistent with the Company's current practices.

8. Termination. The Employment Term and Executive's employment hereunder may be terminated by either party at any time and for any reason; provided that Executive will be required to give the Company at least 60 days advance written notice of any resignation of Executive's employment. The provisions of this Section 8 governs Executive's rights upon Termination of Employment with the Company and its affiliates. "Termination of Employment" as used in this Agreement means the separation from service, within the meaning of Section 409A of the Internal Revenue Code of 1986, as amended from time to time ("Code", any reference in this Agreement to a Section of the Code shall include all lawful regulations and pronouncements promulgated thereunder, as well as any successor Sections of the Code having the same or similar purpose), of Executive with the Company and all of its affiliates, for any reason, including without limitation, quit, discharge, or retirement, or a leave of absence (including military leave, sick leave, or other bona fide leave of absence such as temporary employment by the government if the period of such leave exceeds the greater of six months, or the period for which Executive's right to reemployment is provided either by statute or by contract) or permanent decrease in service to a level that is no more than Twenty Percent (20%) of its prior level. For this purpose, whether a Termination of Employment has occurred is determined based on whether it is reasonably anticipated that no further services will be performed by Executive after a certain date or that the level of bona fide services Executive will perform after such date (whether as an employee or as an independent contractor) would permanently decrease to no more than Twenty Percent (20%) of the average level of bona fide services performed (whether as an employee or an independent contractor) over the immediately preceding 36-month period (or the full period of services if Executive has been providing services less than 36 months). The terms "Terminate" or "Terminated," when used in reference to Executive's employment or the Employment Period, shall refer to a Termination of Employment as set forth in this paragraph. "Date of Termination" refers to the effective date of Executive's Termination of Employment.

a. Termination By the Company For Cause or By Executive Resignation Without Good Reason.

(i) Events. The Employment Term and Executive's employment hereunder may be terminated by the Company for Cause (as defined below) and shall terminate automatically upon Executive's resignation without Good Reason (as defined in Section 8(c)); provided that Executive will be required to give the Company at least 60 days advance written notice of a resignation without Good Reason.

(ii) For Cause. For purposes of this Agreement, "Cause" shall mean the Executive's (A) willful failure to perform duties which, if curable, is not cured promptly, or in any event within ten (10) days, following the first written notice of such failure from the Company, (B) commission of, or plea of guilty to or no contest to a (x) felony or (y) crime involving moral turpitude, (C) willful malfeasance or misconduct which is demonstrably injurious to the Company or its subsidiaries or affiliates, (D) material breach of the material terms of this Agreement, including, without limitation, any non-competition, non-solicitation or confidentiality provisions, (E) commission of any act of gross negligence, corporate waste, disloyalty or unfaithfulness to the Company which adversely affects the business of the Company or its subsidiaries or

affiliates, or (F) any other act or course of conduct which will demonstrably have a material adverse effect on the Company, a subsidiary or affiliate's business.

(iii) Compensation. If Executive's employment is terminated by the Company for Cause, or if Executive resigns without Good Reason, Executive shall be entitled to receive the amounts in clauses (A) through (D) below referred to herein as "Accrued Rights":

(A) the Base Salary through the Date of Termination;

(B) any Annual Bonus earned, but unpaid, as of the Date of Termination for the immediately preceding fiscal year, paid in accordance with Section 4 (except to the extent payment is otherwise deferred pursuant to any applicable deferred compensation arrangement with the Company);

(C) reimbursement, within 60 days following submission by Executive to the Company of appropriate supporting documentation, for any unreimbursed business expenses properly incurred by Executive in accordance with Company policy prior to the date of Executive's Termination of Employment; provided claims for such reimbursement (accompanied by appropriate supporting documentation) are submitted to the Company within 90 days following the date of Executive's Termination of Employment; and

(D) such Employee Benefits, if any, as to which Executive may be entitled under the employee benefit plans of the Company, including payment for any accrued but unused vacation within 30 days following the date of Executive's Date of Termination.

Following such Termination of Employment by the Company for Cause or resignation by Executive without Good Reason, except as set forth in this Section 8(a)(iii), Executive shall have no further rights to any compensation or any other benefits under this Agreement.

b. Disability or Death.

(i) Events. The Employment Term and Executive's employment hereunder shall terminate upon Executive's death and may be terminated by the Company if Executive becomes physically or mentally incapacitated and is therefore unable for a period of six (6) consecutive months or for an aggregate of nine (9) months in any twenty-four (24) consecutive month period to perform Executive's duties (such incapacity is hereinafter referred to as "Disability"). In no event shall an Executive's employment be continued beyond the 29th month of absence due to Executive's Disability. Any question as to the existence of the Disability of Executive as to which Executive and the Company cannot agree shall be determined in writing by a qualified independent physician mutually acceptable to Executive and the Company. If Executive and the Company cannot agree as to a qualified independent physician, each shall appoint such a physician and those two physicians shall select a third who shall make such determination in writing. The determination of Disability made in writing to the Company and Executive shall be final and conclusive for all purposes of the Agreement.

(ii) Compensation. Upon Executive's Termination of Employment hereunder for either Disability or death, Executive or Executive's estate (as the case may be) shall be entitled to receive:

(A) the Accrued Rights; and

(B) a pro rata portion of the Annual Bonus, if any, that Executive would have been entitled to receive pursuant to Section 4 hereof for such year based upon the Company's actual results for the year of termination and the percentage of the fiscal year that shall have elapsed through the Executive's Date of Termination, payable to Executive pursuant to Section 4 had Executive's employment not terminated.

Following Executive's Termination of Employment due to death or Disability, except as set forth in this Section 8(b)(ii), Executive shall have no further rights to any compensation or any other benefits under this Agreement.

c. Termination by the Company Without Cause or Resignation by Executive for Good Reason.

(i) Events. The Employment Term and Executive's employment hereunder may be terminated by the Company without Cause or by Executive's resignation for Good Reason at any time including during the Protected Period.

(ii) Good Reason. For purposes of this Agreement, "Good Reason" shall mean, without Executive's consent: (i) a material diminution in Executive's base salary (excluding any general salary reduction similarly affecting substantially all other senior executives of the Company as a result of a material adverse change in the Company's prospects or business); (ii) a material diminution in Executive's authority, duties, or responsibilities; (iii) a material change in the geographic location at which Executive must perform services; or (iv) any other action or inaction that constitutes a material breach by the Company of this Agreement; provided, however, that "Good Reason" shall not be deemed to exist unless: (A) the Executive has provided notice to the Company of the existence of one or more of the conditions listed in (i) through (iv) within 90 days after the initial occurrence of such condition or conditions; and (B) such condition or conditions have not been cured by the Company within 30 days after receipt of such notice. Simply the receipt by the Executive of a Non-Renewal Notice from the Company shall not, in and of itself, be deemed to be an event of "Good Reason" under this Agreement. Notwithstanding anything in this Agreement to the contrary, it shall not constitute "Good Reason" if the Executive's successor is identified as set forth in Section 2.a. herein and the terms of Executive's employment are modified accordingly.

(iii) Protected Period. For purposes of this Agreement, "Protected Period" shall mean the period of time commencing on the date of a Change in Control and ending two years after such date.

(iv) Change in Control. For purposes of this Agreement, "Change in Control" shall mean, with respect to the Executive, the happening of any of the following events (but only if with respect to the Executive, such event would constitute a change in the ownership or effective control of the corporation, or in the ownership of a substantial portion of the assets of the corporation, as defined under Section 409A of the Code):

(A) a change in the ownership of the Company (or any affiliate which either employs the Executive or is a direct or indirect parent of such employer) by which any one person, or more than one person acting as a group, acquires ownership of stock of the Company (or such an affiliate) that, together with stock held by such person or group, constitutes more than Fifty Percent (50%) of the total fair market value or total voting power of the stock of the Company (or such an affiliate). However, if any one person, or more than one person acting as a group, is considered to own more than 50% of the total fair market value or total voting power of the stock of the Company (or such an affiliate), the acquisition of additional stock by the same person or persons is not considered to cause a Change in Control. (An increase in the percentage of stock owned by any one person, or persons acting as a group, as a result of a transaction in which the Company (or such an affiliate) acquires its stock in exchange for property will be treated as an acquisition of stock for purposes of this definition. This parenthetical phrase applies only when there is a transfer of stock of the Company (or issuance of stock of the Company) (or such an affiliate) and stock in the Company (or such an affiliate) remains outstanding after the transaction.)

(B) a change in effective control of the Company (or any affiliate which either employs the Executive or is a direct or indirect parent of such employer) by which:

(1) any one person, or more than one person acting as a group, acquires (or has acquired during the 12-month period ending on the date of the most recent acquisition by such person or persons) ownership of stock of the Company (or such an affiliate) possessing Thirty Percent (30%) or more of the total voting power of the stock of the Company (or such an affiliate); or

(2) a majority of members of the Board of Directors is replaced during any 12-month period by Directors whose appointment or election is not endorsed by a majority of the members of the Board of Directors before the date of the appointment or election.

(C) a change in the ownership of a substantial portion of the assets of the Company (or any affiliate which either employs the Executive or is a direct or indirect parent of such employer) by which any one person, or more than one person acting as a group, acquires (or has acquired during the 12-month period ending on the date of the most recent acquisition by such person or persons) assets from the Company (or such an affiliate) that have a total gross fair market value equal to or more than Forty Percent (40%) of the total gross fair market value of all of the assets of the Company (or such an affiliate) immediately prior to such acquisition or acquisitions. For this purpose, gross fair market value means the value of the assets of the corporation, or the value of the assets being disposed of, determined without regard to any liabilities associated with such assets.

For purposes of this definition, persons will be considered to be acting as a group if they are owners of a corporation that enters into a merger, consolidation, purchase or acquisition of stock, or similar business transaction with the Company. If a person, including an entity, owns stock in both corporations that enter into a merger, consolidation, purchase or acquisition of stock, or similar transaction, such shareholder is considered to be acting as a group with other shareholders only with respect to the ownership in that corporation before the transaction giving rise to the change and not with respect to the ownership interest in the other corporation.

(v) Compensation if Terminated Outside of Protected Period. If, at any time other than during the Protected Period, the Executive's employment is terminated by the Company without Cause (other than by reason of death or Disability) or if Executive resigns for Good Reason within 6 months of the condition giving rise to the good reason, Executive shall be entitled to receive:

(A) the Accrued Rights;

(B) subject to Executive's (x) continued compliance with the provisions of Sections 10 and 11 and (y) execution and delivery of a general release of claims against the Company and its affiliates in a form reasonably acceptable to the Company, payment in one lump sum of:

(1) 100% of the greater of the current Base Salary or Executive's highest Base Salary paid within the Employment Term; plus

(2) the greater of (i) 100% of Executive's Target Annual Bonus for the fiscal year in which Executive's Termination of Employment occurs or (ii) 100% of Executive's Target Annual Bonus for the fiscal year immediately preceding the fiscal year in which Executive's Termination of Employment occurs,

payable to Executive in one lump sum immediately following the expiration of the revocation period provided for in such release, but in no event later than two and a half (2-1/2) months after the end of the year in which the Executive's Termination of Employment occurred; and

(C) a lump sum payment equal to the premium subsidy the Company would have otherwise paid on Executive's behalf under the Company's health insurance plan had he remained employed for the twelve (12) months period following the Date of Termination.

(vi) Compensation if Terminated during Protected Period. If, during the Protected Period, either the Executive's employment is Terminated by the Company without Cause (other than by reason of death or Disability) or if Executive resigns for Good Reason, Executive shall be entitled to receive:

(A) the Accrued Rights;

(B) subject to Executive's (x) continued compliance with the provisions of Sections 10 and 11 and (y)

execution and delivery of a general release of claims against the Company and its affiliates in a form reasonably acceptable to the Company, payment in one lump sum of:

(1) 100% of the greater of the current Base Salary or Executive's highest Base Salary paid within the Employment Term; plus

(2) the greater of (i) 100% of Executive's Target Annual Bonus for the fiscal year in which Executive's Termination of Employment occurs or (ii) 100% of Executive's Target Annual Bonus for the fiscal year immediately preceding the fiscal year in which the Change in Control occurs;

payable generally within ten (10) business days after Executive's Date of Termination, or, if later, upon the expiration of the revocation period provided for in such release, except when such payment is delayed and paid in accordance with Section 9(b) for a determination under Section 9, but in no event later than two and a half (2-1/2) months after the end of the year in which the Executive's Termination of Employment occurred; and

(C) a lump sum payment equal to the premium subsidy the Company would have otherwise paid on Executive's behalf under the Company's health insurance plan had he remained employed for the twelve (12) months period following the Date of Termination.

Following Executive's Termination of Employment by the Company without Cause (other than by reason of Executive's death or Disability) or by Executive's resignation for Good Reason, except as set forth in this Section 8(c), Executive shall have no further rights to any compensation or any other benefits under this Agreement.

d. Expiration of Employment Term.

(i) Election Not to Renew the Employment Term. In the event either party provides the other with the Non-Renewal Notice pursuant to Section 1, unless Executive's employment is earlier terminated pursuant to paragraphs (a), (b) or (c) of this Section 8, the expiration of the Employment Term and the Executive's Termination of Employment hereunder (whether or not Executive continues as an employee of the Company thereafter) shall be deemed to occur on the close of business on the last day of such Employment Term and Executive shall be entitled to receive the Accrued Rights. The Company's providing of a Non-Renewal Notice under Section 1 shall not prejudice in any way Executive's right to assert an event of Good Reason (as such term is defined above), whether related to such Non-Renewal Notice or otherwise, at any time during the Employment Term.

Following such termination of Executive's employment hereunder, except as set forth in this Section 8(d)(i), Executive shall have no further rights to any compensation or any other benefits under this Agreement.

(ii) Continued Employment Beyond the Expiration of the Employment Term. Unless the parties otherwise agree in writing, continuation of Executive's employment with the Company beyond the expiration of the Employment Term shall be deemed an employment at-will and shall not be deemed to extend any of the provisions of this Agreement and Executive's employment may thereafter be terminated at will by either Executive or the Company; provided that the provisions of Sections 10, 11 and 12 of this Agreement shall survive any termination of this Agreement or Executive's Termination of Employment hereunder.

e. Notice of Termination. Any purported Termination of Employment by the Company or by Executive (other than due to Executive's death) shall be communicated by written Notice of Termination to the other party hereto in accordance with Section 13(i) hereof. For purposes of this Agreement, a "Notice of Termination" shall mean a notice which shall indicate the specific termination provision in this Agreement relied upon and shall set forth in reasonable detail the facts and circumstances claimed to provide a basis for Termination of Employment under the provision so indicated.

f. Board/Committee Resignation. Upon termination of Executive's employment for any reason, Executive agrees to resign, as of the date of such termination and to the extent applicable, from the Board (and any committees thereof) and the Board of Directors (and any committees thereof) of any of the Company's affiliates.

9. Conditional Reduction in Payments.

a. Notwithstanding anything in this Agreement to the contrary, in the event that it shall be determined (as hereafter provided) that any payment or distribution provided for pursuant to the terms of this Agreement for the benefit of Executive, when aggregated with any other payments or benefits received or receivable by Executive (individually and collectively, a "Payment"), would constitute "parachute payments" within the meaning of Section 280G of the Code, and would be subject to the excise tax imposed by Section 4999 of the Code or to any similar tax imposed by state or local law, or to any interest or penalties with respect to such taxes (such tax or taxes, together with any such interest and penalties, being hereafter collectively referred to as the "Excise Tax"), then Executive's payments under Section 8 hereof shall be either:

(i) delivered in full, or

(ii) reduced to the minimum extent necessary so that no portion of the Payment, after such reduction, constitutes an Excess Parachute Payment (as defined in Section 280G(b) of the Code) (the amount of such reduction shall be referred to as the “Excess Amount”);

whichever of the foregoing amounts, taking into account the applicable federal, state and local income taxes and the Excise Tax, results in the receipt by Executive on an after-tax basis of the greatest amount of benefits, notwithstanding that all or some portion of such benefits may be taxable under Section 4999 of the Code.

b. All determinations required to be made under this Section 9, including whether an Excise Tax is payable by Executive and the amount of such Excise Tax and whether a reduction in the Payment is to be made and the amount of such Excess Amount, if any, shall be made by a nationally recognized accounting firm proposed by the Company and reasonably acceptable to Executive (which accounting firm shall be the “Accounting Firm” hereunder). The Company or Executive shall direct the Accounting Firm to submit its determination and detailed supporting calculations to both the Company and Executive within 30 calendar days after the Date of Termination, if applicable, and any other time or times as may be requested by the Company or Executive. The Company shall pay Executive’s payments under Section 8 hereof, as reduced or not reduced pursuant to the final determination of the Accounting Firm and Subsection 9(a) above, no later than the time otherwise required hereunder. If the Accounting Firm determines that no Excise Tax is payable by Executive, it shall, at the same time as it makes such determination, furnish the Company and Executive an opinion that Executive has substantial authority not to report any Excise Tax on Executive’s federal, state or local income or other tax return.

c. As a result of the uncertainty in the application of Section 4999 of the Code and the possibility of similar uncertainty regarding applicable state or local tax law at the time of any determination by the Accounting Firm hereunder, it is possible that, pursuant to a final determination of a court or an Internal Revenue Service proceeding which has been finally and conclusively resolved, an Excess Parachute Payment was received by Executive which would have been intended to be reduced by the Excess Amount pursuant to Subsection 9(a) above. In such case, then such amount received by Executive shall be deemed to be an overpayment, and Executive shall repay the amount equal to the Excess Amount (to the extent received by Executive) to the Company on demand (but no less than ten days after Executive receives written demand).

d. The Company and Executive shall each provide the Accounting Firm access to and copies of any books, records and documents in the possession of the Company or Executive, as the case may be, reasonably requested by the Accounting Firm, and otherwise cooperate with the Accounting Firm in connection with the preparation and issuance of the determinations and calculations contemplated by Subsection 9(b). Any determination by the Accounting Firm as to the amount of any Excess Amount shall be binding upon the Company and Executive.

e. The fees and expenses of the Accounting Firm for its services in connection with the determinations and calculations contemplated by Subsection 9(b) shall be borne by the Company.

10. Non-Competition.

a. Executive acknowledges and recognizes the highly competitive nature of the businesses of the Company and its affiliates and accordingly agrees as follows:

(i) During the Employment Term and the twelve (12) months following the date of Executive’s Termination of Employment (the “Restricted Period”), Executive will not, whether on Executive’s own behalf or on behalf of or in conjunction with any person, firm, partnership, joint venture, association, corporation or other business organization, entity or enterprise whatsoever (“Person”), directly or indirectly solicit or assist in soliciting in competition with the Company, the business of any client or customer or prospective client or customer:

(A) with whom Executive had personal contact or dealings on behalf of the Company during the one year period preceding the earlier of the Executive’s Termination of Employment or such solicitation;

(B) with whom employees reporting to Executive have had personal contact or dealings on behalf of the Company during the one year immediately preceding the Executive’s Termination of Employment; or

(C) for whom Executive had direct or indirect responsibility during the one year immediately preceding Executive’s Termination of Employment.

(ii) During the Restricted Period, Executive will not directly or indirectly:

(A) engage in (1) the business of manufacturing equipment used in (x) the production, storage and end-use of hydrocarbon and industrial gases business or (y) low temperature and cryogenic applications, (2) any other businesses which the Company or its subsidiaries engage in during the term of Executive’s employment with the Company and (3) any businesses which, as of the date of Executive’s Termination of Employment, the Company or its subsidiaries both (x) have specific plans to conduct in the future (and as to which Executive is aware of such planning) and (y) have allocated or invested capital as of the date of such Termination of Employment (a “Competitive Business”);

(B) enter the employ of, or render any services to, any Person (or any division or controlled or controlling affiliate of any Person) who or which engages in a Competitive Business;

(C) acquire a financial interest in, or otherwise become actively involved with, any Competitive Business, directly or indirectly, as an individual, partner, shareholder, officer, director, principal, agent, trustee or consultant; or

(D) interfere with, or attempt to interfere with, business relationships (whether formed before, on or after the date of this Agreement) between the Company or any of its affiliates and customers, clients, suppliers, partners, members or investors of the Company or its affiliates.

(iii) Notwithstanding anything to the contrary in this Agreement, Executive may, directly or indirectly own, solely as an investment, securities of any Person engaged in the business of the Company or its affiliates which are publicly traded on a national or regional stock exchange or quotation system or on the over-the-counter market if Executive (i) is not a controlling person of, or a member of a group which controls, such person and (ii) does not, directly or indirectly, own 5% or more of any class of securities of such Person.

(iv) During the Restricted Period, Executive will not, whether on Executive's own behalf or on behalf of or in conjunction with any Person, directly or indirectly:

(A) solicit or encourage any employee of the Company or its affiliates to leave the employment of the Company or its affiliates; or

(B) hire any such employee who was employed by the Company or its affiliates as of the date of Executive's Termination of Employment with the Company or who left the employment of the Company or its affiliates coincident with, or within one year prior to or after, the termination of Executive's employment with the Company.

(v) During the Restricted Period, Executive will not, directly or indirectly, solicit or encourage to cease to work with the Company or its affiliates any consultant then under contract with the Company or its affiliates.

b. It is expressly understood and agreed that although Executive and the Company consider the restrictions contained in this Section 10 to be reasonable, if a final judicial determination is made by a court of competent jurisdiction that the time or territory or any other restriction contained in this Agreement is an unenforceable restriction against Executive, the provisions of this Agreement shall not be rendered void but shall be deemed amended to apply as to such maximum time and territory and to such maximum extent as such court may judicially determine or indicate to be enforceable. Alternatively, if any court of competent jurisdiction finds that any restriction contained in this Agreement is unenforceable, and such restriction cannot be amended so as to make it enforceable, such finding shall not affect the enforceability of any of the other restrictions contained herein.

11. Confidentiality: Intellectual Property.

a. Confidentiality.

(i) Executive will not at any time (whether during or after Executive's employment with the Company) (x) retain or use for the benefit, purposes or account of Executive or any other Person other than the Company; or (y) disclose, divulge, reveal, communicate, share, transfer or provide access to any Person outside the Company (other than its professional advisers who are bound by confidentiality obligations or other than in performing his or her duties on behalf of the Company consistent with Company policies), any non-public, proprietary or confidential information--including without limitation trade secrets, know-how, research and development, software, databases, inventions, processes, formulae, technology, designs and other intellectual property, information concerning finances, investments, profits, pricing, costs, products, services, vendors, customers, clients, partners, investors, personnel, compensation, recruiting, training, advertising, sales, marketing, promotions, government and regulatory activities and approvals -- concerning the past, current or future business, activities and operations of the Company, its subsidiaries or affiliates and/or any third party that has disclosed or provided any of same to the Company on a confidential basis ("Confidential Information") without the prior written authorization of the Board or a duly authorized committee thereof.

(ii) "Confidential Information" shall not include any information that is (a) generally known to the industry or the public other than as a result of Executive's breach of this covenant or any breach of other confidentiality obligations by third parties; (b) made legitimately available to Executive by a third party without breach of any confidentiality obligation; or (c) required by law to be disclosed; provided that Executive shall give prompt written notice to the Company of such requirement, disclose no more information than is so required, and cooperate with any attempts by the Company to obtain a protective order or similar treatment.

(iii) Upon termination of Executive's employment with the Company for any reason, Executive shall (x) cease and not thereafter commence use of any Confidential Information or intellectual property (including without limitation, any patent, invention, copyright, trade secret, trademark, trade name, logo, domain name or other source indicator) owned or used by the Company, its subsidiaries or affiliates; (y) immediately destroy, delete, or return to the Company, at the Company's option, all originals and copies in any form or medium (including memoranda, books, papers, plans, computer files, letters and other data) in Executive's possession or control (including any of the foregoing stored or located in Executive's office, home, laptop or other computer, whether or not Company property) that contain Confidential Information or otherwise relate to the business of the Company, its affiliates and subsidiaries, except that Executive may retain only those portions of any personal notes, notebooks and diaries that do not contain any Confidential Information; and (z) notify and fully cooperate with the Company regarding the delivery or destruction of any other Confidential Information of which Executive is or becomes aware.

b. Intellectual Property.

(i) If Executive has created, invented, designed, developed, contributed to or improved any works of authorship, inventions, intellectual property, materials, documents or other work product (including without limitation, research, reports, software, databases, systems, applications, presentations, textual works, content, or audiovisual materials)

("Works"), either alone or with third parties, at any time during Executive's employment by the Company and within the scope of such employment and/or with the use of any of the Company's resources ("Company Works"), Executive shall promptly and fully disclose same, to the best of his or her knowledge, to the Company and hereby irrevocably assigns, transfers and conveys, to the maximum extent permitted by applicable law, all rights and intellectual property rights therein (including rights under patent, industrial property, copyright, trademark, trade secret, unfair competition and related laws) to the Company to the extent ownership of any such rights does not vest originally in the Company.

(ii) Executive shall take all reasonably requested actions and execute all reasonably requested documents (including any licenses or assignments required by a government contract) at the Company's expense (but without further remuneration) to assist the Company in validating, maintaining, protecting, enforcing, perfecting, recording, patenting or registering any of the Company's rights in the Company Works.

(iii) Executive shall not improperly use for the benefit of, bring to any premises of, divulge, disclose, communicate, reveal, transfer or provide access to, or share with the Company any confidential, proprietary or non-public information or intellectual property relating to a former employer or other third party without the prior written permission of such third party. Executive hereby indemnifies, holds harmless and agrees to defend the Company and its officers, directors, partners, employees, agents and representatives from any breach of the foregoing covenant. Executive shall comply with all relevant policies and guidelines of the Company, including regarding the protection of confidential information and intellectual property and potential conflicts of interest. Executive acknowledges that the Company may amend any such policies and guidelines from time to time, and that Executive remains at all times bound by their most current version.

(iv) The provisions of Section 11 shall survive the Executive's Termination of Employment for any reason.

12. Specific Performance. Executive acknowledges and agrees that the Company's remedies at law for a breach or threatened breach of any of the provisions of Section 10 or Section 11 would be inadequate and the Company would suffer irreparable damages as a result of such breach or threatened breach. In recognition of this fact, Executive agrees that, in the event of such a breach or threatened breach, in addition to any remedies at law, the Company, without posting any bond, shall be entitled to cease making any payments or providing any benefit otherwise required by this Agreement and obtain equitable relief in the form of specific performance, temporary restraining order, temporary or permanent injunction or any other equitable remedy which may then be available.

13. Miscellaneous.

a. Governing Law. This Agreement shall be governed by and construed in accordance with the laws of the State of Delaware, without regard to conflicts of laws principles thereof.

b. Dispute Resolution. Except as otherwise provided in Section 12 of this Agreement, any controversy, dispute, or claim arising out of, in connection with, or in relation to, the interpretation, performance or breach of this Agreement, including, without limitation, the validity, scope, and enforceability of this section, may at the election of any party, be solely and finally settled by arbitration conducted in Cleveland, Ohio, by and in accordance with the then existing rules for commercial arbitration of the American Arbitration Association, or any successor organization and with the Expedited Procedures thereof (collectively, the "Rules"). Each of the parties hereto agrees that such arbitration shall be conducted by a single arbitrator selected in accordance with the Rules; provided that such arbitrator shall be experienced in deciding cases concerning the matter which is the subject of the dispute. Any of the parties may demand arbitration by written notice to the other and to the Arbitrator set forth in this Section 13(b) ("Demand for Arbitration"). Each of the parties agrees that if possible, the award shall be made in writing no more than 30 days following the end of the proceeding. Any award rendered by the arbitrator(s) shall be final and binding and judgment may be entered on it in any court of competent jurisdiction. Each of the parties hereto agrees to treat as confidential the results of any arbitration (including, without limitation, any findings of fact and/or law made by the arbitrator) and not to disclose such results to any unauthorized person. The parties intend that this agreement to arbitrate be valid, enforceable and irrevocable. In the event of any arbitration with regard to this Agreement, each party shall pay its own legal fees and expenses except to the extent set forth in Section 13(p), provided, however, that the Company agrees to pay the cost of the Arbitrator's fees.

c. Entire Agreement/Amendments. This Agreement contains the entire understanding of the parties with respect to the employment of Executive by the Company. There are no restrictions, agreements, promises, warranties, covenants or undertakings between the parties with respect to the subject matter herein other than those expressly set forth herein. This Agreement may not be altered, modified, or amended except by written instrument signed by the parties hereto.

d. No Waiver. The failure of a party to insist upon strict adherence to any term of this Agreement on any occasion shall not be considered a waiver of such party's rights or deprive such party of the right thereafter to insist upon strict adherence to that term or any other term of this Agreement.

e. Severability. In the event that any one or more of the provisions of this Agreement shall be or become invalid, illegal or unenforceable in any respect, the validity, legality and enforceability of the remaining provisions of this Agreement shall not be affected thereby.

f. Assignment. This Agreement, and all of Executive's rights and duties hereunder, shall not be assignable or delegable by Executive. Any purported assignment or delegation by Executive in violation of the foregoing shall be null and void ab initio and of no force and effect. This Agreement may be assigned by the Company to a person or entity which is an affiliate or a successor in interest to substantially all of the business operations of the Company. The Company will

require any person or entity which is an affiliate or a successor in interest to substantially all of the business operations of the Company to assume all obligations of the Company under this Agreement.

g. Set-Off; No Mitigation. The Company's obligation to pay Executive the amounts provided and to make the arrangements provided hereunder shall be subject to set-off, counterclaim or recoupment of amounts owed by Executive to the Company or its affiliates (the "debt"), where such debt is incurred in the ordinary course of the service relationship between Executive and the Company, the entire amount of reduction in any of the Company's taxable years does not exceed \$5,000 and the reduction is made at the same time and in the same amount as the debt otherwise would have been due and collected from Executive. Executive shall not be required to mitigate the amount of any payment provided for pursuant to this Agreement by seeking other employment.

h. Successors; Binding Agreement. This Agreement shall inure to the benefit of and be binding upon personal or legal representatives, executors, administrators, successors, heirs, distributees, devisees and legatees.

i. Notice. For the purpose of this Agreement, notices and all other communications provided for in the Agreement shall be in writing and shall be deemed to have been duly given when delivered by hand or overnight courier or three days after it has been mailed by United States registered mail, return receipt requested, postage prepaid, addressed to the respective addresses set forth below in this Agreement, or to such other address as either party may have furnished to the other in writing in accordance herewith, except that notice of change of address shall be effective only upon receipt.

If to the Company:

Chart Industries, Inc.
One Infinity Corporate Centre Drive, Suite 300
Garfield Heights, Ohio 44125
Facsimile: (440) 753-1491
Attention: Chief Financial Officer and General Counsel

If to Executive:

To the most recent address of Executive set forth in the personnel records of the Company.

j. Executive Representation. Executive hereby represents to the Company that the execution and delivery of this Agreement by Executive and the Company and the performance by Executive of Executive's duties hereunder shall not constitute a breach of, or otherwise contravene, the terms of any employment agreement or other agreement or policy to which Executive is a party or otherwise bound.

k. Prior Agreements. This Agreement supercedes all prior agreements and understandings (including verbal agreements) between Executive and the Company and/or its affiliates regarding the terms and conditions of Executive's employment with the Company and/or its affiliates, except that this Agreement does not supercede any stock option agreement, performance unit agreement, restricted stock agreement or indemnification agreement.

l. Cooperation. Executive shall provide Executive's reasonable cooperation in connection with any action or proceeding (or any appeal from any action or proceeding) which relates to events occurring during Executive's employment hereunder. This provision shall survive any termination of this Agreement.

m. Withholding Taxes. The Company may withhold from any amounts payable under this Agreement such Federal, state and local taxes as may be required to be withheld pursuant to any applicable law or regulation.

n. Counterparts. This Agreement may be signed in counterparts, each of which shall be an original, with the same effect as if the signatures thereto and hereto were upon the same instrument.

o. Compliance with Section 409A. Notwithstanding anything herein to the contrary, (i) if at the time of Executive's Termination of Employment with the Company Executive is a "specified employee" as defined in Section 409A of the Code, and the deferral of the commencement of any payments or benefits otherwise payable hereunder as a result of such Termination of Employment is necessary in order to prevent the imposition of any accelerated or additional tax under Section 409A of the Code, then the Company will defer the commencement of the payment of any such payments or benefits hereunder (without any reduction in such payments or benefits ultimately paid or provided to Executive) until the date that is six months following Executive's Termination of Employment with the Company (or the earliest date as is permitted under Section 409A of the Code), (ii) any reimbursements provided under the Agreement, including, but not limited to, in Sections 8.a.(iii)(C) and 13(p), shall be made no later than the end of Executive's taxable year following Executive's taxable year in which such expense was incurred; in addition, the amounts eligible for reimbursement, or in-kind benefits to be provided, during any one taxable year under this Agreement may not affect the expenses eligible for reimbursement in any other taxable year under this Agreement, and (iii) if any other payments of money or other benefits due to Executive hereunder could cause the application of an accelerated or additional tax under Section 409A of the Code, such payments or other benefits shall be deferred if deferral will make such payment or other benefits compliant under Section 409A of the Code, or otherwise such payment or other benefits shall be restructured, to the extent possible, in a manner, determined by the Board or any duly authorized committee thereof, that does not cause such an accelerated or additional tax or result in an additional cost to the Company. The Company

shall consult with Executive in good faith regarding the implementation of the provisions of this Section 13(o); provided that neither the Company nor any of its employees or representatives shall have any liability to Executive with respect thereto.

p. **Enforcement Costs.** The Company is aware that upon the occurrence of a Change in Control the Board of Directors or a shareholder of the Company may then cause or attempt to cause the Company to refuse to comply with its obligations under this Agreement, or may cause or attempt to cause the Company to institute, or may institute, litigation or arbitration seeking to have this Agreement declared unenforceable, or may take, or attempt to take, other action to deny Executive the benefits intended under this Agreement. In these circumstances, the purpose of this Agreement could be frustrated. It is the intent of the Company that Executive not be required to incur the expenses associated with the enforcement of Executive's rights under this Agreement by litigation, arbitration or other legal action because the cost and expense thereof would substantially detract from the benefits intended to be extended to Executive hereunder, nor be bound to negotiate any settlement of Executive's rights hereunder under threat of incurring such expenses. Accordingly, if at any time following a Change in Control, it should appear to Executive that the Company has failed to comply with any of its obligations under this Agreement or the Company or any other person takes any action to declare this Agreement void or unenforceable, or institutes any litigation, arbitration or other legal action designed to deny, diminish or recover from Executive the benefits intended to be provided to Executive hereunder, and Executive has complied with all of Executive's obligations under Sections 10 and 11, then the Company irrevocably authorizes Executive from time to time to retain counsel of Executive's choice at the expense of the Company as provided in this Section 13(p) to represent Executive in connection with the initiation or defense of any litigation, arbitration or other legal action, whether by or against the Company or any Director, officer, shareholder or other person affiliated with the Company, in any jurisdiction. The Company's obligations under this Section 13(p) shall not be conditioned on Executive's success in the prosecution or defense of any such litigation, arbitration or other legal action. Notwithstanding any existing or prior attorney-client relationship between the Company and such counsel, the Company irrevocably consents to Executive entering into an attorney-client relationship with such counsel, and in that connection the Company and Executive agree that a confidential relationship shall exist between Executive and such counsel. The reasonable fees and expenses of counsel selected from time to time by Executive as hereinabove provided shall be paid or reimbursed to Executive by the Company on a regular, periodic basis no later than 30 days after presentation by Executive of a statement or statements prepared by such counsel in accordance with its customary practices, up to a maximum of \$250,000 per year for each of the two years following the year in which the Change in Control occurs, provided that Executive presents such statement(s) no later than 30 days prior to the end of Executive's taxable year following the year in which such expenses were incurred. Notwithstanding the foregoing, this Section 13(p) shall not apply at any time unless a Change in Control has occurred.

IN WITNESS WHEREOF, the parties hereto have duly executed this Agreement as of the day and year first above written.

Section 3: EX-10.3.21 (EXHIBIT 10.3.21)

Exhibit 10.3.21

CHART INDUSTRIES, INC. AMENDED AND RESTATED 2009 OMNIBUS EQUITY PLAN

NONQUALIFIED STOCK OPTION AGREEMENT

THIS NONQUALIFIED STOCK OPTION AGREEMENT (the "Agreement") is entered into as of this ____ day of _____, 20__ (the "Grant Date"), between Chart Industries, Inc., a Delaware corporation (the "Company"), and _____ (the "Participant").

WITNESSETH:

WHEREAS, the Compensation Committee of the Board of Directors of the Company (the "Committee") administers the Chart Industries, Inc.

Amended and Restated 2009 Omnibus Equity Plan (the "Plan"); and

WHEREAS, the Committee has determined that it would be in the best interests of the Company and its stockholders to grant nonqualified stock options to the Participant upon the terms and conditions set forth in this Agreement.

NOW, THEREFORE, the Company and the Participant agree as follows:

1. Interpretation. Unless otherwise specified in this Agreement, capitalized terms shall have the meanings attributed to them under the Plan. The terms and provisions of the Plan, as it may be amended from time to time, are hereby incorporated herein by reference. In the event of a conflict between any term or provision contained herein and a term or provision of the Plan, the applicable terms and provisions of the Plan will govern.

2. Grant of the Option. As of the Grant Date, the Company grants to the Participant, under the terms and conditions of this Agreement, the right to purchase all or any part of an aggregate of _____ (____) Shares, which right will vest over a period of time in accordance with Section 4 (the "Option"), subject to adjustment as set forth in Section 3.4 of the Plan. The Option is intended to be a nonqualified stock option.

3. Option Price. The purchase price of the Shares subject to the Option shall be, and shall never be less than, the Fair Market Value of the Shares on the Grant Date. The Fair Market Value of a Share on the Grant Date is \$ _____ (the "Option Price"). The Option Price is subject to adjustment as described in Section 3.4 of the Plan.

4. Vesting.

- a. Service-Based. Subject to the Participant's continued Employment as of such dates (except as otherwise provided herein with respect to death, Disability, Retirement or Change in Control), the Option shall vest and become exercisable with respect to twenty-five percent (25%) of the Shares initially covered by the Option on each of the first, second, third and fourth anniversaries of the Grant Date.
- b. Change in Control. In the event of a Change in Control, subject to the Participant's continuous Employment from the Grant Date through the date of the Change in Control, the Option shall, to the extent not then vested and not previously forfeited or canceled, immediately become fully vested and exercisable.
- c. Termination of Employment
 - i. General Rule. If the Participant's Employment is terminated for any reason other than those reasons specifically addressed in Section 4(c), and except as otherwise provided in Section 4(b), the Unvested Portion of the Option shall be canceled and the Participant shall have no further rights with respect thereto and the Vested Portion of the Option shall remain exercisable for the period set forth in Section 5(a) of this Agreement.
 - ii. Death or Disability. If the Participant's Employment terminates as a result of death or Disability, the Option shall, to the extent not then vested and not previously canceled, immediately become fully vested and exercisable.

- iii. Retirement. If the Participant's Employment terminates as a result of Retirement, the vesting provisions of this Agreement shall continue to apply, but without giving effect to any requirement of continuous Employment.
- d. Special Terms.
 - i. At any time, the portion of the Option which has become vested and exercisable as described above is referred to as the "Vested Portion," and the portion of the Option which is then unvested is referred to as the "Unvested Portion."
 - ii. The term "Retirement" or variations thereof means a voluntary termination of Employment with the Company, its Subsidiaries and its Affiliates after either (i) attaining age 60 and completing 10 years of service with such entities or (ii) attaining age 65.
 - iii. "Cause" shall mean (i) the Participant's willful failure to perform duties which, if curable, is not cured promptly, or in any event within ten (10) days, following the first written notice of such failure from the Company, (ii) the Participant's commission of, or plea of guilty or no contest to a (x) felony or (y) crime involving moral turpitude, (iii) willful malfeasance or misconduct by the Participant which is demonstrably injurious to the Company or its Subsidiaries or Affiliates, (iv) material breach by the Participant of any non-competition, non-solicitation or confidentiality covenants, (v) commission by the Participant of any act of gross negligence, corporate waste, disloyalty or unfaithfulness to the Company which adversely affects the business of the Company or its Subsidiaries or Affiliates, or (vi) any other act or course of conduct by the Participant which will demonstrably have a material adverse effect on the Company, a Subsidiary or Affiliate's business; and
 - iv. "Good Reason" shall mean, without the Participant's consent, (i) a substantial diminution in the Participant's position or duties, material adverse change in reporting lines, or assignment of duties materially inconsistent with his position or (ii) any reduction in the Participant's base salary and/or material reduction in employee benefits in the aggregate provided to the Participant (excluding any general salary reduction or reduction in employee benefits similarly affecting substantially all other senior executives of the Company as a result of a material adverse change in the Company's prospects or business), in each case which is not cured within thirty (30) days following the Company's receipt of written notice from the Participant describing the event constituting Good Reason.
 - v. "Disability" shall mean, with respect to the Participant, a medically determinable physical or mental impairment which can be expected to result in death or can be expected to last for a continuous period of not less than 12 months which: (i) renders the Participant unable to engage in substantial gainful activity or (ii) results in the Participant receiving income replacement benefits for at least three months under an accident and health plan sponsored by the Participant's employer.

5. Exercise of Option.

- a. Period of Exercise. Subject to the provisions of the Plan and this Agreement, the Participant (or his or her successor, as appropriate) may exercise all or any part of the Vested Portion of the Option at any time prior to the earliest to occur of:
 - i. the tenth anniversary of the Grant Date;
 - ii. the first anniversary of the Participant's termination of Employment due to death or Disability;
 - iii. the fifth anniversary of the Participant's termination of Employment due to Retirement;
 - iv. thirty (30) days following the date of the Participant's termination of Employment by the Participant without Good Reason (other than Retirement) or by the Company or its Affiliates for Cause; and

- v. ninety (90) days following the date of the Participant's termination of Employment for reasons other than the reasons described in Section 5(a)(ii), 5(a)(iii) and 5(a)(iv) above.

b. Method of Exercise.

- i. Subject to Section 5(a), the Vested Portion of the Option may be exercised by delivering written notice of intent to so exercise to the Company at its principal office; provided that, the Option may be exercised with respect to whole Shares only. Such notice shall specify the number of Shares for which the Option is being exercised and shall be accompanied by full payment of the Option Price. Payment of the Option Price may be made at the election of the Participant: (w) in cash or its equivalent (e.g., by check); (x) to the extent permitted by the Committee, in Shares having a Fair Market Value as of the payment date equal to the aggregate Option Price for the Shares being purchased and satisfying such other requirements imposed by the Committee, provided that such Shares have been held by the Participant for more than six months (or such other period as established from time to time by the Committee); (y) partially in cash and, to the extent permitted by the Committee, partially in such Shares; or (z) if there is a public market for the Shares on the payment date, subject to such rules as may be established by the Committee, through the delivery of irrevocable instructions to a broker to sell Shares obtained upon the exercise of the Option and to deliver promptly to the Company an amount out of the proceeds of such sale equal to the aggregate Option Price for the Shares being purchased. No Participant shall have any rights to dividends or other rights of a stockholder with respect to Shares subject to an Option until the Participant has given written notice of exercise of the Option, paid the full Option Price for such Shares and, if applicable, satisfied any other requirements imposed by the Committee.
- ii. Notwithstanding any other provision of the Plan or this Agreement to the contrary, the Option may not be exercised prior to the completion of any registration or qualification of the Option or the Shares under applicable state and federal securities or other laws, or under any ruling or regulation of any governmental body or national securities exchange that the Committee determines, in its sole discretion, to be necessary or advisable.
- iii. Upon the Committee's determination that the Option has been validly exercised as to any of the Shares, the Company shall issue certificates in the Participant's name for such Shares. However, the Company shall not be liable to any person or entity for damages relating to any delays in issuing the certificates, any loss of the certificates or any mistakes or errors in the issuance of the certificates or in the certificates themselves.
- iv. In the event of the Participant's death, the Vested Portion of the Option shall remain exercisable by the Participant's successor to the extent set forth in Section 5(a). No beneficiary, executor, administrator, heir or legatee of the Participant shall have greater rights than the Participant under this Agreement or otherwise.

6. Designation of Beneficiary. By properly executing and delivering a Designation of Beneficiary Form to the Company, the Participant may designate an individual or individuals as his or her beneficiary or beneficiaries with respect to his or her interest under the Plan. If the Participant fails to properly designate a beneficiary, his or her interests under this Agreement will pass to the person or persons in the first of the following classes (who shall be deemed a beneficiary or beneficiaries) in which there are any survivors: (i) spouse at the time of death; (ii) issue, per stirpes; (iii) parents; and (iv) the estate. Except as the Company may determine in its sole and exclusive discretion, a properly completed Designation of Beneficiary Form shall be deemed to revoke all prior designations upon its receipt and approval by the designated representative.

7. Non-Transferability of Option. The Option (and any portion thereof) may not be assigned, alienated, pledged, attached, sold or otherwise transferred or encumbered by the Participant other than by beneficiary designation pursuant to this Agreement or the laws of descent and distribution, and any such purported assignment, alienation, pledge, attachment, sale, transfer or encumbrance shall be void and unenforceable. No permitted transfer of the Option shall be effective to bind the Company unless the Committee is furnished with written notice thereof and a copy of such evidence as the Committee may deem necessary or appropriate to establish the validity of the transfer and the acceptance by the transferee or transferees of the terms and conditions of the Plan and this Agreement. During the Participant's lifetime, the Option is exercisable only by the Participant.

8. Non-Transferability of Shares; Legends. Upon the acquisition of any Shares pursuant to the exercise of the Option, if the Shares have not been registered under the Securities Act of 1933, as amended (the "Act"), they may not be sold,

transferred or otherwise disposed of unless a registration statement under the Act with respect to the Shares has become effective or unless the Participant establishes to the satisfaction of the Company that an exemption from such registration is available. The Shares will bear a legend stating the substance of such restrictions, as well as any other restrictions the Committee deems necessary or appropriate. In addition, the Participant will make or enter into such written representations, warranties and agreements as the Committee may reasonably request in order to comply with applicable securities laws or this Agreement.

9. Plan Administration. The Plan is administered by the Committee, which has sole and exclusive power and discretion to interpret, administer, implement and construe the Plan and this Agreement. All elections, notices and correspondence relating to the Plan should be directed to the Secretary at:

Chart Industries, Inc.
One Infinity Corporate Centre, Suite 300
Garfield Heights, OH 44125
Attn.: Secretary

10. Notices. Any notice relating to this Agreement intended for the Participant will be sent to the address appearing in the personnel records of the Company, its Affiliate or its Subsidiary. Either party may designate a different address in writing to the other. Any notice shall be deemed effective upon receipt by the addressee.

11. Successors and Legal Representatives. This Agreement will bind and inure to the benefit of the Company and the Participant and their respective heirs, beneficiaries, executors, administrators, estates, successors, assigns and legal representatives.

12. Withholding. The Participant may be required to pay to the Company or any Affiliate and the Company or any Affiliate shall have the right and is hereby authorized to withhold, any applicable withholding taxes in respect of the Option, its exercise or any payment or transfer under or with respect to the Option and to take such other action as may be necessary in the opinion of the Committee to satisfy all obligations for the payment of such withholding taxes.

13. Integration. This Agreement, together with the Plan, constitutes the entire agreement between the Participant and the Company with respect to the subject matter hereof and may not be modified, amended, renewed or terminated, nor may any term, condition or breach of any term or condition be waived, except pursuant to the terms of the Plan or Section 21 below or by a writing signed by the person or persons sought to be bound by such modification, amendment, renewal, termination or waiver. Any waiver of any term, condition or breach thereof will not be deemed a waiver of any other term or condition or of the same term or condition for the future, or of any subsequent breach.

14. Separability. In the event of the invalidity of any part or provision of this Agreement, such invalidity will not affect the enforceability of any other part or provision of this Agreement.

15. Incapacity. If the Committee determines that the Participant is incompetent by reason of physical or mental disability or a person incapable of handling his or her property, the Committee may deal directly with, or direct any issuance of Shares to, the guardian, legal representative or person having the care and custody of the incompetent or incapable person. The Committee may require proof of incompetence, incapacity or guardianship, as it may deem appropriate before making any issuance. In the event of an issuance of Shares, the Committee will have no obligation thereafter to monitor or follow the application of the Shares issued. Issuances made pursuant to this paragraph shall completely discharge the Company's obligations under this Agreement.

16. No Further Liability. The liability of the Company, its Affiliates, and its Subsidiaries under this Agreement is limited to the obligations set forth herein and no terms or provisions of this Agreement shall be construed to impose any liability on the Company, its Affiliates, its Subsidiaries or the Committee in favor of any person or entity with respect to any loss, cost, tax or expense which the person or entity may incur in connection with or arising from any transaction related to this Agreement.

17. Section Headings. The section headings of this Agreement are for convenience and reference only and are not intended to define, extend or limit the contents of the sections.

18. No Right to Continued Employment. Nothing in this Agreement will be construed to confer upon the Participant the right to continue in the Employment of the Company, its Subsidiaries or its Affiliates, or to be employed or serve in any particular position therewith, or affect any right the Company, its Subsidiaries or its Affiliates may have to terminate the Participant's Employment or service with or without cause.

19. Governing Law. This Agreement will be governed by, construed and enforced in accordance with the internal laws of the State of Delaware, without giving effect to its principles of conflict of laws.

20. Signature in Counterparts. This Agreement may be signed in counterparts, each of which shall be an original, with the same effect as if the signatures were upon the same instrument.

21. Amendment. The Committee may waive any conditions or rights under, amend any terms of, or alter, suspend, discontinue, cancel or terminate this Agreement, but no such waiver, amendment, alteration, suspension, discontinuance, cancellation or termination shall materially adversely affect the rights of the Participant hereunder without the consent of the Participant; provided, however, that the Participant's consent shall not be required to an amendment that is deemed necessary or appropriate by the Company to ensure (a) compliance with (or exemption from) Section 409A of the Code; (b) compliance with the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 or any regulations promulgated thereunder (the "Dodd-Frank Act"); or (c) compliance with the terms of any recoupment or "clawback" policy the Company adopts to comply with the requirements of the Dodd-Frank Act or any regulations promulgated thereunder (even if the terms of that policy are broader than the requirements of the Dodd-Frank Act).

22. Section 409A of the Code. It is intended that this Agreement and the compensation and benefits hereunder meet the requirements for exemption from Code Section 409A set forth in Treas. Reg. Section 1.409A-1(b)(5), as well as any other such applicable exemption, and this Agreement shall be so interpreted and administered. In addition to the general amendment rights of the Company with respect to the Plan, the Company specifically retains the unilateral right (but not the obligation) to make, prospectively or retroactively, any amendment to this Agreement or any related document as it deems necessary or desirable to more fully address issues in connection with exemption from (or compliance with) Section 409A of the Code and other laws. In no event, however, shall this section or any other provisions of this Agreement be construed to require the Company to provide any gross-up for the tax consequences of any provisions of, or payments under, this Agreement. Except as may be provided in another agreement to which the Company is bound, the Company and its Affiliates shall have no responsibility for tax or legal consequences to the Participant (or the Participant's beneficiaries) resulting from the terms or operation of this Agreement or the Plan.

23. Adjustment of Number of Shares, Etc. Subject to Section 3.4 of the Plan, if, after the Grant Date, the Committee determines that any dividend or other distribution (whether in the form of cash, Shares, other securities or other property), recapitalization, stock split, reverse stock split, reorganization, redesignation, reclassification, merger, consolidation, liquidation, split-up, reverse split, spin-off, combination, repurchase or exchange of Shares or other securities of the Company, issuance of warrants or other rights to purchase Shares or other securities of the Company or other similar corporate transaction or event affects the Shares such that an adjustment is determined by the Committee to be appropriate in order to prevent dilution or enlargement of the benefits or potential benefits intended to be made available under this Agreement, then the Committee may, in such manner as it deems equitable, adjust any or all of (i) the number and type of Shares (or other securities or other property) subject to the Option and (ii) the Option Price. Any such adjustment shall be final, binding and conclusive as to the Participant. Any such adjustment may provide for the elimination of fractional shares if the Committee shall so direct.

By Participant's signature and the signature of the Company's representative below, or by Participant's acceptance of this Award through the Company's online acceptance procedure, this Agreement shall be deemed to have been executed and delivered by the parties hereto as of the Grant Date.

Section 4: EX-10.3.22 (EXHIBIT 10.3.22)

AMENDED AND RESTATED 2009 OMNIBUS EQUITY PLAN

PERFORMANCE UNIT AGREEMENT

THIS PERFORMANCE UNIT AGREEMENT (the "Agreement"), is entered into as of this ____ day of _____, 20____ (the "Grant Date"), by and between Chart Industries, Inc., a Delaware corporation (the "Company"), and _____ (the "Grantee").

WITNESSETH:

WHEREAS, the Compensation Committee of the Board of Directors of the Company (the "Committee") administers the Chart Industries, Inc. Amended and Restated 2009 Omnibus Equity Plan (the "Plan"); and

WHEREAS, the Committee desires to provide the Grantee with Performance Units under the Plan upon the terms and conditions set forth in this Agreement.

NOW, THEREFORE, the Company and the Grantee agree as follows:

1. Definitions. Unless the context otherwise indicates, the following words used herein shall have the following meanings wherever used in this Agreement:

- a. "Disability" means, with respect to the Grantee, a medically determinable physical or mental impairment which can be expected to result in death or can be expected to last for a continuous period of not less than 12 months which: (i) renders the Grantee unable to engage in substantial gainful activity or (ii) results in the Grantee receiving income replacement benefits for at least three months under an accident and health plan sponsored by the Grantee's employer.
- b. "Performance Period" means the period set forth in Exhibit A.
- c. "Performance Requirements" means the performance measure(s) set forth in Exhibit A.
- d. "Performance Unit" means a Restricted Share Unit representing the right to receive a Share after completion of the Performance Period provided that the Performance Requirements have been satisfied.
- e. "Retirement" (or variations thereof) means a voluntary termination of Employment with the Company, its Subsidiaries and its Affiliates after either (i) attaining age 60 and completing 10 years of service with such entities or (ii) attaining age 65.

Notwithstanding this Section, and unless otherwise specified in the Agreement, capitalized terms shall have the meanings attributed to them under the Plan.

2. Grant of Performance Units. As of the Grant Date, the Company grants to the Grantee, upon the terms and conditions set forth in this Agreement, (____) Performance Units. If the Grantee is a Section 162(m) Person, the Performance Units are intended to be Section 162(m) of the Code "performance-based compensation." The Performance Units are granted in accordance with, and subject to, all the terms, conditions and restrictions of the Plan, which is hereby incorporated by reference in its entirety. In the event of a conflict between any term or provision contained herein and a term or provision of the Plan, the applicable terms and provisions of the Plan will govern. The Grantee irrevocably agrees to, and accepts, the terms, conditions and restrictions of the Plan and this Agreement on his own behalf and on behalf of any beneficiaries, heirs, legatees, successors and assigns.

3. Restrictions on Transfer of Performance Units. The Grantee and his or her beneficiaries, heirs, legatees, successors and assigns cannot sell, transfer, assign, pledge, hypothecate or otherwise directly or indirectly dispose of the Performance Units (whether with or without consideration and whether voluntarily or involuntarily or by operation of law) or any interest therein.

4. Termination of Employment.

- a. Retirement, Death or Disability. If the Grantee terminates Employment as a result of Retirement, death or Disability prior to the last day of the Performance Period, the Grantee (or his or her beneficiary or beneficiaries) shall be entitled to a pro-rated number of Shares, calculated by multiplying (x) by (y) where:

(x) is the number of Shares, if any, that would have been earned by the Grantee as the result of the satisfaction of the Performance Requirements; and

(y) is the number of months that the Grantee was employed (rounded up to the nearest whole number) during the Performance Period divided by the number of months in the Performance Period.

The distribution or payment of the pro-rated award shall occur (if at all) at the same time as the distribution or payment specified in Section 6.

- b. Reasons Other Than Retirement, Death or Disability. Except as otherwise provided in Section 5, if the Committee determines in its sole and exclusive discretion that the Grantee's Employment has terminated prior to the end of the Performance Period for reasons other than those described in Section 4(a) above, the Grantee will forfeit his or her Performance Units. If the Performance Units are forfeited, the Grantee and all persons who might claim through him or her will have no further interests under this Agreement.

5. Change in Control. Upon a Change in Control prior to the end of the Performance Period:

- a. the Performance Requirements shall be deemed to have been satisfied at the greater of either: (i) the target level of the Performance Requirements as set forth on Exhibit A as if the entire Performance Period had elapsed; or (ii) the level of actual achievement of the Performance Requirements as of the date of the Change in Control; and
- b. the appropriate number of Shares, determined in accordance with subsection (a) above shall be issued to the Grantee not later than 30 days after the date of the Change in Control.

6. Distributions. Within 60 days after satisfaction or deemed satisfaction of the Performance Requirements:

- a. with respect to Shares earned under Sections 4 or 5, the Company will deliver to Grantee (or his or her beneficiary or beneficiaries) certificates for the Shares to which Grantee is entitled, subject to any applicable securities law restrictions; and
- b. with respect to Shares otherwise earned under this Agreement, the Company will issue to the Grantee the Shares to which Grantee is entitled, subject to any applicable securities law restrictions, and provided that the Grantee is in active Employment on the last day of the Performance Period.

For purposes of this Section 6, "earned" Shares are those Shares to which the Grantee is entitled based upon the Earned Performance Units (as described in Exhibit A) and the terms of Section 4 or 5, if applicable. Upon distribution of Shares, the recipient and all persons who might claim through him or her shall have no remaining interest under this Agreement.

7. Dividend and Voting Rights. The Grantee will not have any voting rights or be entitled to any dividends with respect to Performance Units unless and until the Performance Requirements are timely satisfied and Shares have actually been issued to the Grantee. No dividends or dividend equivalents will be paid to the Grantee based upon interests in the Performance Units during the Performance Period.

8. Designation of Beneficiary. By properly executing and delivering a Designation of Beneficiary Form to the Company, the Grantee may designate an individual or individuals as his or her beneficiary or beneficiaries with respect to his or her interest under this Agreement. If the Grantee fails to properly designate a beneficiary, his or her interests under this Agreement will pass to the person or persons in the first of the following classes (who shall be deemed a beneficiary or beneficiaries) in which there are any survivors: (i) spouse at the time of death; (ii) issue, *per stirpes*; (iii) parents; and (iv) the estate. Except as the Company may determine in its sole and exclusive discretion, a properly completed Designation of Beneficiary Form shall be deemed to revoke all prior designations with respect to this Agreement (or, if the form so provides, the Plan) upon its receipt and approval by the designated representative of the Company.

9. Non-Transferability of Shares; Legends. Upon the acquisition of any Shares pursuant to this Agreement, if the Shares have not been registered under the Securities Act of 1933, as amended (the “Act”), they may not be sold, transferred or otherwise disposed of unless a registration statement under the Act with respect to the Shares has become effective or unless the Grantee establishes to the satisfaction of the Company that an exemption from such registration is available. The Shares will bear a legend stating the substance of such restrictions, as well as any other restrictions the Committee deems necessary or appropriate. In addition, the Grantee will make or enter into such written representations, warranties and agreements as the Committee may reasonably request in order to comply with applicable securities laws or this Agreement.

10. Effect of Corporate Reorganization or Other Changes Affecting Number or Kind of Shares. The provisions of this Agreement will be applicable to the performance units, Shares or other securities, if any, which may be acquired by the Grantee related to the Performance Units as a result of any dividend or other distribution (whether in the form of cash, Shares, other securities or other property), recapitalization, stock split, reverse stock split, reorganization, redesignation, reclassification, merger, consolidation, liquidation, split-up, reverse split, spin-off, combination, repurchase or exchange of Shares or other securities of the Company, issuance of warrants or other rights to purchase Shares or other securities of the Company or other similar corporate transaction or event. Subject to Section 3.4 of the Plan, the Committee may appropriately adjust the number and kind of performance units or Shares described in this Agreement to reflect such a change.

11. Plan Administration. The Plan is administered by the Committee, which has sole and exclusive power and discretion to interpret, administer, implement and construe the Plan and this Agreement. All elections, notices and correspondence relating to the Plan should be directed to the Secretary at:

Chart Industries, Inc.
One Infinity Corporate Centre, Suite 300
Garfield Heights, OH 44125
Attn.: Secretary

12. Notices. Any notice relating to this Agreement intended for the Grantee will be sent to the address appearing in the personnel records of the Company, its Affiliate or its Subsidiary. Either party may designate a different address in writing to the other. Any notice shall be deemed effective upon receipt by the addressee.

13. Termination of Agreement. This Agreement will terminate on the earliest of: (a) the last day of the Performance Period if the Performance Requirements are not satisfied; (b) the date of termination of the Grantee’s Employment for reasons referenced in Section 4(b) prior to the last day of the Performance Period; or (c) the date that Shares are delivered to the Grantee (or his or her beneficiary or beneficiaries). Any terms or conditions of this Agreement that the Company determines are reasonably necessary to effectuate its purposes will survive the termination of this Agreement. Without limiting the generality of the foregoing, the termination of this Agreement will not affect any obligation the Grantee may have, as determined by the Committee in its sole discretion, under any recoupment or “clawback” policy adopted by the Company.

14. Successors and Legal Representatives. This Agreement will bind and inure to the benefit of the Company and the Grantee and their respective heirs, beneficiaries, executors, administrators, estates, successors, assigns and legal representatives.

15. Integration. This Agreement, together with the Plan, constitutes the entire agreement between the Grantee and the Company with respect to the subject matter hereof and may not be modified, amended, renewed or terminated, nor may any term, condition or breach of any term or condition be waived, except pursuant to the terms of the Plan or Section 23 below or by a writing signed by the person or persons sought to be bound by such modification, amendment, renewal, termination or waiver. Any waiver of any term, condition or breach thereof will not be a waiver of any other term or condition or of the same term or condition for the future, or of any subsequent breach.

16. Separability. In the event of the invalidity of any part or provision of this Agreement, such invalidity will not affect the enforceability of any other part or provision of this Agreement.

17. Incapacity. If the Committee determines that the Grantee is incompetent by reason of physical or mental disability or a person incapable of handling his or her property, the Committee may deal directly with or direct any payment to the guardian, legal representative or person having the care and custody of the incompetent or incapable person. The Committee may require proof of incompetence, incapacity or guardianship, as it may deem appropriate before making any payment. In the event of a payment, the Committee will have no obligation thereafter to monitor or follow the application of the amounts so paid. Payments pursuant to this paragraph shall completely discharge the Company with respect to such payments.

18. No Further Liability. The liability of the Company, its Affiliates and its Subsidiaries under this Agreement is

limited to the obligations set forth herein and no terms or provisions of this Agreement shall be construed to impose any liability on the Company, its Affiliates, its Subsidiaries or the Committee in favor of any person or entity with respect to any loss, cost, tax or expense which the person or entity may incur in connection with or arising from any transaction related to this Agreement.

19. Section Headings. The section headings of this Agreement are for convenience and reference only and are not intended to define, extend or limit the contents of the sections.

20. No Right to Continued Employment. Nothing in this Agreement will be construed to confer upon the Grantee the right to continue in the employment or service of the Company, its Subsidiaries or Affiliates, or to be employed or serve in any particular position therewith, or affect any right which the Company, its Subsidiaries or an Affiliate may have to terminate the Grantee's employment or service with or without cause.

21. Governing Law. Except as may otherwise be provided in the Plan, this Agreement will be governed by, construed and enforced in accordance with the internal laws of the State of Delaware, without giving effect to its principles of conflict of laws.

22. Signature in Counterparts. This Agreement may be signed in counterparts, each of which shall be an original, with the same effect as if the signatures were upon the same instrument.

23. Amendment. The Committee may waive any conditions or rights under, amend any terms of, or alter, suspend, discontinue, cancel or terminate this Agreement, but no such waiver, amendment, alteration, suspension, discontinuance, cancellation or termination shall materially adversely affect the rights of the Grantee hereunder without the consent of the Grantee; *provided, however*, that the Grantee's consent shall not be required to an amendment that is deemed necessary or appropriate by the Company to ensure (a) compliance with (or exemption from) Section 409A of the Code; (b) compliance with the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 or any regulations promulgated thereunder (the "Dodd-Frank Act"); or (c) compliance with the terms of any recoupment or "clawback" policy the Company adopts to comply with the requirements of the Dodd-Frank Act or any regulations promulgated thereunder (even if the terms of that policy are broader than the requirements of the Dodd-Frank Act).

24. Withholding. The Grantee shall be required to pay to the Company or any Affiliate and the Company or any Affiliate shall have the right and is hereby authorized to withhold, any applicable withholding taxes in respect of the Award or payment of Shares thereunder, or any payment or transfer under or with respect to the Award or Shares and to take such other action as may be necessary in the opinion of the Committee to satisfy all obligations for the payment of such withholding taxes. Unless the Grantee makes other arrangements that are satisfactory to the Committee to cover the Company's or its Affiliate's withholding obligations, at any time that taxes are required to be withheld in connection with this Award, the Company shall withhold Shares from this Award with a Fair Market Value equal to the amount required to satisfy the minimum tax withholding obligations applicable to Grantee relating to this Award.

25. Section 409A of the Code. This Agreement, together with the Plan, constitutes the entire agreement between the parties with respect to the subject matter hereof. The parties intend that this Agreement be, at all relevant times, exempt from (or in compliance with) Section 409A of the Code and all other applicable laws, and this Agreement shall be so interpreted and administered. In addition to the general amendment rights of the Company with respect to the Plan, the Company specifically retains the unilateral right (but not the obligation) to make, prospectively or retroactively, any amendment to this Agreement or any related document as it deems necessary or desirable to more fully address issues in connection with exemption from (or in compliance with) Section 409A of the Code and other laws. In no event, however, shall this section or any other provisions of this Agreement be construed to require the Company to provide any gross-up for the tax consequences of any provisions of, or payments under, this Agreement. Except as may be provided in another agreement to which the Company is bound, the Company and its Affiliates shall have no responsibility for tax or legal consequences to the Grantee (or the Grantee's beneficiaries) resulting from the terms or operation of this Agreement or the Plan.

[THE REMAINDER OF THIS PAGE IS INTENTIONALLY LEFT BLANK]

By Grantee's signature and the signature of the Company's representative below, or by Grantee's acceptance of this Award through the Company's online acceptance procedure, this Agreement shall be deemed to have been executed and delivered by the parties hereto as of the Grant Date.

EXHIBIT A

PERFORMANCE REQUIREMENTS

Performance Period

The Performance Period begins on January 1, 2017 and ends on December 31, 2019.

Performance Measure(s)

The Performance Measure is:

Return on Investment - Return on Investment (“ROI”) is determined by the following formula:

$$\frac{(\text{Operating Income}) \times (1 \text{ minus the Company's Effective Tax Rate})}{\text{Average Capital}^\# \text{ of last 2 years}}$$

[#]Capital = Total Shareholder’s Equity + Noncontrolling Interest + ST Debt + LT Debt minus Cash

Where,

- “Operating Income” is the sum of the last twelve months of Total Sales less Cost of Sales and Operating Expenses (excluding nonrecurring items, such as impairment charges and unusual loss or gain on disposal of assets);
- “Noncontrolling Interest” is, with respect to subsidiaries of the Company that are not fully owned by the Company, the portion of the equity of such subsidiaries that is not owned by the Company;
- “ST Debt” is debt that is due within one year;
- “LT Debt” is debt that is due longer than one year; and
- “Cash” is cash and cash equivalents.

For avoidance of doubt, debt shall include items customarily considered to be debt on the Company’s audited consolidated balance sheet. For example, the following items are considered to be debt on the Company’s consolidated balance sheet: short-term debt; current convertible notes; current portion of long-term debt; long-term debt; and convertible notes conversion feature.

The first Measurement Period will be January 1, 2017 through December 31, 2017.

The second Measurement Period will be January 1, 2018 through December 31, 2018.

The third Measurement Period will be January 1, 2019 through December 31, 2019.

At the end of each Measurement Period, the Company’s ROI for such period will be calculated by the Committee. The calculations shall be based on the information provided in the Company’s audited consolidated financial statements, subject to any adjustments as described in this Exhibit A. Then, after the end of the third Measurement Period, the average annual ROI will be calculated by adding the ROI for each Measurement Period and dividing the sum by three (the “Average Annual ROI”). If the performance period is less than three years due to a Change in Control, the Committee shall calculate the ROI for the Measurement Period in which the Change in Control occurs up to the date immediately preceding the date of the Change in Control, with any adjustments necessary to account for the shorter period (including possible measurements of fractional year performance).

The Committee may, in the exercise of its discretion in good faith and in a manner consistent with the purposes of this Agreement, make such adjustments in calculating ROI of the Company (or any of its elements) as it deems necessary or appropriate to account for extraordinary, unusual or non-recurring events affecting the Company. Without limiting the foregoing, the Committee may make appropriate adjustments to ROI (or any of its elements) to reflect a merger, acquisition, disposition, spin-off, bankruptcy or liquidation, material impairment or restructuring charge, gain or loss on sale of non-operating assets, income or loss from discontinued operations, income or expenses related to the adoption or change of accounting principles, income or expenses related to material litigation and disputes, and any other extraordinary, unusual or non-recurring items affecting the Company deemed to be adjustments by the Committee.

Earned Performance Units

The Performance Units subject to the ROI Performance Measure shall become earned performance units (the "Earned Performance Units"), as determined pursuant to the methodology set forth below:

Earned Performance Units

The number of Earned Performance Units is determined as follows:

- a. Based on the Company's Average Annual ROI during the Performance Period, determine the percentage of Earned Performance Units (the "Earned Percentage") as provided as follows:

	<u>Earned Percentage</u>	<u>Average Annual ROI</u>
Maximum	200%	9.0%
Target	100%	6.0%
Minimum	50%	4.0%

With respect to performance levels that fall between these percentiles, the Earned Percentage will be interpolated on a straight-line basis. In no event will the Earned Percentage exceed 200%.

- b. Determine the number of Earned Performance Units as follows:

Earned Percentage *multiplied by* Number of Performance Units granted in award

[\(Back To Top\)](#)

Section 5: EX-10.3.23 (EXHIBIT 10.3.23)

Exhibit 10.3.23

CHART INDUSTRIES, INC. AMENDED AND RESTATED 2009 OMNIBUS EQUITY PLAN

RESTRICTED SHARE UNIT AGREEMENT

THIS RESTRICTED SHARE UNIT AGREEMENT (the "Agreement"), is entered into as of this ___ day of _____, 20___ (the "Grant Date"), by and between Chart Industries, Inc., a Delaware corporation (the "Company"), and _____ (the "Grantee").

WITNESSETH:

WHEREAS, the Compensation Committee of the Board of Directors of the Company (the "Committee") administers the Chart Industries, Inc. Amended and Restated 2009 Omnibus Equity Plan (the "Plan"); and

WHEREAS, the Committee desires to provide the Grantee with Restricted Share Units under the Plan upon the terms and conditions set forth in this Agreement.

NOW, THEREFORE, the Company and the Grantee agree as follows:

1. Definitions. Unless the context otherwise indicates, the following words used herein shall have the following meanings wherever used in this Agreement:

- (a) "Change in Control" means a change in control that is both a Change in Control as defined in Section 12.1 of the Plan and a "change in control event" (as defined in Treasury Regulation Section 1.409A-3(i)(5)(i)) for purposes of Section 409A of the Code.

- (b) “Disability” or variations thereof means, with respect to the Grantee, a medically determinable physical or mental impairment which can be expected to result in death or can be expected to last for a continuous period of not less than 12 months which: (i) renders the Grantee unable to engage in substantial gainful activity or (ii) results in the Grantee receiving income replacement benefits for at least three months under an accident and health plan sponsored by the Grantee’s employer. Notwithstanding the foregoing, a Grantee will not be considered “Disabled” with respect to this Agreement unless his or her disability satisfies the requirements set forth in Section 409A of the Code.

- (c) “Retirement” or variations thereof means, with respect to the Grantee, a voluntary termination of Employment with the Company, its Subsidiaries and its Affiliates, either (i) after attaining age 60 and completing 10 years of service with such entities or (ii) after attaining age 65.

Notwithstanding this Section, and unless otherwise specified in the Agreement, capitalized terms shall have the meanings attributed to them under the Plan.

2. Grant of Restricted Share Units. As of the Grant Date, the Company grants to the Grantee, upon the terms and conditions set forth in this Agreement, (____) Restricted Share Units (the “RSUs”). The Restricted Share Units are granted in accordance with, and subject to, all the terms, conditions and restrictions of the Plan, which is hereby incorporated by reference in its entirety. The RSUs give the Grantee the right to receive one (1) Share for each RSU subject to the satisfaction of the vesting requirements set forth in this Agreement. In the event of a conflict between any term or provision contained herein and a term or provision of the Plan, the applicable terms and provisions of the Plan will govern. The Grantee irrevocably agrees to, and accepts, the terms, conditions and restrictions of the Plan and this Agreement on his or her own behalf and on behalf of any beneficiaries, heirs, legatees, successors and assigns.

3. Restrictions on Transfer of Restricted Share Units. The Grantee and his or her beneficiaries, heirs, legatees, successors and assigns cannot sell, transfer, assign, pledge, hypothecate or otherwise directly or indirectly dispose of the Restricted Share Units (whether with or without consideration and whether voluntarily or involuntarily or by operation of law) or any interest therein.

4. Restriction Period.

- (a) Service-Based. Subject to the Grantee's continued Employment with the Company or its Affiliates as of such dates (except as otherwise provided herein with respect to death, Disability, Retirement or a Change in Control), the RSUs, together with any dividend equivalents credited pursuant to Section 7(b) below, shall Vest with respect to thirty-three and one-third percent (33 1/3%) of the Shares covered by the Award on each of the first (the "First Vesting Date"), second (the "Second Vesting Date"), and third (the "Third Vesting Date") anniversaries of the Grant Date (each, a "Vesting Date").
- (b) Retirement. If the Grantee's Employment terminates as a result of Retirement, the vesting provisions set forth in Sections 4 (a) and 24 of this Agreement shall continue to apply, but without giving effect to any requirement of continuous Employment.
- (c) Death or Disability. If the Grantee dies or the Grantee becomes Disabled, the RSUs together with any dividend equivalents credited pursuant to Section 7(b) below, shall, to the extent not then Vested and not previously forfeited, immediately become fully Vested as of the date of the Grantee's death or Disability.
- (d) Change in Control. In the event of a Change in Control of the Company, subject to the Grantee's continuous Employment from the Grant Date through the date of the Change in Control, the RSUs, together with any dividend equivalents credited pursuant to Section 7(b) below, shall, to the extent not then Vested and not previously forfeited, immediately become fully Vested as of the date of the Change in Control.

5. Forfeiture. If the Committee determines in its sole and exclusive discretion that the Grantee's Employment with the Company, its Subsidiaries and Affiliates has terminated prior to the Vesting Dates for reasons other than death, Disability or Retirement or prior to the occurrence of a Change in Control in Section 4(d) above, the Grantee will forfeit any unvested RSUs, together with any dividend equivalents credited pursuant to Section 7(b) below, and any right to receive Shares under this Agreement with respect to such unvested RSUs and the Grantee will have no further interests under this Agreement.

6. Payment and Issuance of Common Shares. The Company will deliver to the Grantee (or his or her beneficiary or beneficiaries) the Vested Shares to which the Grantee is then entitled under this Agreement (including any Shares to which the Grantee is entitled as a result of dividend equivalents credited pursuant to Section 7(b) below) free and clear of any restrictions (except any applicable securities law restrictions) in a lump sum no later than 60 days following the first to occur of (a "Payment Date"): (a) an applicable Vesting Date under Section 4(a) above (which delivery schedule shall also apply to any Grantee who has Retired), (b) the Grantee's death, (c) the Grantee's Disability or (d) a Change in Control of the Company. Any otherwise Vested fractional Shares remaining as of a Payment Date shall be eliminated and cancelled.

7. Stockholder Rights.

- (a) Voting Rights. The Grantee will not have any Stockholder rights, including voting rights, with respect to the RSUs unless and until Shares have actually been issued to the Grantee.
- (b) Dividend Equivalents. If on any date prior to a Payment Date the Company shall pay any cash dividend on the Shares (with a record date after the Grant Date), then the Company shall credit on the books and records of the Company and the Grantee shall be entitled to receive, on the Payment Date, a number of Shares (rounded down to the next whole Share) equal to: (a) the aggregate number of RSUs credited to the Grantee as of the related dividend record date, multiplied by (b) the per Share amount of such cash dividend and divided by (c) the Fair Market Value of a Share on the dividend record date. In the case of any dividend declared on Shares (with a record date after the Grant Date) that is payable in the form of Shares, the Company shall credit to the Grantee's bookkeeping account and the Grantee shall be granted, as of the Payment Date, a number of additional Shares (rounded down to the next whole Share) equal to: (x) the aggregate number of RSUs credited to the Grantee as of the related dividend record date, multiplied by (y) the number of Shares (including any fraction thereof) payable as a dividend on a Share.

8. Designation of Beneficiary. By properly executing and delivering a Designation of Beneficiary Form to the Company, the Grantee may designate an individual or individuals as his or her beneficiary or beneficiaries with respect to his or her interest under this Agreement. If the Grantee fails to properly designate a beneficiary, his or her interests under this Agreement will pass to the person or persons in the first of the following classes (who shall be deemed a beneficiary or beneficiaries) in which there are any survivors: (i) spouse at the time of death; (ii) issue, *per stirpes*; (iii) parents; and (iv) the estate. Except as the

Company may determine in its sole and exclusive discretion, a properly completed Designation of Beneficiary Form shall be deemed to revoke all prior designations with respect to this Agreement (or, if the form so provides, the Plan) upon its receipt and approval by the designated representative of the Company.

9. Non-Transferability of Shares; Legends. Upon the acquisition of any Shares pursuant to this Agreement, if the Shares have not been registered under the Securities Act of 1933, as amended (the "Act"), they may not be sold, transferred or otherwise disposed of unless a registration statement under the Act with respect to the Shares has become effective or unless the Grantee establishes to the satisfaction of the Company that an exemption from such registration is available. The Shares will bear a legend stating the substance of such restrictions, as well as any other restrictions the Committee deems necessary or appropriate. In addition, the Grantee will make or enter into such written representations, warranties and agreements as the Committee may reasonably request in order to comply with applicable securities laws or this Agreement.

10. Effect of Corporate Reorganization or Other Changes Affecting Number or Kind of Shares. The provisions of this Agreement will be applicable to the RSUs, Shares or other securities, if any, which may be acquired by the Grantee related to the RSUs as a result of any dividend or other distribution (whether in the form of cash, Shares, other securities or other property), recapitalization, stock split, reverse stock split, reorganization, redesignation, reclassification, merger, consolidation, liquidation, split-up, reverse split, spin-off, combination, repurchase or exchange of Shares or other securities of the Company, issuance of warrants or other rights to purchase Shares or other securities of the Company or other similar corporate transaction or event. Subject to Section 3.4 of the Plan, the Committee may appropriately adjust the number and kind of RSUs or Shares described in this Agreement to reflect such a change.

11. Plan Administration. The Plan is administered by the Committee, which has sole and exclusive power and discretion to interpret, administer, implement and construe the Plan and this Agreement. All elections, notices and correspondence relating to the Plan should be directed to the Secretary at:

Chart Industries, Inc.
One Infinity Corporate Centre, Suite 300
Garfield Heights, OH 44125
Attn.: Secretary

12. Notices. Any notice relating to this Agreement intended for the Grantee will be sent to the address appearing in the personnel records of the Company, its Affiliate or its Subsidiary. Either party may designate a different address in writing to the other. Any notice shall be deemed effective upon receipt by the addressee.

13. Termination of Agreement. This Agreement will terminate on the earliest of: (a) the last day of the Restriction Period under Section 4 above; (b) the date of termination of the Grantee's Employment for reasons referenced in Section 5 above; or (c) the date that Shares are delivered to the Grantee (or his or her beneficiary or beneficiaries). Any terms or conditions of this Agreement that the Company determines are reasonably necessary to effectuate its purposes will survive the termination of this Agreement. Without limiting the generality of the foregoing, the termination of this Agreement will not affect any obligation the Grantee may have, as determined by the Committee in its sole discretion, under any recoupment or "clawback" policy adopted by the Company.

14. Successors and Legal Representatives. This Agreement will bind and inure to the benefit of the Company and the Grantee and their respective heirs, beneficiaries, executors, administrators, estates, successors, assigns and legal representatives.

15. Integration. This Agreement, together with the Plan, constitutes the entire agreement between the Grantee and the Company with respect to the subject matter hereof and may not be modified, amended, renewed or terminated, nor may any term, condition or breach of any term or condition be waived, except pursuant to the terms of the Plan or Section 23 below or by a writing signed by the person or persons sought to be bound by such modification, amendment, renewal, termination or waiver. Any waiver of any term, condition or breach thereof will not be a waiver of any other term or condition or of the same term or condition for the future, or of any subsequent breach.

16. Separability. In the event of the invalidity of any part or provision of this Agreement, such invalidity will not affect the enforceability of any other part or provision of this Agreement.

17. Incapacity. If the Committee determines that the Grantee is incompetent by reason of physical or mental disability or a person incapable of handling his or her property, the Committee may deal directly with or direct any payment to the guardian, legal representative or person having the care and custody of the incompetent or incapable person. The Committee may require proof of incompetence, incapacity or guardianship, as it may deem appropriate before making any payment. In the event of a

payment, the Committee will have no obligation thereafter to monitor or follow the application of the amounts so paid. Payments pursuant to this paragraph shall completely discharge the Company with respect to such payments.

18. No Further Liability. The liability of the Company, its Affiliates and its Subsidiaries under this Agreement is limited to the obligations set forth herein and no terms or provisions of this Agreement shall be construed to impose any liability on the Company, its Affiliates, its Subsidiaries or the Committee in favor of any person or entity with respect to any loss, cost, tax or expense which the person or entity may incur in connection with or arising from any transaction related to this Agreement.

19. Section Headings. The section headings of this Agreement are for convenience and reference only and are not intended to define, extend or limit the contents of the sections.

20. No Right to Continued Employment. Nothing in this Agreement will be construed to confer upon the Grantee the right to continue in the employment or service of the Company, its Subsidiaries or Affiliates, or to be employed or serve in any particular position therewith, or affect any right which the Company, its Subsidiaries or an Affiliate may have to terminate the Grantee's employment or service with or without cause.

21. Governing Law. Except as may otherwise be provided in the Plan, this Agreement will be governed by, construed and enforced in accordance with the internal laws of the State of Delaware, without giving effect to its principles of conflict of laws.

22. Signature in Counterparts. This Agreement may be signed in counterparts, each of which shall be an original, with the same effect as if the signatures were upon the same instrument.

23. Amendment. The Committee may waive any conditions or rights under, amend any terms of, or alter, suspend, discontinue, cancel or terminate this Agreement, but no such waiver, amendment, alteration, suspension, discontinuance, cancellation or termination shall materially adversely affect the rights of the Grantee hereunder without the consent of the Grantee; *provided, however*, that the Grantee's consent shall not be required to an amendment that is deemed necessary or appropriate by the Company to ensure (a) compliance with (or exemption from) Section 409A of the Code; (b) compliance with the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 or any regulations promulgated thereunder (the "Dodd-Frank Act"); or (c) compliance with the terms of any recoupment or "clawback" policy the Company adopts to comply with the requirements of the Dodd-Frank Act or any regulations promulgated thereunder (even if the terms of that policy are broader than the requirements of the Dodd-Frank Act).

24. Withholding and Taxes. The Grantee shall be required to pay to the Company or any Affiliate and the Company or any Affiliate shall have the right and is hereby authorized to withhold, any applicable withholding taxes in respect of the Award or payment of Shares thereunder, or any payment or transfer under or with respect to the Award or Shares and to take such other action as may be necessary in the opinion of the Committee to satisfy all obligations for the payment of such withholding taxes. Unless the Grantee makes other arrangements that are satisfactory to the Committee to cover the Company's or its Affiliate's withholding obligations, at any time that taxes are required to be withheld in connection with this Award, the Company shall withhold Shares from this Award with a Fair Market Value equal to the amount required to satisfy the minimum tax withholding obligations applicable to Grantee relating to this Award.

The delivery of Shares under this Agreement shall be accelerated to pay any Federal Insurance Contributions Act ("FICA") tax imposed under Sections 3101, 3121(a), and Section 3121(v)(2) of the Code on compensation deferred under the Plan (the "FICA Amount"), as well as to pay the income tax at source on wages imposed under Section 3401 of the Code or the corresponding withholding provisions of applicable state, local, or foreign tax laws as a result of the payment of the FICA Amount, and to pay the additional income tax at source on wages attributable to the pyramiding Section 3401 of the Code wages and taxes. However, the total payment accelerated under this Section 24 acceleration provision must not exceed the number of whole Shares (rounded up for any fractional Shares) with a Fair Market Value equal to the aggregate of the FICA Amount and the income tax withholding related to such FICA Amount. The first delivery of Shares made with respect to the RSUs that occurs after the acceleration of Shares provided for in this paragraph shall be reduced by the number of Shares that were so accelerated.

25. Section 409A of the Code. This Agreement, together with the Plan, constitutes the entire agreement between the parties with respect to the subject matter hereof. The parties intend that this Agreement be, at all relevant times, compliant with (or exempt from) Section 409A of the Code and all other applicable laws, and, if the Grantee's interests hereunder are subject to Section 409A of the Code, this Agreement shall be so interpreted and administered. In addition to the general amendment rights of the Company with respect to the Plan, the Company specifically retains the unilateral right (but not the obligation) to make, prospectively or retroactively, any amendment to this Agreement or any related document as it deems necessary or desirable to more fully address issues in connection with compliance with (or exemption from) Section 409A of the Code and other laws. In no event, however, shall this section or any other provisions of this Agreement be construed to require the Company to provide any gross-up for the tax consequences of any provisions of, or payments under, this Agreement. Except as may be provided in

another agreement to which the Company is bound, the Company and its Affiliates shall have no responsibility for tax or legal consequences to the Grantee (or the Grantee's beneficiaries) resulting from the terms or operation of this Agreement or the Plan.

26. **Six-Month Delay in Payment.** Notwithstanding anything in this Agreement to the contrary, if at the time of the Grantee's termination of Employment with the Company, the Grantee's interests hereunder are subject to Section 409A of the Code and the Grantee is a "specified employee" as defined in Section 409A of the Code, and the deferral of the commencement of any payments or benefits otherwise payable hereunder as a result of such termination of Employment is necessary in order to prevent the imposition of any accelerated or additional tax under Section 409A of the Code, then the Company will defer the commencement of the payment of any such payments or benefits hereunder (without any reduction in such payments or benefits ultimately paid or provided to the Grantee) until the date that is six (6) months following the Grantee's termination of Employment with the Company (or the earliest date as is permitted under Section 409A of the Code).

By Grantee's signature and the signature of the Company's representative below, or by Grantee's acceptance of this Award through the Company's online acceptance procedure, this Agreement shall be deemed to have been executed and delivered by the parties hereto as of the Grant Date.

CERTIFICATION

I, Samuel F. Thomas, certify that:

1. I have reviewed this Annual Report on Form 10-K of Chart Industries, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
